PREFACE

At the request of the Council this Volume has been prepared. It is an Index to the first twenty Volumes of the "New Series." The First Part of the Index contains a list of the Authors of Original Contributions, and of Exhibitors of Patients and Specimens. The Second Part contains a list of Subjects.

WILLIAM CRAIG,
Editor.

September 1902.

Medico-Chirurgical Society of Edinburgh.

INSTITUTED 2ND AUGUST 1821.

OFFICE-BEARERS FOR SESSION 1901-1902.

PRESIDENT.

SIR THOMAS R. FRASER, M.D., LL.D., *P.*R.C.P. Ed.

VICE-PRESIDENTS.

JAMES ANDREW, M.D., F.R.C.P. Ed.
CHARLES EDWARD UNDERHILL, M.B., F.R.C.S. Ed., F.R.C.P. Ed.
JAMES RITCHIE, M.D., F.R.C.S. Ed., F.R.C.P. Ed.

TREASURER.

HENRY HARVEY LITTLEJOHN, M.B., F.R.C.S. Ed., 1 Atholl Crescent.

SECRETARIES.

G. HARRY MELVILLE DUNLOP, M.D., F.R.C.P. Ed., 20 Abercromby Place.
HENRY ALEXIS THOMSON, M.D., F.R.C.S. Ed., 39 Drumsheugh Gardens.

EDITOR OF TRANSACTIONS.

WILLIAM CRAIG, M.D., F.R.C.S. Ed.

MEMBERS OF COUNCIL.

JOHN WILLIAM BALLANTYNE, M.D., F.R.C.P. Ed.
GEORGE KERR, M.B., C.M.
KENNETH MACKINNON DOUGLAS, M.D., F.R.C.S. Ed.
HAROLD JALLAND STILES, M.B., F.R.C.S. Ed.
ALEXANDER GORDON MILLER, M.D., F.R.C.S. Ed.
WILLIAM RUSSELL, M.D., F.R.C.P. Ed.
D. NOEL PATON, M.D., F.R.C.P. Ed.
ARTHUR LOGAN TURNER, M.D., F.R.C.S. Ed.

INDEX

PART I

Authors of Original Communications and Exhibitors of Patients and Specimens

A

ABERNETHY, DR ROBERT
Exhibits—microscopic sections from a piece of tissue passed *per rectum*, **xii.** 91.

ADAMSON, DR
Exhibits—a patient with patent ductus arteriosus, **xv.** 120.

AFFLECK, DR J. O.
Original Communications—(1) clinical observations on a case of perforating gastric ulcer, **iii.** 77; (2) the clinical value of temperature observations, **vii.** 155; (3) observations upon disease of the appendix vermiformis and its results, **xii.** 214. **Exhibits Patients**—(1) a young woman upon whom the operation of resection of ribs had been performed for empyema, **vi.** 75; (2) a case of pernicious anæmia, **vii.** 74; (3) a case of alcoholic paralysis, **viii.** 2; (4) a case of vaso-motor disturbance of the hands, **x.** 117; (5) a man on whom transfusion of human blood had been performed for pernicious anæmia, **xi.** 239; (6) a case of cerebral syphilis, **xvi.** 77; (7) a man on whom Loreta's operation for stricture of the pylorus had been performed, **xvii.** 54; (8) two patients who had been treated surgically for tubercular peritonitis, **xvii.** 179; (9) two cases (brother and sister) of Friedreich's ataxia and a case of Addison's disease, **xviii.** 67; (10) two cases of diabetes mellitus, **xviii.** 186; (11) a case of diabetes insipidus, **xviii.** 186; (12) a patient exhibiting choreiform movements, **xix.** 44. **Exhibits Specimens**—(1) abscess of the liver, **x.** 157; (2) cord from a case of locomotor ataxia, **xvii.** 60; (3) scapulæ and humeri showing well-marked Charcot's joint affection, **xvii.** 60; (4) spinal cord and muscles, from a case of pseudo-hypertrophic paralysis, **xvii.** 61; (5) a greatly misshapen liver, the result of waxy disease, **xvii.** 61; (6) photographs of cases of myxœdema, **vii.** 50; **xii.** 143; (7) photographs showing appearance of a case of cerebral syphilis before and after treatment, **xvi.** 81; (8) the phonendoscope, **xvii.** 28.

AINSLIE, DR ALEXANDER C., *elected a member*, **xvii.** 69.

AITCHISON, DR ROBERT S., *elected a member*, **vi.** 56.

AITKEN, DR DAVID W., *elected a member*, **vii.** 1.

ALEXANDER, HUGH DE MAINE, M.D., *elected a member*, **xx.** 197.

ALEXANDER, DR WILLIAM
Original Communication — on the restoration of the apparently drowned, **xi.** 183.

ALEXANDER, DR WILLIAM A. J., *elected a member*, **xv.** 60.

ANDERSON, DR D. H., *elected a member*, **vii.** 49.

ANDERSON, DR FREDERICK T., *elected a member*, **xi.** 99.

ANDERSON, DR JOHN, Pitlochry, *elected a member*, **xvi.** 1.

ANDERSON, PROFESSOR T. M'CALL
Original Communication—on the danger of neglecting and on the best means of controlling the febrile state, **iv.** 187.

ANDREW, DR JAMES
Exhibits—the brain and cord from a boy who died from injury to the sacrum, **iv.** 21.

ANNANDALE, PROFESSOR THOMAS
Original Communications—(1) on some injuries implicating the elbow-joint, **iv.** 42 ; (2) an operation for displaced semilunar cartilage, **iv.** 67 ; (3) on the operative treatment of popliteal aneurism, **v.** 34 ; (4) on compression of the innominate artery, **v.** 69 ; (5) preliminary tracheotomy as an aid to certain operations, **vi.** 71 ; (6) internal derangements of knee-joints, and their treatment by operation, **vi.** 78 ; (7) clinical remarks upon the operative surgery of the male bladder, **vii.** 106 ; (8) on removal by operation of naso-pharyngeal tumours, **viii.** 55 ; (9) case of intussusception in a child three years of age successfully relieved by abdominal section, **viii.** 74 ; (10) on strumous glands, **viii.** 147 ; (11) wry-neck, its varieties and their treatment, **x.** 8 ; (12) intra-cranial surgery, **xiii.** 97 ; (13) operations for misplaced and undescended testicle, **xx.** 11. **Exhibits Patients** — (1) a woman illustrating the successful treatment of cirsoid aneurism, **v.** 66 ; (2) a boy with affection of tibia, **v.** 66 ; (3) a case of cicatricial stricture of œsophagus, **ix.** 82 ; (4) a patient from whom a tumour of the brain had been removed, **xiii.** 125 ; (5) a man after removal of larynx, **xvii.** 1 ; (6) a man after operation for dislocation backwards of head of humerus, **xvii.** 103 ; (7) patient after laminectomy for paralysis, **xx.** 53. **Exhibits Specimens**—(1) large fibroid of the uterus, **xvii.** 7 ; (2) large cystic tumour of the left ovary, **xvii.** 7 ; (3) a dermoid cyst, which contained hair, of the right ovary, all three specimens from the same patient, **xvii.** 7 ; (4) a large urinary calculus, **xvii.** 69 ; (5) oxalate of lime calculus, **xvii.** 69 ; (6) a kidney with renal calculus in position, **xvii.** 69 ; (7) specimen of cancer of the rectum, **xvii.** 69 ; (8) osseous anchylosis of the elbow-joint, **xvii.** 70 ; (9) fracture of lower end of femur, **xvii.** 70 ; (10) fracture of ankle-joint, **xvii.** 70 ; (11) a congenital hernial sac containing a patent Meckel's diverticulum, **xvii.** 108 ; (12) an appendix, **xvii.** 108 ; (13) a ruptured tubal pregnancy, **xvii.** 108 ; (14) a pedunculated papilloma of the bladder, **xvii.** 109 ; (15) parts from an injured elbow, **xvii.** 109 ; (16) seed-like bodies from bursa under deltoid muscle, **xvii.** 109. **Exhibits Instruments**—(1) instruments in connexion with intubation of the air-passages, **viii.** 61 ; (2) a new bone-drill, **viii.** 61.

ARCHIBALD, DR JOHN, *elected a member*, **ii.** 2.

ARMITAGE, DR J. A., *elected a member*, **vi.** 56.

ASK, PROFESSOR C. J., *elected a corresponding member*, **iii.** 141.

B

BAILY, DR EDWIN, *elected a member*, iii. 34.

BAIRSTOW, DR TOM, *elected a member*, iv. 229.

BALFOUR, DR ANDREW, Portobello

Exhibits—a half-penny which had been in stomach for ten months, iii. 6.

BALFOUR, DR ANDREW, Edinburgh, *elected a member*, xv. 13.

BALFOUR, DR GEORGE W.

Original Communications—(1) on arguments in favour of the theory of dilatation of the heart as the cause of cardiac hæmic murmurs, and of the appendix of the left auricle being the primary seat of this murmur, i. 168; (2) note on the position and mechanism of the hæmic murmur, i. 175; (3) valedictory address, iii. 8; (4) on strophanthus, xv. 141; (5) a fit of gout, xvii. 163. **Exhibits Patient**—with aneurism of the ductus arteriosus, i. 68. **Exhibits Specimen**—photograph of a lightning print, and terminal twig of a yew struck by lightning, iii. 6.

BALFOUR, DR J. CRAIG, *elected a member*, iii. 153.

BALFOUR, DR JOHN MACKINTOSH, *elected a member*, x. 27.

Exhibits—patient with complete transposition of viscera, x. 106.

BALLANTYNE, DR HAROLD S., *elected a member*, xix. 21.

BALLANTYNE, DR J. W., *elected a member*, iv. 70.

Original Communications—(1) relations of abdominal viscera in the infant, x. 140; (2) the spinal column in the infant, xi. 71.

BARDSWELL, DR NOEL DEAN, *elected a member*, xx. 75.

BARKER, PROFESSOR FORDYCE, *elected a corresponding member*, iii. 141.

BEATSON, DR GEORGE T., *elected a member*, xv. 1.

Original Communication—on carcinoma of the mamma, xv. 153.

BEDFORD, DR C. H., *elected a member*, viii. 47.

Original Communications—(1) pathology and treatment of furunculosis, x. 174; (2) notes on Indian enteric fever, xi. 270; (3) toxicology in the Punjab, xvi. 24.

BEGG, DR CHARLES, *elected a member*, xix. 55.

Original Communications—(1) on the pathology and successful treatment of chronic tropical diarrhœa (known as sprue), ix. 155; (2) clinical experience with salol in treatment of smallpox, xix. 56.

BELL, DR D. C. BENJAMIN, *elected a member*, viii. 189.

BELL, DR G. J. H., *elected a member*, iv. 1.

BELL, DR JOSEPH

Original Communications—(1) note on rupture of the urethra, i. 3; (2) case of intestinal obstruction treated by opening the abdomen, i. 145; (3) on a rare form of senile gangrene, i. 183; (4) note of a somewhat unusual and complicated case of inguinal hernia, ii. 8; (5) on a

form of loss of memory ; occasionally following cranial injuries, **ii.** 26 ; (6) valedictory address, **xiii.** 3. **Exhibits Patients**—(1) patient with disease of the ankle-joint, **i.** 67 ; (2) patient with paraffin epithelioma of the left hand, **i.** 160 ; (3) a man devoid of sensation over the feet and back of leg and thigh, due to a previous accident, **ii.** 24 ; (4) a young girl with disease of elbow-joint, **ii.** 100 ; (5) a female from whom he had removed a fatty and fibro-cellular tumour of the parotid gland, **iv.** 103 ; (6) a young man on whom he had performed excision of the elbow-joint for injury, **iv.** 38 ; (7) a man suffering from a nævoid tumour of the arm and shoulder, **iv.** 173 ; (8) a young man whose os calcis had been removed three years before, **iv.** 104 ; (9) case of gunshot wound of the forearm, **xv.** 151 ; (10) a boy with congenital dislocation of both hips, **xv.** 120 ; (11) case of temporo-sphenoidal abscess, **xvi.** 124. **Exhibits Specimens**—(1) a loose cartilage from the knee-joint, **i.** 1 ; (2) a cast of deformed hand, **i.** 2 ; (3) a piece of whinstone from the rectum, **i.** 58 ; (4) a foot, **i.** 85 ; (5) a round-celled sarcoma, of an undescended testicle, **i.** 144 ; (6) an encysted calculus, **i.** 162 ; (7) a half tongue removed for cancerous disease, **iii.** 154 ; (8) a giant finger, **iv.** 226 ; (9) a fatty and fibro-cellular tumour of the parotid gland, **iv.** 22 ; (10) half a tongue removed for a papillomatous tumour, **iv.** 225 ; (11) a myeloid sarcoma of the lower jaw, **iv.** 226 ; (12) an adenoid tumour of the male mamma, **iv.** 226 ; (13) biliary calculi removed from the gall bladder, **iv.** 106 ; (14) arm, shoulder and scapula removed for sarcoma, **iv.** 175 ; (15) an exostosis of femur, **iv.** 106 ; (16) a large fibroma removed successfully from the iliac region and pelvis of a man, **vi.** 4 ; (17) two cartridges removed from the head of a boy, **xiii.** 232 ; (18) Röntgen photos of gunshot wound of arm, **xv.** 151 ; (19) brain from a case of subarachnoid hæmorrhage after burn, **xvi.** 65 ; (20) two cases of intussusception, **xvi.** 137 ; (21) a perforated appendix, **xvi.** 136.

BENNET, DR JAMES, *elected a member*, **iii.** 34.

Exhibits Patient—a female child with congenital tumour of the left sterno-mastoid, **v.** 33. **Exhibits Specimen**—a portion of the frontal bone removed by the trephine on account of a punctured fracture, **vi.** 197.

BERRY, DR G. ANDREAS, *elected a member*, **iii.** 34.

Exhibits—patient from whose orbit he had removed the stem of a clay pipe, **ix.** 176.

BERRY, DR RICHARD J. A., *elected a member*, **xii.** 51.

BILLINGS, DR J. S., *elected an honorary member*, **xiv.** 171.

BLACK, DR ALEXANDER, *elected a member*, **iii.** 34.

BLACK, DR W. L.

Original Communication—medical notes and statistics of the British expedition to Egypt in 1801, **ii.** 11.

BLAIKIE, DR R. H., *elected a member*, **ii.** 23.

BODDIE, DR G. P., *elected a member*, **viii.** 22.

Original Communication—relapse or recrudescence in scarlet fever, **x.** 189.

BOOTH, DR WILLIAM, *elected a member*, **vii.** 73.

BORROWMAN, DR PHILIP G., *elected a member*, **xii.** 264.

BOYD, DR F. D., C.M.G., *elected a member*, x. 116.

Original Communications—(1) note on two cases of cerebral hæmorrhage, xi. 163 ; (2) reduplication of the second sound in mitral stenosis, xvi. 46 ; (3) regurgitation at the pulmonary artery, xviii. 41 ; (4) on the work of the Edinburgh Hospital in South Africa, xx. 63. **Exhibits Patients**—(1) case of diphtheria treated by tracheotomy and antitoxin, xiv. 14 ; (2) a case of cretinoid condition, xix. 2 ; (3) a case of syringomyelia, xix. 51 ; (4) a case of double facial paralysis of peripheral origin, xix. 52 ; (5) a case of recovery from peripheral neuritis, xix. 53 ; (6) a patient suffering from pulmonary stenosis, xx. 150. **Exhibits Specimen**—of aneurism of the aorta, xv. 62.

BRAIDWOOD, DR G. B., *elected a member*, viii. 225.

BRAKENRIDGE, DR D. J.

Original Communication—on influenza, ix. 117. **Exhibits Patient**—with lesion of left half of the cervical region of the spinal cord, vii. 217.

BRAMWELL, DR BYROM

Original Communications—(1) case of meningeal cerebral hæmorrhage and meningitis in a case of hæmophilia, v. 164 ; (2) a case of cerebral tumour, vi. 29 ; (3) symptoms of myxœdema and exophthalmic goitre contrasted, x. 126 ; (4) the clinical features of myxœdema, xii. 121 ; (5) a case of sporadic cretinism, xiii. 34 ; (6) cancer of the breasts, spleen, etc., xiii. 74 ; (7) calcareous degeneration of heart and arteries, xv. 97 ; (8) primary sarcoma of liver, xv. 213 ; (9) deep-seated tropical abscesses of the liver, xv. 240. **Exhibits Patients**—(1) patient with heart situated on the right side of the body, and in which the liver remained in its natural position, i. 33 ; (2) patient with tramautic aneurism of the left common carotid, i. 34 ; (3) a patient suffering from disseminated myelitis. v. 174 ; (4) a case of hemiplegia, vi. 1 ; (5) two cases of word-blindness, vi. 226 ; (6) case of sensory Jacksonian epilepsy of the visual cortex, vi. 262 ; (7) case of athetosis, vi. 268 ; (8) case of lead poisoning, vii. 1 ; (9) case of optic atrophy, vii. 74 ; (10) patient suffering from paralysis and anæsthesia of upper extremity, ix. 3 ; (11) case of Friedreich's ataxia, x. 116 ; (12) a case of myxœdema, xii. 149 ; (13) case of psoriasis, xii. 238 ; (14) three cases of pseudo-hypertrophic paralysis, xiii. 232 ; (15) a case of acromegaly in a giantess, xiii. 13 ; (16) a case of psoriasis treated by thyroid feeding, xiii. 31 ; (17) cases of lupus treated by thyroid feeding, xiii. 31, 33, 63, 175, and 232 ; (18) a case of ichthyosis under thyroid treatment, xiii. 176 ; (19) three cases of paralysis. xiv. 58 ; (20) case of congenital syphilis, xiv. 60 ; (21) case of general paralysis of insane, xvi. 2 ; (22) case of progressive muscular atrophy, xvii. 104 ; (23) case of tabetic club-foot, xvii. 105 ; (24) case of aneurism of thoracic aorta, xvii. 107 ; (25) case of early tabes, xx. 6 ; (26) cases of locomotor ataxia, xx. 19, 45 ; (26) a peculiar case of muscular atrophy, xx. 146 ; (27) case of syringomyelia, xx. 147 ; (28) case of aneurism of thoracic aorta, xx. 43. **Exhibits Specimens**—(1) two photographs of a man's hand suffering from injury to the ulnar nerve, i. 34 ; (2) microscopic preparation of tubercle bacillus, ii. 37 ; (3) two preparations of tubercle of the choroid, ii. 37 ; (4) sections of spinal cord showing degeneration, ii. 59 ; (5) sections of spinal cord of a child, æt. three weeks, ii. 59 ; (6) drawings of tubercle of choroid, ii. 37 ; (7) drawings of spinal cord, ii. 59 ; (8) drawings of cord from a child, æt. three weeks, ii. 59 ; (9) microscopic sections and drawings of (*a*) congenital malformation of the gray matter in the upper cervical region, iii. 37 ; (*b*) a multipolar nerve cell with two nuclei, iii. 37 ; (*c*) sections of the cord in a case of myelitis, iii. 38 ;

(*d*) a transverse section of the cord, with central canal obliterated, **iii.** 57 ; (*e*) a transverse section of the cord in lumbar region in tubercular meningitis, **iii.** 57 ; (*f*) a section through the spinal cord in a case of spinal miningeal hæmorrhage, **iii.** 57 ; (10) an aneurism of the thoracic aorta, **iv.** 227 ; (11) the heart from a case of endocarditis, **iv.** 21 ; (12) two lungs containing patches of pulmonary apoplexy, **iv.** 2 ; (13) microscopic sections and drawings from a case of endocarditis, **iv.** 180 ; (14) sections and drawings of brain from a case of endocarditis, **iv.** 227 ; (15) section of cord in amyloid degeneration, **iv.** 227 ((16) photograph of human brain and medulla oblongata, **iv.** 227 ; (17) a series of microscopical preparations, drawings, and photographs illustrative of a remarkable lesion of the nerve centres in leucocythæmia, **v.** 118 ; (18) also of calcareous degeneration of the cerebral blood-vessels, **v.** 118 ; (19) a photograph showing atrophy of muscles of arm, **v.** 174 ; (20) two specimens of aneurism of arteries of brain, **v.** 118 ; (21) a photograph of a cyclopean fœtus, **v.** 182 ; (22) an aneurism of carotid artery, **v.** 186 ; (23) specimens of Charcot's miliary aneurism, **v.** 186 ; (24) aneurism of cerebral artery, **vi.** 2 : (25) renal calculus, **vi.** 266 : (26) a perforating ulcer of foot, **vi.** 266 ; (27) portion of intestine from a case of strangulation, **vi.** 266 ; (28) photographs of ophthalmoplegia externa acuta, **vi.** 2 ; (29) photograph of hand of same patient, **vi.** 2 ; (30) photographs of tumour of pituitary body, **vi.** 2 ; (31) cardiograms and sphygmograms from a case of aortic regurgitation, **vi.** 271 ; (32) photographs, microscopic sections and drawings of cerebral syphilis, **vi.** 271 ; (33) cast of thoracic aneurism, **vii.** 74 ; (34) photographs of the brain in a case of cancer of the cerebellum, **vii.** 74 ; (35) specimen of milk-like urine, **vii.** 229 ; (36) brain from a case of perforating tumour of skull, **ix.** 3 ; (37) also photographs of the patient and specimen, **ix.** 3 ; (38) two cases of brain tumour, **x.** 116 ; (39) photograph of facial hemiatrophy, **x.** 117 ; (40) drawings, photographs, and temperature charts illustrating the clinical features of myxœdema, **xii.** 132 ; (41) gives lantern demonstration of microscopic specimens from a case of syringomyelia, **xiii.** 223 ; (42) exhibits drawings of a case of ichthyosis under thyroid treatment, **xiii.** 63 ; (43), exhibits a skull from a case of congenital syphilis, **xiv.** 60 ; (44) exhibits water-colour drawings of congenital syphilis, **xiv.** 60 : (45) water-colour drawings and photos of a case of anæsthetic leprosy, **xv.** 111 ; (46) water-colour drawings of a case of cancer of the liver. **xv.** 111 ; (47) photos and drawings of a gliomatous tumour, **xv.** 112 ; (48) gives lantern demonstration of muscles, spinal cord and nerves in cases of pseudo-hypertrophic paralysis and myopathic muscular atrophy, **xvi.** 14 ; (49) tumour of the right frontal lobe, **xx.** 9 ; (50) a large glioma of the right motor area, **xx.** 27 ; (51) skull from a case of Jacksonian epilepsy, **xx.** 28.

BRAMWELL, DR EDWIN, *elected a member*, **xx.** 1.

Original Communication—on myasthenia gravis, **xx.** 116.

BREWIS, DR N. T., *elected a member*, **v.** 132.

BRISTOWE, DR J. SYER, *elected a corresponding member*, **iii.** 141.

BROWN, DR ANDREW, *elected a member*, **iv.** 1.

BROWN, DR GRAHAM

Original Communications—(1) on the innervation of the bronchi, **iv.** 183 ; (2) on the perigraph, **xvi.** 109. **Exhibits Patients**—two cases of bulbar paralysis, **xviii.** 67. **Exhibits Specimens**—(1) a carcinomatous uterus, **i.** 35 ; (2) a metal shoe button which had formed the nucleus of a rhinolith, **xv.** 58 ; (3) the perigraph, **xvi.** 109.

BROWN, DR J. MACDONALD, *elected a member*, iii. 34.
Original Communication—the etiology of rickets, iv. 205. **Exhibits Specimens**—two clamps for enterectomy, iii. 57.

BROWN, DR J. MURDOCH, *elected a member*, v. 20.

BROWN-SEQUARD, PROFESSOR, *elected an honorary member*, iii. 141.

BROWN, DR WILLIAM, death of, the last of the original members, vi. 75.

BRUCE, DR ALEXANDER, *elected a member*, ii. 37.
Original Communications—(1) tumour of the left temporo-sphenoidal lobe, ii. 94; (2) chronic poisoning by bisulphide of carbon, iii. 145; (3) pathological report on a case of carcinoma of supra-renal capsules and lungs, ix. 70; (4) on syphilitic nodose periarteritis, xiii. 190; (5) rupture of an aortic aneurism into superior vena cava, xiv. 60; (6) on diabetic neuritis, xv. appendix, 53; (7) the endogenous fibres in the lumbo-sacral region of the cord, xvi. 198; (8) drainage through the fourth ventricle in a case of acquired hydrocephalus, xvii. 73; (9) localisation and symptoms of disease of the cerbellum, xviii. 85; (10) case of cerebellar tumour, xviii. 207; (11) paralysis of vertical, with conservation of lateral conjugate movements of both eye-balls, xix. 206. **Exhibits Patients**—(1) case of facial paralysis, ii. 100; (2) two cases of facial and other nerve paralysis, x. 211; (3) case of myxœdema, xii. 151; (4) case of aphasia, xviii. 205; (5) case of infantile paralysis, xix. 44; (6) case of convulsive tremor or myoclonus multiplex, xix. 44; (7) case of injury of the last dorsal, xix. 44; (8) case of muscular atrophy of the Charcot-Marie type, xix. 44; (9) case of disseminated sclerosis, xix. 71; (10) a patient after laminectomy for paralysis, xx. 53; (11) case of paralysis of brachial plexus, xx. 146; (12) case of sclerosis of the cerebro-spinal type, xx. 146. **Exhibits Specimens**—(1) tumour of dura mater, ii. 101; (2) a new form of galvanic battery, iii. 207; (3) a microtome for cutting sections of large organs, iv. 227; (4) microscopic sections of tubercular ulcer of tongue, v. 185; (5) a brain from a case of meningitis, vi. 56; (6) specimen of diphtheric membrane of bladder and urethra, vii. 155; (7) drawing of the same, vii. 155; (8) Leiter's endoscope, vii. 228; (9) a distended gall-bladder obstructed by malignant tumour of the duodenum, viii. 34; (10) a carcinoma of the liver, viii. 47; (11) two specimens of melanotic sarcoma of the liver, viii. 47; (12) a series of painted casts of pathological specimens in Cathcart's medium, viii. 193; (13) drawing of an aneurism of thoracic aorta, with false aneurism of the lung, ix. 65; (14) gives lantern demonstration of preparations from a case of syringomyelia, xiii. 223; (15) specimens of anchylostoma duodenale, xiii. 15; (16) a cholesteatoma, xiii. 69; (17) microscopic specimens of anchylostoma, xiii. 15; (18) embryo of filaria medinensis, xiv. 200; (19) a specimen of aneurism perforating superior vena cava, xiv. 40; (20) a new sliding microtome, xiv. 5; (21) gives lantern demonstrations of (*a*) descending tract in posterior columns of cord, xvi. 10; (*b*) of endogenous fibres in the lumbo-sacral region, xvi. 198; (22) specimen of pachymeningitis hæmorrhagica, xvi. 212; (23) specimens of rare intestinal parasites, xvi. 211; (24) unique specimen of amyloid disease of spleen, xvi. 71; (25) two cases of intussusception, xvi. 137; (26) a perforated appendix, xvi. 136; (27) microscopic sections illustrating (*a*) congenital hydrocephalus and spina bifida, xvi. 70; (*b*) progressive muscular atrophy, xvi. 70; (*c*) syringomyelia, xvi. 71; (28) hæmorrhage into the middle lobe of the cerebellum, xvii. 59: (29) from two cases of

carbolic acid poisoning, **xvii.** 60; (30) medulla oblongata from a case of syringomyelia, **xvii.** 60; (31) cord from a case of locomotor ataxia, **xvii.** 60; (32) scapulæ and humeri showing well marked Charcot's joint affection, **xvii.** 60; (33) spinal cord and muscles from a case of pseudo-hypertrophic paralysis, **xvii.** 61; (34) aneurism that had ruptured into the left bronchus. **xvii.** 71; (35) life-size cast and photograph of a case of achondroplasia, **xvii.** 186; (36) sections from basal ganglia and medulla from cases of hemiplegia, **xvii.** 186; (37) a series of sections made from the various organs in the rare disease diabète bronzé, **xvii.** 187; (38) specimens of amyotrophic lateral sclerosis and of progressive muscular atrophy, **xviii.** 205; (39) brain from a case of aphasia, **xix.** 193; (40) a greatly dilated heart, **xx.** 106; (41) photographs and microscopic specimens illustrating progressive muscular atrophy, sclerosis, and glioma of the Pons Varolii, **xx.** 154.

BRUCE, DR LEWIS C., *elected a member*, **xiv.** 57.

Original Communications—(1) dual brain action, **xvi.** 114; (2) the general blood pressure in sleeplessness and sleep, **xix.** 156; (3) clinical and experimental observations upon general paralysis, **xx.** 171.

BRUNTON, SIR THOMAS LAUDER, *elected an honorary member*, **xix.** 152.

BRYCE, DR

Exhibits—a man suffering from chronic poisoning by bisulphide of carbon, **v.** 151.

BUCHAN, DR ALEXANDER HILL, *elected a member*, **xix.** 21.

BUIST, DR J. B.

Exhibits Specimens—(1) the thoracic viscera with malignant stricture of œsophagus, **i.** 19; (2) the heart and brain from a case of apoplexy, **i.** 69.

BUNTING, DR WILLIAM HARLEY, *elected a member*, **xx.** 2.

C

CADELL, DR FRANCIS

Original Communications—(1) the treatment of syphilis, **i.** 9; (2) cases of stricture of the urethra, **i.** 162; (3) on the treatment of warts of the genitals by chromic acid, **ii.** 72. **Exhibits Patient**—with large hairy mole on cheek, **ii.** 25.

CAIRD, MR F. M., *elected a member*, **ii.** 23.

Original Communications—(1) on a tumour of the testicle, **iv.** 275; (2) the shoulder-joint in relation to certain dislocations and fractures, **vi.** 6; (3) treatment of gangrenous bowel in strangulated hernia, **ix.** 26; (4) note on the treatment of cold abscess, **ix.** 198; (5) on amputation in cases of gangrene of the lower extremity, **xii.** 196; (6) on a case of gastrostomy and on hypodermic alimentation, **xii.** 249; (7) on gastrostomy after the method of Witzel, **xiii.** 26; (8) on resection and suture of the intestine, with cases, **xiv.** 274; (9) on the treatment of ununited fracture by passive congestion, **xiv.** 11: (10) on a case of renal tumour, **xvi.** 180; (11) case of ruptured femoral aneurism for which the common femoral artery was tied, **xix.** 75; (12) operative interference in cases of stricture of large intestine, **xx.** 158. **Exhibits Patients**—(1) case of resection for empyema, **vi.** 76; (2) case of successful skin grafting,

viii. 167 ; (3) case of paralysis of serratus magnus, **viii.** 178 ; (4) case of successful transportation of bone after compound fracture, **viii.** 225 ; (5) case of recovery after amputation for spreading gangrene, **ix.** 196 ; (6) case of removal of the metacarpal of the thumb for epithelioma, **x.** 212 ; (7) case of excision of exophthalmic goitre, **x.** 213 ; (8) case of epithelial grafting after Thiersch's method, **x.** 213 ; (9) a boy who had a severe head injury, **xi.** 126 ; (10) case of Chopart's amputation, **xi.** 126 ; (11) two cases of thyroidectomy, **xi.** 146 ; (12) case of transverse fracture of olecranon, treated by being *wired*, **xi.** 167 ; (13) case of appendicitis after operation, **xii.** 211 ; (14) case of Charcot's disease in both knees, **xiii.** 33 ; (15) two cases trephined for injury, **xiii.** 127 ; (16) two patients after recovery from tracheotomy for diphtheria, **xiii.** 180 ; (17) case of gastrostomy illustrating method of Witzel, **xiii.** 13 ; (18) two cases exemplifying amputation of the leg after the method of Bier, **xiii.** 2 ; (19) a patient after removal of appendix, **xiv.** 57 ; (20) two cases after resection of gut, **xiv.** 58 ; (21) a boy under treatment for ununited fracture by congestion method, **xiv.** 5 ; (22) case of middle-ear disease, **xv.** 50 ; (23) case after operation for pyloric stenosis and dilatation of stomach, **xv.** 50 ; (24) case of ruptured urethra, **xv.** 60 ; (25) case of injury to the humerus, **xv.** 51 ; (26) case of hip-joint disease, **xv.** 109 ; (27) case of excessive exophthalmos, **xvi.** 125 ; (28) case after œsophagostomy, **xvi.** 62 ; (29) case after gastrostomy, **xvi.** 125 ; (30) case after gastro-jejunostomy, **xvi.** 2 ; (31) case after excision of pylorus, **xvi.** 2 ; (32) case of double orchectomy, **xvi.** 61 ; (33) case after removal of the penis, **xvi.** 125 ; (34) case of amputation of upper extremity with shoulder girdle, **xvi.** 62 ; (35) case after excision of three inches of rectum, **xviii.** 64 ; (36) case of recurring appendicitis, **xviii.** 64 ; (37) case of extensive destruction of face from syphilis, **xviii.** 84 ; (38) case after pylorectomy, **xviii.** 185 ; (39) case after gastro-enterostomy, **xviii.** 185 ; (40) case of syphilis, **xviii.** 197 ; (41) four cases of pyloric obstruction treated by gastro-jejunostomy, **xx.** 61 ; (42) two patients illustrating certain points in the diagnosis of gastric carcinoma, **xx.** 148. **Exhibits Specimens**—(1) a knee-joint in section, **iii.** 187 ; (2) a series of specimens of diseases of the testicle, **iv.** 51 ; (3) a second series of entire sections of diseased testicles, **iv.** 275 ; (4) a naso-pharyngeal tumour, **vi.** 266 ; (5) Parker's tracheotomy tube, **vii.** 228 ; (6) specimen with artificial anus on one side and hernia on the other, **viii.** 47 ; (7) coloured drawings of symmetrical gangrene of the extremities, **viii.** 167 ; (8) a urethral calculus, **x.** 76 ; (9) preparation from a case of infantile hernia, **x.** 118 ; (10) two abdominal aneurisms, **x.** 213 ; (11) drawing from a case of infantile hernia, **x.** 118 ; (12) specimens illustrating intestinal surgery, **xii.** 214 ; (13) preparations illustrative of cerebral surgery, **xiii.** 161 ; (14) specimens illustrating tracheotomy and diphtheria, **xiii.** 180 ; (15) water-coloured drawings from cases of resection of gut, **xiv.** 58 ; (16) demonstrates with the lantern the pathology of the appendix vermiformis, **xv.** 141 ; (17) a perforation of stomach, **xv.** 121 ; (18) a portable steriliser for instruments, **xv.** 60 ; (19) five specimens from ileo-cæcal region, **xvi.** 74 ; (20) a preparation in Jores' fluid of a sarcoma of the thigh, **xvii.** 68 ; (21) result of excision and suture of gut for carcinoma, **xviii.** 79 ; (22) drawings and preparations illustrating large multiple pedunculated mesenteric cysts, **xviii.** 194 ; (23) map of cicatrix and subcutaneous tissue containing a small nodule of carcinoma, **xviii.** 194 ; (24) cystic tumour of testicle, **xviii.** 195 ; (25) malignant degeneration of a uterine fibroid, **xviii.** 195 ; (26) a metal needle and suture box, **xviii.** 83 ; (27) two small sequestra from the hard palate and upper jaw, **xix.** 73 ; (28) extensive syphilitic necrosis of frontal and parietal bones, **xix.** 73 ; (29) vesical calculi (one half a pound), **xx.** 154 ; (30) a large papilloma of the bladder, **xx.** 154 ; (31) two small papillomata of the bladder, **xx.** 154.

CALDER, DR HUGH L., *elected a member*, iii. 141.

CAMERON, DR JAMES, *elected a member*, xiv. 57.
Exhibits Patients—(1) with complete necrosis of frontal bone, xviii. 132; (2) case of adiposis dolorosa, xix. 152. **Exhibits Specimens**—(1) Prof. Wright's sedimentation tubes, xvi. 143; (2) specimens of typhoid vaccine, xvi. 140.

CAMPBELL, DR W. WATSON
Original Communication—on diphtheria, v. 142. **Exhibits Specimens**—two Peyer's glands passed *per anum*, ii. 11.

CARMICHAEL, DR EDWARD, *elected a member*, vi. 224.
Exhibits—a patient with a hypertrophic condition of integuments, xx. 147. **Exhibits Specimens**—(1) aneurism of the aorta with rupture into the right ventricle, xiii. 221; (2) sarcoma of skull, xiv. 245.

CARMICHAEL, DR JAMES
Original Communications—(1) on some of the sequelæ of acute infectious diseases in children, i. 24; (2) tonsillar disease in children, iii. 188; (3) the bronchial catarrh of children, v. 193; (4) on chronic basal meningitis, xvi. 232; (5) acute pneumonia of childhood, xvii. 148. **Exhibits Patients**—(1) a girl suffering from facial paralysis, iv. 137; (2) girl suffering from noma, v. 1; (3) case of hemiparesis, vi. 261; (4) two cases who had suffered from pleuritic effusion, viii. 121; (5) a boy with heart on the right side, xii. 237; (6) patient treated by aspiration for pleuritis with purulent effusion, xiii. 220; (7) case of chronic peritonitis, xv. 118; (8) a girl with extreme general muscular feebleness, xv. 138; (9) case of rickety pseudo-paralysis, xvii. 57; (10) case of infantile paralysis, xvii. 58; (11) case of hemiplegia, xvii. 58; (12) case of muscular sclerosis, xvii. 182. **Exhibits Specimens**—(1) tumours from brain of a child, i. 2; (2) brain and lungs from a case of tuberculosis, ii. 60; (3) lungs and other organs from a case of acute tuberculosis, ii. 60; (4) the larynx of a child, iii. 155; (5) the brain of a girl showing abscesses in it, iv. 39; (6) maxillary bones from a case of noma, v. 3; (7) mesenteric glands and large intestine from a case of tabes mesenterica, v. 3; (8) lung from a case of pulmonary hæmorrhage, v. 122; (9) a rachitic spleen, v. 133; (10) thoracic and abdominal organs from a case of tuberculosis, v. 153; (11) brain of a child who had died from meningitis, vi. 113; (12) an ointment of salicylic acid, lanoline and eucalyptus oil, vi. 266; (13) samples of glycerites, ix. 3; (14) portion of lung and œsophagus, xii. 19; (15) temporal bone from a case of septic thrombosis, xiii. 18; (16) a case of double intussusception of intestine, xv. 2; (17) brain from a case of basal meningitis, xvi. 198.

CARMICHAEL, DR WILLIAM, *elected a member*, xx. 2.

CARRUTHERS, DR DAVID ALLAN, *elected a member*, xx. 61.

CARRUTHERS, DR S. W., *elected a member*, xviii. 131.

CATHCART, MR C. W., *elected a member*, ii. 37.
Original Communications—(1) that the lateral movement of the ulna in pronation and supination takes place at the elbow-joint, iv. 219; (2) artificial legs, should partial foot amputation be abandoned? vii. 15; (3) sites for amputation in the lower limb in relation to artificial substitutes, viii. 63; (4) the place of systematic lectures in the teaching of medicine and surgery, ix. 91: (5) on the quenching of thirst after

abdominal operations, **xii.** 262 ; (6) peritonitis as a cause of peristalsis of rectum, **xviii.** 138. **Exhibits Patients**—(1) a man suffering from firm anchylosis of the shoulder-joint, **iv.** 222 ; (2) two cases of partial foot amputation, **vii.** 2 ; (3) case of Colles' fracture, **vii.** 153 ; (4) case of traumatic cyst of pancreas, rupture after hypodermic puncture, laparotomy, recovery, **ix.** 73 ; (5) two cases of laparotomy, **xii.** 90 ; (6) one who had been operated on for brain abscess, **xiii.** 125 ; (7) one in whom the mastoid had been trephined, **xiii.** 125 ; (8) two cases of the removal of the vermiform appendix for acute appendicitis, **xiii.** 231 ; (9) two cases illustrating ulcerative forms of secondary syphilis, **xiv.** 39 ; (10) two young men with venereal warts, **xiv.** 200 ; (11) successful case of removal of large tumour from head, **xiv.** 1 ; (12) case of tertiary syphilis, **xv.** 179 ; (13) case after operation for perforated gastric ulcer, **xvi.** 195 ; (14) case of rodent ulcer of groin, **xvi.** 128 ; (15) a girl after operation for intussusception, **xvii.** 180 ; (16) a patient after operation for ruptured tubal pregnancy, **xvii.** 181 ; (17) case of goitre, **xviii.** 35 ; (18) case of recovery after ruptured vermiform appendix, **xviii.** 196 ; (19) a lad from whom he had removed the cœcum and portions of the ileum, **xix.** 71 ; (20) a boy after laparotomy for intestinal obstruction, **xix.** 153 ; (21) a woman after excision of bowel for gangrene, **xix.** 154. **Exhibits Specimens**—(1) cast of a giant finger, **iv.** 226 ; (2) specimens of casts made by a new material, **iv.** 273 ; (3) an epithelioma of the sublingual gland, **vi.** 192 ; (4) an adaptation to the silver catheter, **vi.** 198 ; (5) support for nasal bones, **vii.** 51 ; (6) a bladder filled with a clot of blood, **viii.** 123 ; (7) a cast of a portion of invaginated bowel, **viii.** 123 ; (8) an apparatus for sterilizing steel instruments by steam without rusting them, **ix.** 180 ; (9) a case of minor operation instruments, **xii.** 238 ; (10) a milk sterilizer, **xiv.** 40 ; (11) a Sprengel pump for drainage of bladder, **xiv.** 60 ; (12) gelatine casts of warts on female genitals, **xiv.** 60 ; (13) photographs of a copaiva rash, **xiv.** 60 ; (14) depressed fracture of skull, **xv.** 110 ; (15) sarcoma of lung, **xv.** 110 ; (16) specimen of hydronephrosis, **xv.** 111 ; (17) elephantiasis of labium majus, **xv.** 110 ; (18) a grooved catheter, **xv.** 111 ; (19) O'Dwyer's and Colin's patterns of intubation instruments, **xv.** 230 ; (20) a plaster cast of arm and dislocation of elbow, **xv.** 110 ; (21) parotid tumours hardened in formalin, **xvi.** 40 ; (22) scirrhus of the breast, **xvi.** 39 ; (23) catgut rolled in balls, **xvi.** 177 ; (24) a suppurating hydatid cyst, **xvii.** 7 ; (25) epithelial tumour, **xvii.** 64 ; (26) two vermiform appendices, **xvii.** 65 ; (27) a leg injected after amputation for senile gangrene of the great toe, **xvii.** 66 ; (28) specimen of multiple gastric ulcer, **xvii.** 183 ; (29) strangulated hernia, **xviii.** 40 ; (30) multiple cerebral abscess, **xviii.** 77 ; (31) abdominal aneurism, **xviii.** 78 ; (32) multiple gastric ulcer, **xviii.** 195 ; (33) a microtome, **xviii.** 82 ; (34) a clinical research case, **xviii.** 137 ; (35) specimen of a portion of sigmoid flexure, **xix.** 155 ; (36) a surgical operating case, **xix.** 155 ; (37) gives a demonstration of the advantage of having gauze dressings rolled in the form of balls, **xix.** 74.

CATTANACH, DR JAMES G., *elected a member*, **xiv.** 171.
Exhibits—a specimen of sarcoma of lung, **xv.** 111.

CAVERHILL, DR T.F.S., *elected a member*, **iii.** 34.
Exhibits Patient—case of Addison's disease, **viii.** 146. **Exhibits Specimen**—brain and skull from a case of gunshot injury, **vii.** 98.

CHIENE, MR GEORGE LYALL, *elected a member*, **xx.** 106.
Original Communication—the Edinburgh Hospital in South Africa and its work, **xx.** 63.

CHIENE, PROFESSOR JOHN, C.B.

Original Communications—(1) on cranial injuries, **i.** 69 ; (2) germs and the spray, **iii.** 217 ; (3) hospital experiences, **viii.** 179 ; (4) on lameness after hip-joint disease, **ix.** 166 ; (5) experiences with the medical department of the army in South Africa, **xx.** 30. **Exhibits Patients**—(1) a woman on whom he had performed œsophagostomy, **iv.** 20 ; (2) a patient who had been trephined, **iv.** 270 ; (3) a man who stated that he had swallowed a half-sovereign, **iv.** 271 ; (4) a patient on whom he had performed laparotomy, **iv.** 269 ; (5) case of old dislocation of the hip-joint into the sciatic notch, **ix.** 163 ; (6) case of brain compression, **ix.** 163 ; (7) patient with unilateral enlargement of the bones of the face and anterior cranium, **xiii.** 231 ; (8) two patients with osseous deformity, **xviii.** 62. **Exhibits Specimens**—(1) indiarubber catheter removed from a bladder, **i.** 34 ; (2) Fergusson's mechanical tongue-depressor, **i.** 69 ; (3) a calculus from a boy, **iii.** 142 ; (4) an ovary removed from the inguinal region of a child, **iii.** 143 ; (5) a photograph of chair which belonged to John Hunter, **iii.** 144 ; (6) the preparations in the Surgical University Museum illustrating foreign bodies in the pharynx, œsophagus, and air passages, **iv.** 270 ; (7) calculus removed by nephro-lithotomy, **iv.** 22 ; (8) a series of sarcomatous tumours of the lower extremity, **iv.** 178 ; (9) catalogue of the Surgical Museum in the University, **iv.** 271 ; (10) recent additions to the Surgical Museum of the University, **vi.** 264 ; (11) the bacillus of scarlatina and cultivations, **vi.** 265 ; (12) an uncontracted blood-clot, **vii.** 154 ; (13) a series of urinary calculi, **viii.** 23 ; (14) a series of tumours, **viii.** 23 ; (15 tubercular testes, **viii.** 24 ; (16) brain with abcess in frontal lobe, **viii.** 24 ; (17) a perforating ulcer of locomotor ataxy, **viii.** 24 ; (18) radical cure of inguinal hernia, **viii.** 24 ; (19) hammer toe, **viii.** 24 ; (20) fragments of bone from lower jaw, **viii.** 25 ; (21) pea coughed up from lungs and a whistle which had been twelve days in bowel, **viii.** 24 ; (22) sections of fibro-cellular tumour, a healing ulcer, and hard chancre, **viii.** 25 ; (23) tumour from anterior wall of bladder, **ix.** 165 ; (24) three urinary calculi and middle lobe of prostate, **ix.** 166 ; (25) Schall's chloride of silver battery, **ix.** 166 ; (26) large urinary calculus from pelvis of kidney, **xvii.** 62 ; (27) biliary calculi, **xvii.** 62 ; (28) a biliary calculus which caused complete obstruction, **xvii.** 62 ; (29) a case of abdominal contents in a fatal case of obstruction, **xvii.** 63.

CHRISTISON, Bart., SIR ROBERT, minute regarding his decease, **i.** 57.

CHURCH, DR H. M.

Original Communications—(1) a case of Addison's disease at an unusually early age, **iii.** 84 ; (2) a case of poisoning by corrosive sublimate, **vi.** 14. **Exhibits Specimens**—(1) supra-renal capsules and kidneys from a case of Addison's disease, **iii.** 69 ; (2) a stud which had passed through the alimentary canal, **iii.** 145 ; (3) a bottle of poison, **vi.** 3.

CLARK, BART., SIR ANDREW.

Original Communication—on catheter fever, **iii.** 87.

CLARK, DR JAMES A., *elected a member*, **xii.** 264.

CLARKSON, DR A. R. D., *elected a member*, **xv.** 94.

Exhibits—a brain from a child who died from abscess of the left lateral lobe, **xi.** 250.

CLOUSTON, DR. T. S.

Original Communications—(1) on alternation, periodicity, and relapse in mental diseases, **i.** 123 ; (2) the position of the medical profession in regard to certificates of mental unsoundness and civil incapacity, **iv.** 72 ; (3) valedictory address, **xv.** 3 ; (4) gives a lantern demonstration of the microscopic pathological changes found in the brain, and its membranes in insanity, **xiii.** 176. **Exhibits Patient**—a young woman who had recovered from prolonged insanity under treatment with thyroid extract, **xiv.** 199.

COLDSTREAM, DR A. R.

Exhibits—trachea and larynx of a child, **i.** 1.

COTTERILL, MR J. M.

Original Communications—(1) case of intra-tracheal tumour, **v.** 134 ; (2) on the condition of stiff great toe in adolescents, **vi.** 277 ; (3) two epidemics of sore throat and their relation to the milk supply, **vii.** 220 ; (4) case of cure by resection of case of fœcal fistula, **viii.** 25 ; (5) on a method of trephining, **xiv.** 5 ; (6) case of cerebellar tumour, **xviii.** 207 ; (7) case of multiple tumours, **xx.** 18. **Exhibits Patients**—(1) case of talipes equino-varus cured by osteotomy, **iv.** 70 ; (2) a young girl from whose trachea he had removed a tumour, **v.** 66 ; (3) a boy who had been operated on for intussusception, **vi.** 2 ; (4) a case of recovery from traumatic tetanus, **vi.** 2 ; (5) case of compound comminated fracture of upper and lower jaws, **vi.** 77 ; (6) a case of hydrocele, **vii.** 97 ; (7) case of congenital deformity of both forearms, **xii.** 169 ; (8) case of recovery of function after gunshot wound, **xii.** 190 ; (9) patients operated on, for (*a*) genu valgum, **xiii.** 1 ; (*b*) excision of tongue, **xiii.** 175 ; (*c*) excision of larynx, **xiii.** 175 ; (*d*) intussusception of colon, **xiii.** 175 ; (10) a patient from whom he had removed a large tumour involving the frontal bone, **xiv.** 1 ; (11) lateral spina bifida. **xv.** 49 ; (12) case of actinomycosis, **xv.** 50 ; (13) case of leucoplakia, **xv.** 95 ; (14) case of plexiform angioma, **xv.** 108 ; (15) case after removal of pancreatic cyst, **xv.** 48 ; (16) case after gastro-enterostomy, **xvi.** 208 ; (17) case after enterectomy, **xvi.** 209 ; (18) a case of multiple lipomata, **xvii.** 57 ; (19) patient after operation for mastoid disease, **xviii.** 110 ; (20) a patient after laminectomy for paralysis of two years' standing, **xix.** 136 ; (21) a case of rodent ulcer being treated by X-rays, **xx.** 151 ; (22) a case of elbow-joint affection in a hæmophilic patient, **xx.** 151. **Exhibits Specimens**—(1) a papilloma of the larynx, **v.** 67 ; (2) two specimens of epithelioma of rectum, **v.** 133 ; (3) portion of ribs resected in a case of empyema, **v.** 185 ; (4) portions of ribs resected for empyema, **vi.** 76 ; (5) tumour of the bladder, **vi.** 264 ; (6) fibrinated condition of synovial membrane of knee-joint, **vi.** 264 ; (7) part of the femoral artery, **vi.** 264 ; (8) specimen of large intestine, **vii.** 219 ; (9) instruments for operation of cleft palate, **vii.** 98 ; (10) a perforated vermiform appendix, **viii.** 25 ; (11) specimen from a case of cerebral abscess, **xii.** 195 ; (12) photograph of cerebral abscess, **xii.** 195 ; (13) parts removed from a case of carcinoma of throat, **xiii.** 17 ; (14) instruments for throwing down a large flap of bone from the cranium, retaining its connexion with skin and pericranium, **xiii.** 162 ; (15) epithelioma of larynx, **xv.** 95 ; (16) specimen after enterectomy, **xvi.** 138 ; (17) large vulvar cyst, **xvi.** 212 ; (18) sarcomatous tumour of bladder, **xvi.** 139 ; (19) specimen of ulcer of forearm, **xvi.** 139 ; (20) photograph of large vulvar cyst, **xvi.** 212 ; (21) a fibrous stricture from the large intestine, **xvii.** 27 ; (22) a perforated vermiform appendix, **xvii.** 27 ; (23) cylindroma of base of skull, **xvii.** 63 ; (24) malignant pustule, **xvii.** 64 ; (25) large oxalate of lime calculus, **xvii.**

98 ; (26) Meckel's diverticulum, **xvii.** 98 ; (27) a tumour, a glio-sarcoma, **xviii.** 37 ; (28) three sarcomatous tumours, **xviii.** 38 ; (29) a piece of transverse colon, **xviii.** 114 ; (30) ovarian cyst, **xviii.** 207 ; (31) a sarcoma of the brain, **xix.** 54 ; (32) an intra-muscular fatty tumour, **xix.** 54 ; (33) a very large urethral calculus, **xix.** 54 ; (34) a new form of trephine, **xix.** 74.

CRAIG, DR JOHN, *elected a member*, **xx.** 2.

CRAIG, DR WILLIAM
Original Communications—(1) on the early publications of the Medico-Chirurgical Society of Edinburgh, **iii.** 38 ; (2) case of malformation in a male child, **iii.** 69 ; (3) case of a full-grown male fœtus exhibiting the malformation of a cyclops, **v.** 178. **Exhibits Specimens**—(1) a renal calculus, **i.** 145 ; (2) a collection of new and rare drugs, **iii.** 3 ; (3) a pathological specimen illustrating the rectum ending in the urethra, **iii.** 5 ; (4) specimen of sarcoma of the ribs, liver, and lungs, **iv.** 39 ; (5) a cyclopean fœtus, **v.** 6.

CRAIG, DR WILLIAM, Cowdenbeath, *elected a member*, **xiii.** 97.

CREASE, JAMES ROBERTSON, *elected a member*, **iv.** 162.

CROMBIE, DR J. FRANK, *elected a member*, **xvi.** 207.

CROOM, SIR JOHN HALLIDAY
Original Communications—(1) on some points in the technique of laparotomy, **ix.** 52 ; (2) recent work in abdominal surgery, **x.** 76 ; (3) massage, **xiii.** 202.

CULLEN, DR G. MATHESON, *elected a member*, **xi.** 167.
Exhibits Specimen—of duodenal ulcer, **xvi.** 178.

CUMMING, DR A. S., *elected a member*, **iv.** 20.

CUMMING, DR JOHN, *elected a member*, **xiii.** 180.

CUNYNGHAME, DR BLAIR
Exhibits Patient—a boy suffering from pseudo-hypertrophic paralysis, **i.** 84. **Exhibits Specimens**—(1) brain from a case of acute hydrocephalus, **i.** 86 ; (2) for Mr Lawson Tait, specimens of diseases of the Fallopian tubes and ovaries, "pyosalpinx," **iii.** 36.

D

DARLING, DR T. BROWN, *elected a member*, **vi.** 75.

DARLINGTON, DR G. D., *elected a member*, **xvii.** 69.
Exhibits Patient—a case of scleroderma, **xvi.** 196.

DEWAR, DR J. MICHAEL, *elected a member*, **iv.** 38.
Exhibits Patients—(1) patient with unusual dentition, **xi.** 125 ; (2) case of diphtheria treated by serum antitoxin, **xv.** 117. **Exhibits Specimens**—(1) household pin which had been swallowed and passed *per rectum*, **xi.** 126 ; (2) dental plate which had been swallowed and passed *per rectum*, **xi.** 126.

DEWAR, DR THOMAS W., *elected a member*, **vii.** 49.

DICKIE, DR JOHN THOMAS, *elected a member*, xx. 2.

DICKSON, DR GEORGE, 9 India Street, *elected a member*, iii. 54.

DICKSON, DR GEORGE, 14 Ardmillan Terrace, *elected a member*, xx. 130.

DOBIE, DR D. R.
Original Communication—acute yellow atrophy of liver, xviii. 20.

DODS, DR GEORGE, *elected a member*, v. 1.
Original Communication—tropical malaria and its sequelæ, vii. 186.

DONDERS, PROFESSOR, death of, viii. 167.

DOUGLAS, DR A. HOME, *elected a member*, ix. 13.
Original Communication—observations on the action of antimony in diseases of the skin, xi. 153.

DOUGLAS, DR C. E., *elected a member*, xiii. 220.

DOUGLAS, DR J. J., *elected a member*, xi. 14.

DOUGLAS, DR K. M., *elected a member*, viii. 22.
Original Communication—fat herniæ in the inguinal region, ix. 83. **Exhibits Specimen**—a portion of bowel excised for intussusception, x. 7.

DOWDEN, MR JOHN W., *elected a member*, xii. 211.
Exhibits Patient—a boy after operation for tubercular disease of upper ulnar epiphysis, xix. 192. **Exhibits Specimens**—(1) naked eye and microscopic specimens of plexiform, so called neuroma, xviii. 77; (2) specimen of hydatids, xviii. 77; (3) specimen of torsion of the spermatic cord, with strangulation of undescended testicle, xix. 195.

DRUMMOND, DR WILLIAM BLACKLEY, *elected a member*, xx. 19.

DUNCAN, DR JAMES MATTHEWS, *elected a corresponding member*, iii. 141.

DUNCAN, DR JOHN
Original Communications—(1) an accidental experiment with antiseptics, i. 80; (2) on the treatment of fresh wounds, i. 148; (3) germs and the spray, ii. 49; (4) wound treatment without the spray, iii. 123; (5) traumatic stricture; its treatment by supra-pubic cystotomy, iii. 200; (6) on reinfusion of blood in operations, v. 42; (7) stricture of the œsophagus: gastrostomy, x. 118; (8) on the surgical treatment of gallstones, xii. 169; (9) on the operation for inflammation of the appendix vermiformis, xii. 227. **Exhibits Patients**—(1) two boys in each of whom he had performed excision of both knees, i. 143; (2) a patient illustrating the good effects of subcutaneous ligature of varicose veins, iv. 38; (3) three cases of empyema after resection of ribs, vi. 76; (4) two cases of tumour of the neck, vi. 262; (5) case of sarcoma of the neck, vi. 262. **Exhibits Specimens**—(1) the parts removed in a case of nephrectomy, iii. 35; (2) half of the lower jaw removed for malignant disease, iv. 177; (3) a scirrhus prostate, iv. 176; (4) demonstrates (*a*) a method of applying syphon exhaustion to cases of empyema, vii. 154; (*b*) a method of applying capillary drainage for the removal of thin fluids, vii. 154; (5) head of femur from a case of spontaneous dislocation of the hip, ix. 166.

DUNCAN, DR JOHN A. H., *elected a member*, **xv.** 13.

DUNCANSON, DR KIRK

Exhibits Specimens—(1) a hay-seed removed from the ear, **i.** 106 ; (2) piece of a quill removed from the ear, **i.** 145 ; (3) button removed from the ear, **i.** 145 ; (4) a molluscous tumour from the ear, **iii.** 37 ; (5) two specimens of Keratosis obturans, **iii.** 37 ; (6) a plug of cotton wool taken from the ear, **iii.** 37 ; (7) two specimens of polypoid growths from the ear, **iii.** 37 ; (8) a portion of mutton bone coughed up from the lungs, **iii.** 37 ; (9) a sarcoma of the hard palate, **iv.** 41 ; (10) specimens of otomycosis, **iv.** 41.

DUNLOP, DR H. MELVILLE, *elected a member*, **iii.** 34.

Exhibits Patients—(1) case of double athetosis, **xviii.** 65 ; (2) case of pseudo-hypertrophic paralysis, **xviii.** 65.

DUNLOP, DR JAMES C., *elected a member*, **xii.** 19.

Original Communication—oxalurea and the excretion of oxalic acid in the urine, **xv.** 15. **Exhibits Patients**—three patients showing hereditary deformity, **xiii.** 33.

E

EASON, DR JOHN, *elected a member*, **xx.** 2.

Original Communication—on a method of estimating the interference with the hepatic metabolism produced by drugs, **xx.** 123.

EASTERBROOK, DR CHARLES E., *elected a member*, **xix.** 21.

EASTON, DR THOMAS, *elected a member*, **xiv.** 14.

EDIE, DR ROBERT

Original Communication—the cardio-pneumatic movements, **x.** 107.

ELDER, DR GEORGE, *elected a member*, **xvi.** 38.

Original Communication—on a case of cancrum oris, **xii.** 259. **Exhibits Patients**—(1) a case of congenital abscence of radius and thumb, **xvii.** 178 ; (2) a case of rheumatoid arthritis, **xvii.** 178 ; (3) case of congenital hemiatrophy of the face with malformation of auricle, **xviii.** 68 ; (4) case of chronic progressive chorea, **xviii.** 69.

ELDER, DR WILLIAM, *elected a member*, **xii.** 19.

Original Communication—on agraphia, **xvi.** 84. **Exhibits Patients**—(1) case of skin eruption for seventeen years following vaccination, **xviii.** 131 ; (2) case of congenital absence of fifth metacarpal bone, **xviii.** 131 ; (3) case of amyotrophic sclerosis, **xviii.** 132. **Exhibits Specimens**—(1) a brain with hæmorrhage into Broca's convolution, **xiv.** 210 ; (2) brain from a case of aphasia, **xv.** 61 ; (3) a hypertrophied bladder, **xv.** 62 ; (4) intestine and heart from a case of dysentery, **xviii.** 80 ; (5) brain with hæmorrhage into occipital lobe, **xviii.** 80 ; (6) brain from a case of word-blindness, **xviii.** 81 ; (7) four brains showing different seats of cerebral hæmorrhage, **xx.** 24 ; (8) dorsal vertebræ with a soft degenerating mass growing from their bodies, **xx.** 27.

ELKINS, DR F. ASHBY, *elected a member*, **xii.** 211.

ERICHSEN, EMERITUS-PROFESSOR JOHN ERIC, *elected a corresponding member*, iii. 141.

EVATT, SURGEON-MAJOR

Original Communication—the medical arrangements of an English Army Corps in war, with suggestions as to volunteer help, v. 20.

F

FAYRER, SIR JOSEPH, *elected a corresponding member*, iii. 141.

FELKIN, DR R. W., *elected a member*, v. 33.

Original Communication—notes on a case of elephantiasis arabum, viii. 48. **Exhibits Patients**—(1) a patient who had been trephined, vii. 110; (2) case illustrating lesions of the brain, ix. 1. **Exhibits Specimens**—(1) a Martin's patent screw-fastener, vi. 193; (2) Stern's Geheim-camera, vii. 228.

FERGUSON, DR J. HAIG, *elected a member*, v. 33.

FINLAY, DR W. A.

Original Communication—notes of a case of ruptured kidney, with recovery after lumbar incision and drainage, xii. 289. **Exhibits Patients**—(1) a patient who was the subject of amputation at the hip-joint, iii. 141; (2) case of Mickulicz's operation, viii. 120; (3) case of recovery after ruptured kidney, xii. 237. **Exhibits Specimen**—the head and neck of the femur from a case of amputation at the hip-joint, iii. 142.

FLEMING, DR R. A., *elected a member*, x. 1.

Original Communications—(1) on a case of cancrum oris, xii. 251; (2) post-mortem examination of a case of acute ascending paralysis due to influenza, xix. 204. **Exhibits Patients**—mother and family of four children suffering from Addison's disease, xviii. 109. **Exhibits Specimens**—(1) microscopic and naked-eye specimens from a case of Addison's disease, xvii. 184; (2) two mamillated stomachs, xviii. 111; (3) aneurism of one of the sinuses of Valsalva, xviii. 112; (4) a gumma of the brain, xviii. 161; (5) typhoid ulceration of the intestine, xviii. 161; (6) two kidneys showing waxy degeneration, xviii. 161; (7) a series of pathological specimens illustrating tuberculous lesions in different organs, xviii. 194; (8) tubercular pericarditis, xix. 195; (9) two hearts with patent foramen ovale, xix. 195; (10) fatty degeneration of the heart, xix. 195.

FORDYCE, DR ALEXANDER DINGWALL, *elected a member*, xx. 130.

FOULIS, DR JAMES

Original Communications—(1) on a case of patent ductus arteriosus, with aneurism of the pulmonary artery, iii. 156; (2) the only way of raising the tongue, of raising the epiglottis, and of stretching the aryteno-epiglottic folds at one and the same time, viii. 124; (3) the development of the testicle, xviii. 217: (4) the origin and development of the umbilical cord, xix. 164. **Exhibits Specimens**—(1) gives demonstrations of the circulation in the web of the frog's foot with oxyhydrogen light, i. 57, 184, iv. 162; (2) exhibits ascitic fluid, i. 161; (3) gives a demonstration of the circulation in the gills of a

tadpole, iii. 145 ; (4) a modified catheter, v. 6, 34, 49 ; (5) an instrument for washing out the stomach, v. 49 ; (6) an aseptic canula, v. 49 ; (7) an instrument which could be used as a stomach-pump or for washing out the bladder, v. 68 ; (8) a continuous syringe for ears, v. 133 ; (9) a force-pump attached to catheter, v. 133 ; (10) graduated syphons containing salicylate of soda, v. 154 ; (11) a model of an aspirating syringe, vi. 22 ; (12) an aspirator syringe, vi. 242 : (13) an aseptic catheter and small force-pump for washing out the bladder, vi. 242 ; (14) a midwifery forceps, vi. 242 ; (15) a new form of aspirator syringe, viii. 22.

FOWLER, DR JAMES STEWART, *elected a member*, xiv. 171.

FOWLER, DR SIMSON C., *elected a member*, xi. 70.

FOXCROFT, DR F. W., *elected a member*, xii. 264.

FRANCK, PROFESSOR FRANÇOIS, Paris, *elected a corresponding member*, ii. 74.

FRASER, DR F. W. DYCE, *elected a member*, ii. 23.

FRASER, DR J. HOSACK, *elected a member*, xiv. 154.

FRASER, PROFESSOR SIR THOMAS R.

Original Communications—(1) case of diabetic coma with lipæmia, i. 59 ; (2) the dyspnœna of asthma and bronchitis, its causation, and the influence of nitrites upon it, vi. 144 ; (3) remedies employed in cardiac therapeutics, xiv. 68 ; (4) on diabetic neuritis, xv. Appendix 53 ; (5) on alcohol, xx. 210 and 226. **Exhibits Patients**—(1) a case of exophthalmic goitre, vi. 260 ; (2) a patient with transposition of thoracic and abdominal viscera, vii. 177. **Exhibits**—two rabbits, one immunised against cobra poison, and the other illustrative of therapeutic value of antivenin, xiv. 212.

G

GAIRDNER, PROFESSOR SIR WILLIAM TENNANT, *elected a corresponding member*, iii. 141.

GARDINER, DR FREDERICK, *elected a member*, xx. 1.

GAYTON, DR WILLIAM, *elected a member*, v. 49.

GIBSON, DR A. MURRAY, *elected a member*, iv. 20.

GIBSON, DR G. A.

Original Communications—(1) on the action of the auricles in health and disease, i. 86 ; (2) the early stages of tuberculosis, iii. 210 ; (3) clinical note on hereditary herpes zoster, iv. 182 ; (4) on Cheyne-Stokes respiration, viii. 193 ; (5) antiseptic treatment of pernicious anæmia, xi. 258 ; (6) some deductions from a study of the development of the heart, xi. 266 ; (7) surgical measures in cerebral cases, xv. 27. **Exhibits Patients**—(1) a patient who had been trephined for subdural cysts, xiii. 126 ; (2) case after incision of pylorus for cancer, xv. 227 ; (3) case after operation for gastric ulcer, xvii. 101 ; (4) case of chronic syphilitic disease of the nervous system, xvii. 182 ; (5) case of obstruction and incompetence, both mitral and tricuspid, xvii. 182 ; (6) case of pseudo-bulbar paralysis, xix. 46 ; (7) two brothers suffering from Friedreich's

hereditary ataxia, **xx.** 4. **Exhibits Specimens**—(1) tracings of the pulsations of the brain, **i.** 86; (2) a diseased heart, **ii.** 61; (3) photographs of a man with double facial paralysis, **xiv.** 201; (4) photographs from a case of alternate paralysis, **xiv.** 201; (5) three drawings of a brain with right side diminutive, **xiv.** 200; (6) two drawings of a case of thrombosis of the cerebral sinuses, **xiv.** 201; (7) a card specimen of the microscopic appearances of blood in congenital heart disease, **xiv.** 17; (8) photos from a case of paralysis of ocular muscles, **xv.** 123; (9) heart with combined mitral and tricuspid obstruction and incompetence, **xvii.** 95; (10) a large gallstone removed from the gall-bladder, **xvii.** 184; (11) a water-colour drawing from a case of Addison's disease, **xvii.** 184; (12) a photograph taken with X-rays from a case of complete transportation of the viscera, **xvii.** 184; (13) a drawing of choroiditis from a case of waxy disease, **xvii.** 109; (14) drawings of the brain and medulla from a case of hæmorrhage into the ventricles, **xvii.** 109; (15) a specimen of a heart showing a characteristic patch of myomalacia, **xix.** 54.

GILES, DR A. B., *elected a member*, **xii.** 264.

Exhibits—a very cheap and simple form of flash light, **xv.** 152.

GILLESPIE, DR A. LOCKHART, *elected a member*, **x.** 74.

Original Communications—(1) notes on toxic effects of exalgin, **xi.** 124; (2) notes on a case of paroxysmal methæmoglobinuria, **xi.** 146; (3) some deductions from a study of the development of the heart, **xi.** 266; (4) some practical results from the chemical examination of the contents of the healthy stomachs, **xii.** 54; (5) the action of acids and alkalies on the secretions, **xiii.** 234; (6) on statistics of alcoholic patients, **xiv.** 268; (7) weather, influenza, and disease, **xv.** 102. **Exhibits Patients**—(1) case of deformity of both hands, **xiv.** 154; (2) two deaf mutes with goitre, **xiv.** 154; (3) a girl with a patent anterior fontanelle, **xiv.** 154. **Exhibits Specimens**—of albumoses from urine, **xv.** 112.

GRAHAM, DR DAVID, *elected a member*, **xvii.** 23.

GRAHAM, DR F. MAURICE, *elected a member*, **xiii.** 63.

Exhibits Patient—case of fracture of superior maxilla, **xiii.** 180. **Exhibits Specimen**—a joint which had been excised, **xiii.** 180.

GRANT, DR J. TAYLOR, *elected a member*, **xviii.** 33.

GRAY, DR ALLAN

Original Communication—case of strychnia poison, with an analysis of Steiner's vermin killer, **v.** 123. **Exhibits Specimens**—(1) a cartilaginous pleura, **ii.** 104; (2) cast of thoracic tumour, **ii.** 105; (3) the larynx and trachea from a case of croup, **iv.** 2; (4) the aorta and trachea from a case of aortic aneurism bursting into the trachea, **iv.** 2.

GRAY, DR THOMAS PAUL, *elected a member*, **xviii.** 161.

GREENFIELD, PROFESSOR WILLIAM S., *elected a member*, **v.** 83.

Original Communications—(1) on the pathology and morbid anatomy of myxœdema, **xii.** 132; (2) pathological report on a tissue passed *per rectum*, **xii.** 239. **Exhibits Patients**—(1) case of Thomsen's disease, **ix.** 196; (2) case of progressive diffuse myosclerosis, **ix.** 196.

GREIG, DR DAVID M., *elected a member*, xii. 18.
Exhibits Patient—case of congenital and symmetrical perforation of both parietal bones, xviii. 83. **Exhibits Specimen**—a gelatine cast from a case of lupus, xv. 62.

GREIG, DR W. C., *elected a member*, iv. 20.

GRIMMER, DR GEORGE K., *elected a member*, xvi. 177.

GUBBIN, DR WILLIAM B., *elected a member*, xii. 51.

GULLAND, DR G. L., *elected a member*, viii. 22.
Original Communications—(1) on the function of the tonsils, x. 215; (2) on sulphonal poisoning, xviii. 49; (3) the importance of examining the blood in doubtful cases of disease, xix. 10. **Exhibits Specimens**—(1) Koch's microscopic lamp, ix. 82; (2) a series of microscopic preparations made by Cohn's method for the demonstration of fat, xix. 33; (3) gives a microscopic demonstration of specimens of actinomyces fungus, xx. 158.

GUNNING, HIS EXCELLENCY, R. H.
Original Communication—on some points of importance in medical practice, iii. 176.

GUTHRIE, DR A. C., *elected a member*, x. 27.

GUY, DR WILLIAM, *elected a member*, ix. 163.
Exhibits Patient—case of extensive destruction of face from syphilis, xviii. 84.

H

HADDON, DR JOHN, *elected a member*, iii. 34.
Exhibits—temperature and pulse chart from a case of catheter fever, iv. 71.

HALDANE, DR WILLIAM, *elected a member*, viii. 47.

HAMILTON, PROFESSOR D. J.
Original Communication—on heredity in disease, xix. 94.

HAMP, DR J. WALTON, *elected a member*, vi. 56.

HARDIE, DR JOHN, *elected a member*, xiv. 154.

HARE, DR ARTHUR W., *elected a member*, iii. 34.
Original Communication—notes on unusual microscopic elements in food materials from a case of irritant poisoning, vi. 254. **Exhibits**—casts illustrating surgical topography of cranium, vi. 271.

HART, DR BERRY, *elected a member*, v. 173.
Original Communication—the minute anatomy of the placenta, viii. 227.

HARVEY, DR JAMES, *elected a member*, xii. 169.

HAY, DR HENRY, *elected a member*, iv. 1.

HAYCRAFT, DR J. B., *elected a member*, viii. 120.
Original Communication—the cardio-pneumatic movements, x. 107.

HELM, DR R. DUNDAS, *elected a member*, **xi.** 99.

HODSDON, MR J. W. B., *elected a member*, **iii.** 34.
Exhibits Patients—(1) case suffering from paraffin eczema, **iii.** 69; (2) case of cirsoid aneurism, **v.** 184; (3) a man after excision of larynx, **xiv.** 5; (4) a boy after laparotomy for strangulation of the small intestine, **xvii.** 56; (5) a patient whose entire tongue had been removed, **xvii.** 56; (6) a patient after operation for gastric ulcer, **xvii.** 101; (7) case of plexiform and multiform neuromata, **xviii.** 73. **Exhibits Specimens**—(1) three specimens illustrating cranial surgery—two from cases of abscess, and one from sinus phlebitis, **xiii.** 164; (2) a new form of safety-pin, **xv.** 14.

HORSLEY, DR REGINALD E., *elected a member*, **v.** 49.
Original Communication—cyst of the posterior extremity of the inferior turbinated body, **ix.** 43.

HUGHES, DR ALFRED W., *elected a member*, **ix.** 33.
Exhibits—a splint, a modification of Thomas's, **ix.** 183.

HUNTER, DR GEORGE
Original Communication—the place of specialism in general practice, with reference to diseases of the eye, ear, and throat, **iv.** 232; and **vii.** 76.

HUNTER, DR WILLIAM, *elected a member*, **vi.** 56.
Original Communication—the pathology of blood destruction within the liver, **vi.** 194.

HUSKIE, DR DAVID, *elected a member*, **xix.** 21.

HUTCHESON, DR JAMES, *elected a member*, **x.** 27.

I

INCH, DR ROBERT *elected a member*, **vii.** 1.

INKSTER, DR R. W., *elected a member*, **xv.** 13.

IRELAND, DR W. W., *elected a member*, **ii.** 23.
Original Communication—the increase of diseases of the nervous system and of insanity, **xix.** 77.

J

JAMES, DR ALEXANDER
Original Communications—(1) ankle clonus in relation to height of individual, **ii.** 63; (2) nutrition and reproduction considered generally, and as bearing on etiology and treatment of disease, **ii.** 106; (3) nutrition and growth in connection with pulmonary phthisis, **iv.** 250; (4) pleurisy and pleuritic effusion from the anatomico-physiological standpoint, **viii.** 167; (5) fœtid pleural effusion, **x.** 158; (6) empyema, basal lung disease, and bronchiectatic cavities, **xi.** 94; (7) chronic and tubercular pleurisy, **xiv.** 215; (8) on the blood in diabetes mellitus, **xv.** 123; (9) the treatment of crime, **xvi.** 15; (10) on the physics of the cranial

cavity, **xvi.** 146; (11) liver cirrhosis and its varieties, **xvii.** 110; (12) tubercular neuritis, **xviii.** 8; (13) hereditary syphilitic osteitis, **xviii.** 198; (14) case of acute ascending paralysis due to influenza, **xix.** 201. **Exhibits Patients**—(1) case of hemiplegia, **v.** 183; (2) case of tetany, **x.** 131; (3) case of displacement of heart due to lung disease, **x.** 212; (4) case of Friedreich's ataxia, **xiii.** 2; (5) a patient operated on for epilepsy, **xiii.** 127; (6) a boy with hernia cerebri, **xiv.** 241; (7) case of pseudo-hypertrophic paralysis, **xv.** 107; (8) case of hydronephrosis, **xv.** 107; (9) a patient after injury to the foot, **xv.** 106; (10) a case of rickets, **xvi.** 1; (11) two cases of muscular tremors, **xvi.** 56; (12) case of idiopathic muscular atrophy, **xvi.** 132; (13) two cases of cerebral hemiplegia, **xvi.** 209; (14) case of old empyema, **xvi.** 133; (15) two cases of irritation of the lumbar cord, **xvii.** 53; (16) case of double aortic and double mitral disease, **xvii.** 177; (17) case of scleroderma, **xviii.** 66; (18) case of angioneurotic œdema, **xviii.** 66; (19) case of cirrhosis of liver, **xviii.** 191; (20) case of hemichorea, **xviii.** 191; (21) case of cretinism, **xix.** 1; (22) a rare skin affection, **xix.** 2. **Exhibits Specimens**—(1) microscopic sections of tubercular ulcer of the tongue, **v.** 185; (2) an instrument for paracentesis of the chest, **vi.** 193; (3) a sphygmometer, **xi.** 251; (4) kidneys and bladder from a case of pyonephrosis, **xii.** 212; (5) an instrument for registering the viscosity of urine, **xvi.** 212; (6) a tumour adherent to the abdominal aorta, **xix.** 196.

JAMIESON, DR ALLAN

Original Communications—(1) the treatment of diphtheric sore throat, **ii.** 2; (2) acute circumscribed cutaneous œdema, **ii.** 86; (3) melanotic sarcoma, primarily of the skin, secondarily of the brain and other organs, **vi.** 198; (4) dermatitis herpetiformis, a clinical study, **x.** 13; (5) observations on the action of antimony in diseases of the skin, **xi.** 153; (6) on a case of mycosis fungoides, **xii.** 93; (7) eczema palmare and plantare, **xvii.** 39. **Exhibits Patients**—(1) case of psoriasis palmaris, **i.** 58; (2) a child with lichen circumscriptus, **i.** 105; (3) case of papilloma neuroticum, **ii.** 74; (4) case of lichen ruber, **ii.** 94; (5) case of pityriasis versicolar and psoriasis, **iii.** 69; (6) a boy suffering from recurrent vesicular eruption, **iv.** 174; (7) two patients suffering from lichen planus, **iv.** 204, 205; (8) a man suffering from morphœa, **iv.** 231; (9) a woman suffering from Bell's paralysis, **iv.** 104; (10) a case of ichthyosis, **v.** 183; (11) a case of morphœa, **v.** 183; (12) case of varicella gangrænosa, **vi.** 19; (13) case of lupus exfoliativus, **vi.** 21; (14) case of double comedo, **vi.** 144; (15) case of eczema of palm, **vi.** 263; (16) case of favus, **vii.** 218; (17) case with nodose hairs, **vii.** 227; (18) case of lupus erythematosus, **viii.** 2; (19) case of a peculiar form of baldness, **viii.** 191; (20) case of lymphangioma circumscriptum, **ix.** 146; (21) case of nævus punctiformis, **ix.** 147; (22) a favus family, **x.** 187; (23) case of dermatitis papillaris capillitii, or acne keloid, **xi.** 144; (24) case of mucous patch or condyloma due to trichophyton, **xi.** 145; (25) case of pigmentation due to scabies, **xii.** 190; (26) case of congenital malformation of the nails, **xii.** 191; (27) case of sarcoma of sole, **xii.** 192; (28) case of lupus erythematosus, **xiii.** 64; (29) case of lupus vulgaris erythematoides, **xiii.** 230; (30) case of lichen pilaris, *var.* spinulosus, **xiii.** 230; (31) case of lupus, **xiv.** 17; (32) case of molluscum contagiosum, **xiv.** 39; (33) case of impetigo varioliformis, **xiv.** 172; (34) case of erythema perstans, **xiv.** 173; (35) case of exfoliative dermatitis, **xiv.** 173; (36) case of scorbutus, **xiv.** 174; (37) case of psoriasis, **xiv.** 211; (38) case of hydroa vacciniforme, **xiv.** 239 (39) case of ichthyosis, **xiv.** 240; (40) case of morphæa, **xv.** 13;

(41) case of xeroderma, **xv.** 47 ; (42) case of acanthoma, **xv.** 226 ; (43) five cases of lupus, **xvi.** 57 ; (43) case of Raynaud's disease, **xvi.** 59 ; (44) case of tertiary syphilis, **xvi.** 126 ; (45) two cases of lupus vulgaris treated with Koch's new tuberculin, **xvii.** 4 ; (46) case of lupus erythematosus, **xvii.** 6 ; (47) case of dermatitis herpetiformis, **xvii.** 6 ; (48) several cases of eczema palmare and plantare, **xvii.** 24 ; (49) case of favus cured, **xvii.** 93 ; (50) case of syphilis, **xvii.** 94 ; (51) case of tylosis and nævus neuroticus, **xviii.** 2 ; (52) case of urticaria pigmentosa, **xviii.** 69 ; (53) case of syphilitic papulo-squamous eruption, **xviii.** 70 ; (54) case of psorospermosis follicularis vegetans, **xviii.** 71 ; (55) case of tylosis, **xviii.** 72 ; (56) case of elphantiasis, **xviii.** 72 ; (57) case of tropho-neurotic leprosy, **xviii.** 192 ; (58) case of lupus vulgaris, **xviii.** 193 ; (59) case of syphilis, **xviii.** 193 ; (60) a case of leprosy, **xix.** 45 ; (61) case of acne keloid, **xx.** 2 ; (62) case of tylosis palmæ et plantæ, **xx.** 3 ; (63) case of carcinoma of skin, **xx.** 4. **Exhibits Specimens**—(1) salve muslin invented by Dr Unna of Hamburg, **i.** 19 ; (2) a specimen of nodose hairs, **i.** 58 ; (3) three drawings of lichen, **i.** 106 ; (4) oleum Deelinæ, **iv.** 232 ; (5) specimens of medicinal soaps, **iv.** 273 , (6) a needle with lens for removing superfluous hairs, **iv.** 72 ; (7) a drawing of lichen marginatus, **iv.** 52 ; (8) a drawing of black pigmentation, **iv.** 53 ; (9) a drawing of ichthyosis palmaris and plantaris, **iv.** 163 ; (10) a warty growth from finger, **v.** 132 ; (11) demonstrates Unna's method of treating skin diseases, **v.** 174 ; (12) pills coated with keratin, **vi.** 22 ; (13) specimens of various soaps, **xi.** 186 ; (14) a soap of resorcin and salicylic acid, **xiii.** 223 ; (15) parasites of ringworm, **xv.** 57 ; (16) tricophyton invading the hair, **xvi.** 210 ; (17) microscopic specimens of cervical tumours, **xx.** 56.

JAMIESON, DR HUGH, *elected a member*, **viii.** 225.

JAMIESON, DR JAMES
Exhibits Patient—illustrating the good effects of drainage in empyema, **iii.** 34.

JAMIESON, DR JOHN BOYD, *elected a member*, **xx.** 2.

JENNER, SIR WILLIAM, BART., *elected an honorary member*, **iii.** 141.

JOHNSTON, DR D.W., *elected a member*, **xii.** 211.

JOHNSTON, DR R. J., *elected a member*, **xvii.** 23.

JOHNSTONE, DR J. CARLYLE, *elected a member*, **ii.** 11.

JOHNSTON, DR R. M'KENZIE, *elected a member*, **ii.** 23.
Original Communication—case of intra-tracheal tumour, **v.** 134. **Exhibits Patients**—(1) patient in whom drainage of the mastoid antrum was kept up by means of a lead canula, **xiii.** 126 ; (2) a patient two months after complete removal of larynx, **xx.** 20 ; (3) a boy after removal of a laryngeal papilloma, **xx.** 156 ; (4) a patient with a lymphosarcoma of tonsil, **xx.** 42. **Exhibits Specimens**—(1) a sarcomatous thoracic tumour, **iv.** 137 ; (2) a fibrinous cast from a case of fibrinous bronchitis, **v.** 122 ; (3) an electrical aid to hearing, **xi.** 127 ; (4) ivory shirt stud from the nose, **xvi.** 71 ; (5) tooth from auditory meatus, **xvi.** 71 ; (6) lens of haddock's eye from child's ear, **xvi.** 71 ; (7) a laryngeal forceps, **xx.** 158.

K

KEAY, DR JOHN, *elected a member*, **vi.** 113.

KEILLER, DR ALEXANDER J., *elected a member*, **ix.** 13.

KEITH, DR SKENE, *elected a member*, iv. 38.

Original Communications—(1) cases of ovariotomy, v. 53 ; (2) removal of the uterine appendages for disease, with twenty-three cases, vi. 57 ; (3) the treatment of fibroid tumours of the uterus by electricity, vii. 67. **Exhibits Specimens**—(1) fibro-cystic tumour of uterus, v. 33 ; (2) sarcoma of right kidney, v. 184 ; (3) an encephaloid cancer of kidney, v. 184 ; (4) a hydro-nephrosis of kidney, v. 185 ; (5) ovarian tumour, vi. 21 ; (6) diseased ovaries and tubes, vi. 56 ; (7) fibroid tumours, v. 185, vi. 193.

KENNEDY, DR CHARLES, *elected a member*, v. 49.

Exhibits Patient—case of rickets with pseudo-hypertrophic paralysis, ix. 33. **Exhibits Specimens**—four calcareous plates passed with fæces, ix. 13.

KER, DR CLAUD B., *elected a member*, xiii. 97.

Original Communications—(1) on the serum diagnosis of enteric fever, xvii. 29 ; (2) an outbreak of typhus fever, xviii. 162 ; (3) cross infection, so-called, in fever hospitals, xix. 137.

KERR, DR GEORGE, *elected a member*, iv. 229.

KOCHER, PROFESSOR THEODOR, *elected an honorary member*, xiv. 171.

L

LAING, DR J. H. A., *elected a member*, viii. 47.

LANG, DR W. SCOTT, *elected a member*, v. 173.

Original Communication—on the lateral curvature of the spine, ix. 65. **Exhibits Patients**—(1) case of salivary fistula, vii. 97 ; (2) case of operation for varicose veins, viii. 192. **Exhibits Specimen**—carcinoma of the mamma, with Paget's disease, viii. 22.

LANGWELL, DR HAMILTON G., *elected a member*, xix. 21.

Exhibits Patient—case of regurgitation of food, xx. 5.

LAWSON, DR DAVID, *elected a member*, xx. 61.

LAWSON, DR THOMAS, *elected a member*, xii. 264.

LEEBODY, DR HENRY A., *elected a member*, xix. 1.

LEECH, DR JOSEPH WILLIAM, *elected a member*, xx. 155.

LEITH, PROFESSOR R. F. C.

Original Communications—(1) on the pathological and histological appearances of mycosis fungoides, xii. 99 ; (2) pathological report on a case of cancer of the breasts, spleen, etc. xiii. 84 ; (3) probable lesions in a case of incipient caseous pulmonary phthisis, xiv. 181 ; (4) on ruptures of the pancreas, xiv. 250 ; (5) the physiology of the action of thermal saline baths, xv. 67 ; (6) pathological report on sarcoma of the liver, xv. 217. **Exhibits Patient**—case of incipient caseating pulmonary phthisis, xiv. 171. **Exhibits Specimens**—(1) a brain showing chronic hydrocephalus, xiv. 243 ; (2) a cerebellum with multiple tubercular tumours, xiv. 243 ; (3) the temporal bone from a case of abscess in the brain, xiv. 175 ; (4) a pancreas with abscesses in head, tail, and body, xiv. 155 ; (5) a rupture of the pancreas, xiv. 242 ; (6) a rupture

of the liver, **xiv.** 242 ; (7) a rupture of the duodenum, **xiv.** 242 ; (8) specimen of perforative appendicitis, **xiv.** 243 ; (9) a cystic kidney, **xiv.** 210 ; (10) a severe rupture of the kidney, **xiv.** 243 ; (11) three cases of hydro-nephrosis, **xiv.** 208 ; (12) skeleton of vertebral column, pelvis, and legs, with ligaments, from a case of double dislocation of the hip, **xiv.** 208 ; (13) photographs from a case of appendicitis, **xiv.** 243; (14) photographs of aneurism opening into the superior vena cava, **xiv.** 156 ; (15) perforating ulcer of the stomach, with cancer of cœcum, **xv.** 58 ; (16) specimen of phlegmonous gastritis, **xv.** 112 ; (17) malignant disease of bile-ducts, **xv.** 59 ; (18) microscopic specimens of phlegmonous gastritis, **xv.** 112, 115 ; (19) lantern demonstration of muscles, spinal cord and nerves, in cases of pseudo-hypertrophic paralysis, and muscular myopathic atrophy, **xvi.** 14.

LESLIE, DR GEORGE

Original Communications—(1) on hereditary transmission of disease, **i.** 19 ; (2) a case of cerebral tumour, **vi.** 23 ; (3) cure of facial neuralgia, odontalgia, and allied neuroses, **ix.** 14.

LÉPINE, PROFESSOR R., *elected a corresponding member*, **ii.** 74.

LISTER, LORD, *elected a corresponding member*, **iii.** 141 ; *elected an honorary member*, **xii.** 211 ; letter from, **xvi.** 140.

LITTLEJOHN, PROFESSOR SIR HENRY D.

Original Communications—(1) case of poisoning with nitrate of potash, with hints as to the conduct of medical practitioners in cases of suspected poisoning, **iv.** 23 ; (2) valedictory address, **v.** 7. **Exhibits Specimens**—(1) the parts injured in a case of cut-throat, **iii.** 143 ; (2) the pharynx, gullet, air passages, and stomach of a case of poisoning with carbolic acid, **iii.** 155 ; (3) ulceration of the stomach, rupture, and peritonitis, **iii.** 155 ; (4) rupture of the diaphragm, **iii.** 156 ; (5) the parts from a case of cut-throat, **iii.** 187 ; (6) the liver and heart, both ruptured by a fall from a height, **iii.** 187 ; (7) rupture of the diaphragm and rupture of heart, **iii.** 209 ; (8) the parts in a case of cut-throat, **iii.** 209 ; (9) a rupture of the diaphragm caused by a fall from a height, **iv.** 3 ; (10) specimen of rupture of one of the columnæ carneæ of the heart, **iv.** 4 ; (11) the heart, liver, and kidneys from a case of fatal railway injury, **iv.** 21 ; (12) the tongue and air passages from a case of suffocation during a fire, **iv.** 106 ; (13) the parts from a case of suicidal wound of the neck, **iv.** 106 ; (14) a double uterus, **iv.** 21 ; (15) a stomach presenting two perforating ulcers, **iv.** 41 ; (16) a portion of the ileum from a typhoid patient, showing perforating ulcers, **iv.** 41 ; (17) a piece of skin with varicose ulcer, **v.** 68 ; (18) forearm and hand in which a table knife was firmly grasped, **v.** 68 ; (19) a looking-glass bespattered with blood, **v.** 68 ; (20) a preparation exhibiting the effects of fire on the skin, **v.** 132 ; (21) three specimens of aortic disease, **vi.** 77 ; (22) a fracture of the shaft of the humerus close to the joint, **vi.** 77 ; (23) the stomach, intestines, gullet, and windpipe of a man who had swallowed a quantity of Bow's liniment, **vi.** 78 ; (24) a specimen illustrative of wounds of the face and head from firearms, **vi.** 263 ; (25) three specimens of duodenal ulcer, **vi.** 263 ; (26) case of rupture of aneurism of aorta, **xvi.** 38 ; (27) dissecting aneurism of aorta, **xvi.** 38 ; (28) a case of choking from the impaction of mutton in larynx and œsophagus, **xvi.** 39 ; (29) suicidal wound of the neck, **xvi.** 68 ; (30) an aortic aneurism, **xvi.** 68 ; (31) suicidal wound of neck, **xvi.** 134 ; (32) a pistol wound of the skull, **xvi.** 134.

LITTLEJOHN, DR HENRY HARVEY, *elected a member*, **viii.** 120.

Original Communications—(1) outbreak of typhoid fever due to milk infection, **x.** 88 ; (2) an outbreak of typhus fever, **xviii.** 162 ; (3) a case of murder and suicide, **xix.** 64. **Exhibits Specimens**—(1) a rupture of the heart, **viii.** 226 ; (2) an aneurism of the aorta, **viii.** 226 ; (3) aneurism of the heart, **x.** 106 ; (4) rupture of a tubal pregnancy, **xvii.** 25 ; (5) three specimens of rupture of aortic aneurism, **xvii.** 26 ; (6) the cervical vertebræ, from a man with dislocation between the third and fourth, **xvii.** 96 ; (7) œsophagus and stomach, from a case of carbolic acid poisoning, **xvii.** 96 ; (8) larynx and cervical vertebræ, from a case of suicidal cut-throat, **xvii.** 96 ; (9) aneurism of the left ventricle of the heart, **xvii.** 187 ; (10) case of suicidal cut-throat, **xvii.** 187 ; (11) an interstitial extra-uterine pregnancy, **xvii.** 188 ; (12) an old cicatrized suicidal cut-throat wound, **xvii.** 188 ; (13) cicatrix of an old tracheotomy wound, **xvii.** 188 ; (14) two specimens of hypertrophy of the heart, **xviii.** 84 ; (15) spontaneous rupture of the heart, **xviii.** 85 ; (16) an effusion of blood upon the surface of the dura mater, **xviii.** 85 ; (17) strangulation of the bowel, **xviii.** 206 ; (18) case of intussusception, **xviii.** 206 ; (19) the tongue, fauces, œsophagus, stomach, and intestines, from a case of hydrochloric acid poisoning, **xviii.** 206 ; (20) the stomach from a case of chloride of zinc poisoning, **xviii.** 206 ; (21) a dermoid cyst of ovary, **xix.** 31 ; (22) a heart with calcification of the columnæ carneæ, **xix.** 32 ; (23) traumatic rupture of heart, **xix.** 194 ; (24) the stomach from two cases of carbolic poisoning, **xix.** 194 ; (25) the liver, uterus, and stomach from a case of acute yellow atrophy, **xix.** 194 ; (26) brain showing cerebral hæmorrhage, **xx.** 59 ; (27) cut-throat, **xx.** 59 ; (28) specimen showing complete transverse rupture of the small intestine, also of the mesentery, **xx.** 60 ; (29) a double uterus, **xx.** 60 ; (30) a stomach showing acute gastritis, **xx.** 60.

LITTLEJOHN, DR T. HERBERT

Exhibits Specimens—(1) the calvarium from a case of suicide, **xiii.** 69 ; (2) a photograph of the head from a case of suicidal pistol wound, **xiii.** 68 ; (3) a revolver which had been used in a case of suicide, **xiii.** 68 ; (4) a hatchet which had been used in a case of suicide, **xiii.** 69.

LIVINGSTON, DR GEORGE ROBERT, *elected a member*, **xx.** 130.

LONGMUIR, DR JAMES, *elected a member*, **ii.** 23.

LUKE, DR THOMAS DAVY, *elected a member*, **xx.** 1.

LUNDIE, DR R. A., *elected a member*, **iii.** 34.

Original Communications—(1) case of spontaneous pneumo-thorax and pneumo-pericardium, **x.** 200 ; (2) on the treatment of myxœdema, **xii.** 133. **Exhibits Patients**—(1) skin-grafting for extensive burn of skin on chest, **xiv.** 171 ; (2) patient after operation for perforating gastric ulcer, **xiv.** 57 ; (3) boy after removal of tumour from lip, **xv.** 13. **Exhibits Specimens**—(1) specimen of scirrhus of left kidney, **vi.** 268 ; (2) united fracture of neck of femur, **viii.** 62 ; (3) fish-bone removed from the œsophagus, **viii.** 63 ; (4) apparatus for intestinal insufflation, **xii.** 169 ; (5) Feldbausch's nasal respirator, **xiv.** 18 ; (6) a feeding cup, **xiv.** 18 : (7) drawing of a brain with a tumour in the cerebellum, **xvi.** 76.

LUNDIE, DR W. TASKER, *elected a member*, **xv.** 60.

M

M'ALLUM, DR DONALD, *elected a member*, **xx.** 19.

M'AULAY, DR DONALD, *elected a member*, **xv.** 1.

M'BRIDE, DR P.

Original Communications—(1) on the causes of tinnitus aurium, **i.** 106; (2) notes on two uncommon forms of ear disease, **ii.** 102; (3) a rare form of laryngeal neurosis, **iii.** 59; (4) some local causes of fœtid breath, **iv.** 4; (5) a contribution to the study of laryngeal paralyses, **iv.** 164; (6) illustrations of uncommon morbid conditions of the ear, nose, and larynx, **v.** 72; (7) diagnosis and treatment of cerebral abscess due to ear disease, **vi.** 114; (8) the adenoid tissue at the base of the tongue as a factor of throat symptoms, **vi.** 271; (9) empyema of the superior maxillary antrum, &c., **vii.** 99; (10) methods of treating nasal and naso-pharyngeal polypi, **vii.** 229; (11) clinical notes on fatty tumours of the larynx, **viii.** 43; (12) cysts of the tonsils, nose, larynx, and ear, **xi.** 29; (13) tuberculosis of the upper air passages, **xi.** 187; (14) on pachydermia of the larynx, **xii.** 108; (15) on suppuration in certain osseous cavities, **xiv.** 156; (16) treatment of ozæna by cupric electrolysis, **xviii.** 114. **Exhibits Patients**—(1) a boy with a cephalic murmur, **iv.** 39; (2) case of laryngeal neurosis, **viii.** 1; (3) case of osseous cysts of the middle turbinated bones, **viii.** 2; (4) case of lupus of the palate and nostrils, **xii.** 193; (5) patient in whom Staphi's operation had been performed, **xiii.** 125. **Exhibits Specimens**—(1) a number of adenoid growths removed from the naso-pharynx, **iv.** 224; (2) a set of electric accumulators, **iv.** 2; (3) snare for removing nasal polypi, **iv.** 182; (4) adenoid growths from naso-pharynx, **v.** 132; (5) new form of laryngeal forceps, **xi.** 126; (6) tumour from right vocal cord, **xi.** 186; (7) new form of nasal speculum, **xii.** 92.

M'CALLUM, DR EDWARD, *elected a member*, **iv.** 51.

M'CUTCHAN, DR W. A., *elected a member*, **xvii.** 1.

M'DONALD, DR STUART, *elected a member*, **xx.** 75.

MACDONALD, DR W. B., *elected a member*, **viii.** 22.

M'EWAN, DR WILLIAM, *elected a member*, **xii.** 19.

MACEWEN, PROFESSOR SIR WILLIAM, *elected a corresponding member*, **xv.** 137.

M'FADYEAN, DR JOHN, *elected a member*, **vii.** 97.

M'GIBBON, JR., DR JOHN, *elected a member*, **xix.** 21.

MACGILLIVRAY, DR C. W.

Original Communications—(1) on resilient stricture, **xvi.** 226; (2) the radical cure of hernia, with the statistics of seven years' experience in the Royal Infirmary, **xix.** 35. **Exhibits Patients**—(1) a boy on whom he had operated for talipes equino-varus, **iv.** 70; (2) a child on whom he had performed oste-ectomy, **v.** 2; (3) patient who had been trephined and the lateral ventricles aspirated, **xiii.** 126; (4) case of facial neuralgia, **xiv.** 58; (5) a patient after removal of dentigerous cyst, **xiv.** 15; (6) case of osseous anchylosis of lower jaw, **xiv.** 16; (7) case of excision of elbow-joint, **xiv.** 59; (8) case after excision of

papillomata of the larynx, **xv.** 48 ; (9) case of excision of condyles of the humerus, **xv.** 48 ; (10) case after removal of calculus from pelvis of kidney, **xvi.** 80 ; (11) case after excision of condyles of humerus, **xvi.** 127 ; (12) case after excision of part of the transverse colon, **xvii.** 51 ; (13) two cases of successful operations for perforating gastric ulcer, **xviii.** 186 ; (14) a patient who had suffered from a rare form of fracture of the skull, **xix.** 55. **Exhibits Specimens**—(1) multilocular ovarian cyst, **ii.** 62 ; (2) specimens from abdominal cavity three years after an ovariotomy, **ii.** 105 ; (3) large piece of omentum, **ii.** 105 ; (4) vesical calculus, **ii.** 2 ; (5) set of false teeth removed from œsophagus, **ii.** 105 ; (6) three specimens of calculi, **iii.** 5 ; (7) a degenerated ovary and fallopian tube removed from an inguinal hernia, **iii.** 5 ; (8) a peculiar calcareous body from the pleural cavity, **iii.** 56 ; (9) one-half of the lower jaw removed for malignant tumour, **iii.** 142 and 154 ; (10) the right arm, scapula, and half of the clavicle removed on account of an enormous enchondroma, **iii.** 56 ; (11) a cystic tumour of the ramus of the jaw, **iii.** 56 ; (12) a tumour involving œsophagus, pharynx, and larynx, **iv.** 40 ; (13) a recurrent tumour from the iliac region, **iv.** 52 ; (14) the condyles of the humerus removed for injury to the elbow-joint, **iv.** 162 ; (15) a melanotic sarcoma from the lymphatic glands, **iv.** 52 ; (16) the contents of a dermoid cyst of the head, **iv.** 23 ; (17) epithelioma of hand, **v.** 5 ; (18) lower jaw, tongue, and floor of mouth, **v.** 5 ; (19) a Crimean bullet removed from the condyle of the femur, **v.** 5 ; (20) photograph of a child on whom had been performed a double amputation of thigh and leg, **v.** 66 ; (21) a new form of phymosis forceps, **vi.** 193 ; (22) os calcis from a case of acute necrosis, **xiv.** 17 ; (23) warts from the larynx, **xv.** 57 ; (24) calculus from the ureter, **xv.** 57 ; (25) condyles of the humerus, **xv.** 57 ; (26) a kidney successfully removed, **xvi.** 82 ; (27) renal calculi, **xvi.** 82, 136 ; (28) specimen of rupture of bladder, **xvi.** 83, 135 ; (29) condyles of humerus, **xvi.** 135 ; (30) an ovarian cyst, **xvii.** 68 ; (31) a uterus and appendages, removed for large fibro-myomata, **xvii.** 183.

MACKAY, DR F. REID, *elected a member*, **xviii.** 161.

MACKAY, DR GEORGE, *elected a member*, **vii.** 1.

Exhibits Patient—a patient with primary syphilitic sore on upper eyelid, **vii.** 215.

MACKAY, DR GEORGE HUGH, *elected a member*, **iv.** 38.

MACKAY, DR W. B., *elected a member*, **xii.** 51.

MACKENZIE, DR JAMES, *elected a member*, **xiii.** 63.

Original Communication—on significance of venous pulse, **xiii.** 69.

MACKENZIE, DR ROBERT, *elected a member*, **xiii.** 1.

Exhibits—a thumb, **xiii.** 15.

MACKENZIE, DR W. LESLIE, *elected a member*, **xv.** 13.

MACKINTOSH, DR WILLIAM A., *elected a member*, **xv.** 117.

MACMILLAN, DR JOHN, *elected a member*, **xvi.** 140.

M'NEIL, DR WILLIAM, *elected a member*, **iii.** 34.

M'LAREN, DR JOHN SHAW, *elected a member*, vii. 1.

Original Communication—permanent dislocation of the patella, **xix.** 58. **Exhibits Patients**—(1) patient from whom had been removed a tumour of the scapula, **xi.** 186 ; (2) boy after operation for congenital torticollis, **xviii.** 184 ; (3) a lad after operation for ruptured bladder, **xviii.** 184 ; (4) a man after operation for papilloma of bladder, **xviii.** 185 ; (5) patient with untreated Pott's fracture, **xviii.** 185 ; (6) patient after amputation of the hip-joint, **xviii.** 195 ; (7) patient after removal of the tongue for cancer, **xx.** 48 ; (8) psoas abscess in a girl, aged 16, **xx.** 48 ; (9) a case of tuberculous disease of the wrist, **xx.** 48. **Exhibits Specimens**—(1) larynx and trachea from a case of burning, **v.** 178 ; (2) specimen showing the effect of twisting the sac in the operation for the radical cure of hernia, **vii.** 219 ; (3) a scirrhus of the male breast, **vii.** 220 ; (4) specimen of congenital absence of tibia, **ix.** 4 ; (5) tumour of the scapula, **xi.** 186 ; (6) kidney removed for malignant disease, **xiv.** 207 ; (7) photograph of a malignant adenoma of the scalp, **xiv.** 207 ; (8) specimen of carcinoma of œsophagus, **xix.** 136 ; (9) a right and left carpal scaphoid fractured into two almost equal portions, **xix.** 137 ; (10) a recent Pott's (?) fracture, **xx.** 57 ; (11) Schlagintweit's catheter-cystoscope, **xx.** 131 ; (12) radiograph of fractured condyle of humerus, **xx.** 57 ; (13) radiograph of the astragalus, **xx** 57.

M'LAREN, DR P. HUME

Original Communication—case of strangulated congenital inguinal hernia, **ii.** 33. **Exhibits Patients**—(1) a patient, aged 20, suffering from congenital syphilis, **ii.** 24 ; (2) a patient presenting 132 cutaneous tumours, **vi.** 77. **Exhibits Specimens**—(1) an ileo-cæcal intussusception, **v.** 67 ; (2) a specimen showing the spread of a melanotic sarcoma by the lymphatics, **vii.** 218 ; (3) a urethral calculus, **vii.** 219.

M'LAREN, DR RODERICK, *elected a member*, **ii.** 11.

Original Communications—(1) five cases of amputation at the hip-joint, **iii.** 116 ; (2) ovariotomy in a county hospital, with a note on a method of preparation of cysts for exhibition, **iv.** 139. **Exhibits Specimens**—(1) a drill, **iii.** 115 ; (2) a bone-cutter worked by a screw, **iii.** 116.

M'LARTY, DR MALCOLM, *elected a member*, **xx.** 2.

MACPHERSON, DR JOHN, *elected a member*, **xi.** 14.

Original Communication—surgical treatment of general paralysis of the insane, **xi.** 167. **Exhibits Patients**—(1) patient exemplifying the result of treatment in myxœdema, **xi.** 99 ; (2) a general paralytic who had been trephined, **xiii.** 126.

MACRAE, DR JOHN, *elected a member*, **xii.** 90.

M'RAILD, DR DONALD, *elected a member*, **iii.** 1.

MACVIE, DR S., *elected a member*, **xvii.** 23.

MARSHALL, PROFESSOR JOHN, *elected a corresponding member*, **iii.** 141.

MARTIN, DR J. W., *elected a member*, **viii.** 22.

Exhibits Patients—(1) three cases of phthisis which had been cured, **xi.** 144 ; (2) case of apparent Basedow's disease, **xvii.** 23.

MATTHEW, DR EDWIN, *elected a member*, **xx.** 19.

MESSER, DR ANDREW, *elected a member*, xviii. 83.

MESSER, DR JOHN C., *elected a member*, vii. 30.

MIDDLEMASS, DR JAMES, *elected a member*, xiv. 57.

MILES, MR ALEXANDER, *elected a member*, xi. 93.

Original Communications—(1) on the mechanism of cerebral concussion, **xi.** 127; (2) notes on skin-grafting from the lower animals, **xiv.** 201; (3) on trade-like movements following head injuries, **xvi.** 40; (4) on picric acid as a dressing for burns, **xvi.** 221; (5) case of cerebral abscess, **xviii.** 97. **Exhibits Patients**—(1) case of skin-grafting with skin of dog, **ix.** 33; (2) patient who had been operated on for Jacksonian epilepsy, **xiii.** 126; (3) case of skin-grafting for extensive burn on leg, **xiv.** 172; (4) cases of burn treated by picric acid, **xvi.** 131; (5) patient after excision of tongue, **xvi.** 78; (6) patient after operation for gall-stones, **xvi.** 130; (7) patient after double amputation above the knee, **xvi.** 129; (8) patient after operation for double talipes, **xvi.** 79. **Exhibits Specimens**—(1) tongue and glands from a case of malignant disease, **xvi.** 81: (2) specimen of hydrocele of cord, **xvi.** 198; (3) specimens illustrating middle-ear disease, **xvi.** 197; (4) casts and photographs of case of talipes, **xvi.** 81; (5) cast of unobliterated Mekel's diverticulum, **xvi.** 81; (6) a large chondroma of femur, **xix.** 31; (7) cæcum and colon removed for malignant disease, **xix.** 31; (8) a series of specimens illustrating injuries to the skull, **xix.** 31.

MILLER, MR A. G.

Original Communications—(1) unusual case of strangulated congenital hernia, **ii.** 68; (2) case of empyema, with operation for closure of pleural cavity by removing portions of four ribs, **iv.** 11; (3) diagnosis and treatment of cerebral abscess due to ear disease, **vi.** 129; (4) three cases of nephrotomy, with remarks, **vii.** 170; (5) two suggestions for improving the operation of excision of the knee-joint, **viii.** 187; (6) intestinal obstruction, its pathology and treatment, **viii.** 206; (7) case of intestinal obstruction successfully treated by laparotomy, **ix.** 89; (8) the treatment of flat-foot, **ix.** 169; (9) excision or arthrectomy of the knee-joint, **xii.** 11; (10) a new instrument for the treatment of difficult strictures of the urethra, **xii.** 286; (11) note on Bier's method of treating strumous diseases of the extremities, **xiii.** 19; (12) on Dr Heron Watson's method of excising the wrist-joint, **xiii.** 228; (13) on treatment of fractures near a joint, **xiv.** 245; (14) cause of muscular atrophy in tubercular joint disease, **xv.** 231; (15) rheumatic myositis, **xvii.** 198; (16) etiology and treatment of glandular enlargements in the neck, **xvii.** 17; (17) clinical note on residual urine in cases of enlarged prostate, **xix.** 197; (18) as President, makes reference to the death of Her Majesty, **xx.** 75. **Exhibits Patients**—(1) boy and girl who had suffered from gelatinous degeneration of knee-joint, **ii.** 23; (2) a successful case of resection of tarsus, **ii.** 100; (3) case of plastic operation for contraction of the arm after burn, **iii.** 1; (4) case of multiple congenital tumours of the arms and legs, **iii.** 2; (5) a young man who had sustained multiple injuries, **iv.** 104; (6) a case of excision of both testicles, **iv.** 105; (7) a woman who had recovered from a compound fracture of arm, **v.** 117; (8) a case demonstrating recovery from white swelling of the knee-joint, **v.** 132; (9) a female suffering from atrophy of the left arm, **v.** 173; (10) a man who had sustained compound fracture of fore-arm, **v.** 174; (11) a case of fæcal fistula in the left inguinal region, **v.** 182; (12) dressing for cases of circumcision, **vi.** 191; (13) case of excision of knee, **vi.** 192; (14) two patients who had suffered from cerebral

abscess, **vi.** 225 ; (15) case of talipes equino-varus, **vii.** 51 ; (16) case of fracture of radius, **vii.** 97 ; (17) case of recovery from fracture at the base of the skull, **viii.** 120 ; (18) case of excision of the knee-joint, **viii.** 178 ; (19) case of lupus of the tongue, **viii.** 192 ; (20) case of trephining of frontal sinus, **ix.** 81 ; (21) case of dislocation of hip, **ix.** 164 ; (22) case of laparotomy, **ix.** 176 ; (23) case of thyroiditis, **x.** 1 ; (24) case of traumatic bronchocele becoming malignant, **x.** 2 ; (25) case of epilepsy from injury to head, cured, **x.** 27 ; (26) case of hæmophilia, **x.** 211 ; (27) two cases of excision of wrist, **x.** 211 ; (28) case of abscess of antrum, **x.** 211 ; (29) case of excision of knee-joint, **xii.** 1 ; (30) case of iliac colotomy, **xii.** 51 ; (31) case of recovery after operation for septic sinus phlebitis of the lateral sinus, **xiii.** 230 ; (32) three cases of excision of the wrist by Watson's method, **xiii.** 221 ; (33) case after amputation by disarticulation at the elbow-joint, **xiv.** 171 ; (34) case of spina-bifidia occulta, **xvi.** 124 ; (35) case of intra-cranial tumour, **xvi.** 60 ; (36) patient after amputation at the knee for malignant ulcer, **xvi.** 61 ; (37) case of recurrent tumour of forearm, **xvii.** 2. **Exhibits Specimens**—(1) urethral calculus, **i.** 19 ; (2) a glans penis and prepuce amputated for epitheliomatous disease, **i.** 85; (3) a cyst of the round ligament, **i.** 85; (4) a polypus of the rectum, **i.** 85; (5) a portion of intussuscepted bowel, **i.** 161; (6) three pieces of bone from head, **ii.** 94 ; (7) piece of omentum, **ii.** 37 ; (8) head of femur, **ii.** 74 ; (9) foot removed for caries, **ii.** 75; (10) foot removed for injury, **ii.** 74 ; (11) recent invention in spray producer, **ii.** 38 ; (12) new soft bougies, **ii.** 38 ; (13) a knee-joint, **iii.** 35 ; (14) portion of the spinal column showing fracture of the cervical vertebræ, **iii.** 55; (15) the bones of the arm from a case of amputation at the shoulder-joint, **iii.** 55; (16) an enlarged bursa patellæ, **iii.** 115; (17) portions of three ribs removed to favour contraction after empyema, **iii.** 209 ; (18) a cast of knee with enlarged bursa patellæ, **iii.** 115; (19) an epithelioma of the lower jaw, **iv.** 163 ; (20) the heads of two femora removed for hip disease, **iv.** 163 ; (21) a loose cartilage removed from the knee-joint, **iv.** 163; (22) an anchylosed knee-joint, **iv.** 20 ; (23) Wyeth's saw for dividing long bones, **iv.** 2 ; (24) drawing of the position of the hand in fracture of the radius, **iv.** 105 ; (25) temperature charts of two stricture cases, **iv.** 226 ; (26) microscopic section of nerve from a case of tetanus, **iv.** 226 ; (27) the parts from a hip-joint operation, **v.** 50 ; (28) a foot amputated for senile gangrene, **v.** 122 ; (29) a cystic tumour of knee, **v.** 122 ; (30) two knee-joints from cases of white swelling, **v.** 132 ; (31) gunshot wound of stomach, **v.** 153; (32) parts from a case of inguinal colotomy, **v.** 185; (33) calculi from a male cadaver, **v.** 185; (34) a vesical calculus, **vi.** 2 ; (35) parts from a case of intussusception, **vi.** 2; (36) parts from a case of excision of knee, **vi.** 2 ; (37) leg from a case of senile gangrene, **vi.** 22 ; (38) foot amputated for white gangrene, **vi.** 113 ; (39) parts from excision of knee, **vi.** 192; (40) a renal calculus, **vi.** 242; (41) an epulis, **vi.** 242; (42) a drawing of a foot amputated for white gangrene, **vi.** 113 ; (43) a syphilitic knee-joint, **vii.** 75; (44) a dressing from a knee-joint, **vii.** 98 ; (45) two charts of empyema cases, **vii.** 51; (46) fracture of the lower epiphysis of the femur, **viii.** 34 ; a distended gall-bladder with malignant tumour of the duodenum, **viii.** 34 ; (48) a sigmoid flexure with volvulus, **viii.** 62 ; (49) portion of invaginated bowel, **viii.** 123 ; (50) cast of a dislocated knee-joint, **viii.** 122 ; (51) photograph of child on whom laparotomy was performed, **x.** 211; (52) a hollow-handled Volkmann's spoon, **x.** 2 ; (53) a preparation from a fatal case of a temporo-sphenoidal abscess, **xiii.** 162 ; (54) brain from a case of abscess in temporo-sphenoidal lobe, **xiv.** 244 ; (55) temperature chart, **xvi.** 134.

MILLER, DR WILLIAM, *elected a member*, **xv.** 1.

MILLIGAN, DR DAVID, *elected a member*, **v.** 1.

MILLS-ROBERTS, DR E. A., *elected a member*, **xvii.** 1.

MOIR, DR D. M.
Exhibits Specimens—(1) two calvaria exhibiting fracture of skull, **vi.** 266; (2) specimen from a case of cut-throat, **vi.** 266.

MOIR, DR JOHN
Exhibits—indiarubber pads for treatment of flat-foot, **iv.** 138; death of, **xviii.** 184.

MOORE, DR E. COLEMAN, *elected a member*, **xii.** 19.

MOOREHOUSE, DR JAMES ERNEST, *elected a member*, **xx.** 61.

MORHAM, MR ROBERT
Original Communication—on Colinton Hospital, **xvi.** 170; gives a lantern demonstration of the plans of Colinton Hospital, **xvi.** 170.

MORISON, DR A. E., *elected a member*, **viii.** 120.
Original Communications—(1) the surgical treatment of empyema, **viii.** 197; (2) an ectopic gestation, **xi.** 14.

MORISON, DR J. RUTHERFORD, *elected a member*, **ii.** 11.
Original Communications—(1) on some mistakes in the technique of abdominal surgery, **xii.** 175; (2) on cases of gallstone, **xvi.** 119.

MOROTTI, DR, exhibits and explains Dr Bottini's galvano-cautery, **x.** 27.

MOWAT, DR JAMES, *elected a member*, **xiii.** 12.

MOWAT, DR JOHN, *elected a member*, **iv.** 38.

MUIR, PROFESSOR ROBERT, *elected a member*, **xiii.** 180.
Demonstrates—the method of "serum-diagnosis" of typhoid fever, **xvi.** 71; gives lantern demonstration of descending tract in posterior columns of cord, **xvi.** 10; gives lantern demonstration of muscles, spinal cord, and nerves in cases of pseudo-hypertrophic paralysis and muscular myopathic atrophy, **xvi.** 14; exhibits sections and microphotographs, **xvi.** 15.

MUIRHEAD, DR CLAUD
Exhibits Specimens—(1) the brain of a patient who suffered from aphasia, **iii.** 208; (2) the heart of the same patient, **iii.** 208.

MUNRO, DR D. G. MACLEOD, *elected a member*, **xvii.** 185.

MURDOCH, DR T. BURN
Original Communication—case of recurrent fibrinous rhinitis, **xiii.** 268. **Exhibits Specimens**—(1) an enchondroma of the right lung, and cast of the left hand, and photographs from a patient who suffered from multiple enchondromatous tumours, **ix.** 197; (2) a specimen of hyperkeratosis of the filiform papillæ of the tongue, **xiii.** 221; (3) a cast of the skull of King Robert the Bruce, **xiii.** 232; (4) specimen showing disease of atlo-axoid articulation, **xv.** 57; (5) specimen from case of intestinal obstruction, **xv.** 56.

MURRAY, DR MILNE, *elected a member*, iv. 20.
Original Communication—the cessation of respiration under chloroform, and its restoration by a new method, iv. 107. **Exhibits Specimens**—(1) improved arteriograph, iv. 228; (2) a recording drum for arteriograph, iv. 228; (3) tracings obtained by means of the arteriograph, iv. 228; (4) an ovarian tumour, xvi. 68.

N

NAPIER, DR A. D. LEITH
Original Communication—case of difficult labour, metro-peritonitis, carbolic acid poisoning, etc., ii. 75.

NASMYTH, DR GOODALL, *elected a member*, iv. 1.
Exhibits—a new form of box-splint, v. 49.

NEVE, DR ARTHUR
Original Communication—surgical economy in hospitals, xiii. 263.

NEVE, DR ERNEST F., *elected a member*, iv. 20.
Exhibits Specimen—aneurism of abdominal aorta, iv. 71.

NEWCOMBE, DR HENRY, *elected a member*, iii. 34.

NICHOLSON, DR H. OLIPHANT, *elected a member*, xx. 1.

O

OLLIER, PROFESSOR L., *elected a corresponding member*, iii. 141.

ORR, DR JOHN, *elected a member*, xiv. 154.

ORR, DR W. BASIL, *elected a member*, xii. 264.

OSLER, PROFESSOR WILLIAM, of Baltimore, *elected an honorary member*, xix. 152.

P

PAIRMAN, DR THOMAS WYLD, *elected a member*, iii. 54.
Original Communication—the treatment of diphtheria in children by antiseptic steam, viii. 36.

PASTEUR, PROFESSOR LOUIS, *elected a corresponding member*, iii. 141.

PATERSON, DR G. KEPPIE, *elected a member*, ix. 13.

PATERSON, DR JAMES VEITCH, *elected a member*, xx. 19.
Exhibits—a series of naked-eye specimens, mounted in glycerine jelly, illustrating the pathology of eye diseases, xx. 132.

PATON, DR D. NOËL, *elected a member*, iv. 38.
Original Communications—(1) action of the liver on fats, xv. 63; (2) on a method of estimating the interference with the hepatic metabolism produced by drugs, xx. 123. **Exhibits Specimen**—a large glioma, v. 118.

PEARSON, DR C. MOWBRAY
Exhibits—(1) slides demonstrating the presence of filaria nocturna in the mosquito, **xix.** 193; (2) the thoracic viscera of a patient in whom a persistent arterial duct had been diagnosed during life, **xix.** 193.

PEDDIE, DR H. ANDERSON, *elected a member*, **xii.** 211.

PETTENKOFFER, PROFESSOR MAX VON, *elected a corresponding member*, iii. 141.

PEYER, DR ALEXANDER, *elected a member*, xii. 51.

PHILIP, DR ROBERT W., *elected a member*, iii. 34.
Original Communications—(1) on poisonous products in food stuffs, **vi.** 242; (2) case of tubercular ulceration of the bladder, **viii.** 57; (3) personal impressions of Koch's treatment at Berlin, with notes of cases treated in the Royal Infirmary, Edinburgh, **x.** 31; (4) a thousand cases of pulmonary tuberculosis, with etiological and therapeutic considerations, **xi.** 104. **Exhibits Patient**—case of urticaria, **v.** 49. **Exhibits Specimens**—(1) nasal insufflator, **v.** 188; (2) describes method for the detection of bacilli of tubercle, **v.** 186; (3) membranous fragments passed *per urethram*, **viii.** 48; (4) an emulsion containing cod-liver oil and eucalyptus oil, **viii.** 48.

PLAYFAIR, DR JOHN
Original Communication—croupous pneumonia in children, **ix.** 202. **Exhibits Specimens**—(1) a pin impacted in the left bronchus, **vii.** 74; (2) a specimen of stenosis of the intestine, **ix.** 196; (3) kidneys, ureter, and bladder from a case of hydronephrosis, **x.** 74.

PRICE, DR EDMOND, *elected a member*, viii. 61.

PRINGLE, DR J. HOGARTH, *elected a member*, **v.** 132.

PROUDFOOT, DR THOMAS, *elected a member*, ix. 33.

PUCKLE, DR S. HALL, *elected a member*, v. 33.

PURVES, DR ROBERT BLACK, *elected a member*, xviii. 202.
Exhibits Patient—case of musculo-spiral paralysis, after operation, **xx.** 155. **Exhibits Specimen**—exostosis of femur, **xix.** 54.

R

RAINY, DR HARRY, *elected a member*, **xv.** 117.
Exhibits Patients—(1) case of paralysis agitans, **xv.** 229; (2) case of muscular dystrophy, **xviii.** 33. **Exhibits Specimens**—(1) specimen of achondroplasia, **xvii.** 73; (2) skiagrams of (*a*) tuberculous ankle, **xviii.** 205; (*b*) separation of lower epiphysis of humerus, **xviii.** 205; (*c*) fracture of femur, **xviii.** 206.

RICHARDSON, DR WILLIAM, *elected a member*, iv. 1.

RITCHIE, DR JAMES
Original Communications—(1) notes of a case of carcinoma of suprarenal capsules and lungs, **ix.** 67; (2) carcinoma of the splenic flexure of the colon, **xiv.** 50; (3) cases of opium poisoning, **xv.** 223; (4) carcinoma of the bones, **xv.** 253. **Exhibits Specimens**—(1) a stomach with hour-glass contraction, and a portion of the liver, **vi.** 192; (2) arsenical

wall papers, **vi.** 269; (3) a cystic kidney, **viii.** 35; (4) kidneys from a female of rheumatic constitution, **ix.** 179; (5) specimen of gastric ulcer, **ix.** 198; (6) a long hair which had been tied round the cervix-penis, **ix.** 14; (7) a perforated vermiform appendix, **xii.** 213; (8) a ruptured heart, **xiii.** 16; (9) a large polycystic kidney, **xiii.** 15; (10) carcinoma of the splenic flexure of the colon, **xiv.** 40.

RITCHIE, DR R. PEEL
Original Communications—(1) the remedies used by the Caffres to prevent blood-poisoning from anthrax, **vi.** 218; (2) notes on report of the departmental committee appointed to inquire into pleuro-pneumonia and tuberculosis, **viii.** 3.

RITCHIE, DR WILLIAM THOMAS, *elected a member*, **xx.** 19.

ROBERTSON, DR ARGYLL
Original Communication—valedictory address, **xvii.** 8. **Exhibits Patients**—(1) two patients illustrating the operation of ectropion, **iii.** 54; (2) case of enlargement and displacement of the lachrymal gland into the upper eyelid, **vi.** 224; (3) a patient from whose eye he had extracted the lens on account of a high degree of myopia, **xvi.** 55. **Exhibits Specimens**—(1) an eye removed for a melanotic sarcoma affecting the conjunctiva of the lid and globe, **iv.** 3; (2) a dark cataract, **viii.** 178; (3) Indian instruments for couching cataract, **xv.** 182; (4) a rare form of parasite, the filaria loa, **xvii.** 7.

ROBERTSON, DR G. M., *elected a memoer*, **x.** 26.

ROBERTSON, DR W. FORD, *elected a member*, **xiii.** 12.
Original Communication—on the pathogenesis of general paralysis of the insane, **xx.** 180.

ROBERTSON, DR W. G. AITCHISON, *elected a member*, **xii.** 18.
Original Communications—(1) the carbohydrates in dietetics, **xv.** 183; (2) activity of the saliva in diseased conditions of the body, **xix.** 141. **Exhibits**—a large tonsillar calculus, **xviii.** 3.

ROBSON, MR A. W. MAYO
Original Communication—on gastric hæmorrhage and its surgical treatment, **xx.** 76.

RONALDSON, DR R. MILLER, *elected a member*, **xiv.** 57.

RONALDSON, DR T. R.
Original Communication—tetanoid convulsions in an infant, operation, recovery, **ix.** 184.

ROSS, DR J. MAXWELL, *elected a member*, **ii.** 11.
Original Communication—sequelæ of tracheotomy occurring after the closure of the tracheal wound, **ii.** 38. **Exhibits Patients**—(1) patient with congenital tumour of sterno-mastoid, **ii.** 37; (2) two boys on whom tracheotomy had been performed, **iv.** 174. **Exhibits Specimens**—(1) epithelioma of larynx, **ii.** 62; (2) improved nasal bougies, **iv.** 182; (3) cocci and bacilli, **iv.** 181; (4) bacilli of tubercle, **iv.** 182; (5) a drawing of an animal organism removed from the ear of a native woman in India, **vi.** 3; (6) two reversible nasal saws, **vii.** 52; (7) larynx and trachea from a case of diphtheritic croup, **viii.** 192; (8) specimen of epithelioma of the larynx, **viii.** 226.

ROSS, DR JOSEPH CARNE, *elected a member*, **iii.** 54.

RUMBOLL, DR SYDNEY, *elected a member*, **vi.** 56.

RUSSELL, DR THOMAS, *elected a member*, **vii.** 153.

RUSSELL, DR WILLIAM, *elected a member*, **iii.** 54.
Original Communications—(1) case in which a loud splashing sound was produced synchronously with the cardiac action, **iv.** 245; (2) on empyema, **vi.** 89; (3) pathological report on Dr Taylor's case of ovariotomy, **ix.** 194; (4) on a characteristic organism of cancer, **x.** 42; (5) some practical results of the investigation of cholera in Germany, **xii.** 1: (6) pathological report, **xii.** 239; (7) the palliative treatment of jaundice from malignant obstruction, **xiv.** 175; (8) arterial hypertonus and arterio-sclerosis, their relations and significance, **xx.** 132. **Exhibits Patients**—(1) patient with empyema, **vi.** 76; (2) case of myxœdema, **xii.** 151; (3) case of floating kidney, **xvi.** 131; (4) case of displaced kidney, **xvi.** 131; (5) a patient after operation for mastoid disease, **xviii.** 110; case of myxœdema in the male, **xix.** 193. **Exhibits Specimens**—(1) a diseased heart, **ii.** 61; (2) a lung from a case of tuberculosis, **iii.** 153; (3) a portion of the brain from a case of tubercular meningitis, **iii.** 154; (4) a brain showing gummatous softening, **v.** 152; (5) lungs, kidneys, and testicle from a dropsical patient, **v.** 152; (6) heart and portion of a lung from an apical pneumonia, **v.** 152; (7) two specimens of carcinoma of stomach, **ix.** 65; (8) specimen of necrotic pneumonia, **ix.** 65; (9) a large hydronephrotic kidney, **ix.** 179; (10) lung with multiple sarcomatous tumours, **x.** 117; (11) annular stricture of colon at the splenic flexure, **x.** 133; (12) kidney with a large sarcomatous growth, **x.** 214; (13) casts illustrating diseases of lungs and liver, **x.** 213; (14) a series of pathological specimens, **xi.** 99; (15) sheep's thyroids, **xii.** 151; (16) specimen of advanced fatty infiltration of the heart, **xiii.** 17; (17) a gallstone undergoing disintegration, **xiii.** 17; (18) photographs of cases of lupus treated with tuberculin, **xiii.** 34; (19) a brain with a tumour, **xiv.** 17; (20) the lungs of two patients who had died of influenzal pneumonia, **xiv.** 155; (21) an impacted gallstone, **xiv.** 155; (22) an aneurism of the abdominal aorta, **xiv.** 155; (23) an ovarian tumour, **xiv.** 155; (24) photographs from a case of chylodrosis, **xiv.** 5; (25) specimen of hæmorrhagic pancreatitis, **xv.** 114; (26) abdominal aneurism, **xv.** 116; (27) the heart from an unusually rapid case of endocarditis, **xvii.** 97; (28) a stomach which had been operated on for perforation of a gastric ulcer, **xvii.** 97; (29) vermiform appendix, **xviii.** 193; (30) perityphlitis, **xviii.** 194; (31) a brain from a recent case of hemiplegia, **xix.** 193; (32) a brain from a long-standing case of hemiplegia, **xix.** 193.

RUTHERFORD, DR JAMES MAIR, *elected a member*, **xx.** 19.

S

SALT, DR ERNEST G., *elected a member*, **xiv.** 239.

SANDERS, DR GORDON, *elected a member*, **xii.** 18.

SAUNDERS, DR FREDERICK A., *elected a member*, **iii.** 187.

SCOTT, DR JAMES, *elected a member*, **xiv.** 154.

SCOTT, DR THOMAS R., *elected a member*, **iv.** 20.

SEMPLE, DR ANDREW, *elected a member*, **ii.** 59.

SEQUARD, PROFESSOR BROWN, *elected an honorary member*, iii. 141.

SHAND, DR JOHN

Original Communication—venesection as a remedy, x. 62. **Exhibits Patients**—(1) a patient who had suffered from a fistula of Steno's duct, iii. 34; (2) a patient with stump healed by the first intention, x. 133; (3) a patient on whom amputation of the thigh, under ice, had been performed, xi. 144; (4) relates a case of rapid healing under ice, xiii. 2.

SHENNAN, DR THEODORE, *elected a member*, xvi. 77.

Original Communication—case of cerebral abscess, xviii. 97. **Exhibits Specimens**—(1) the bacillus of Bubonic Plague, xvi. 179; (2) triradiate tænia saginata, xvii. 67; (3) legs from double amputation for senile gangrene, xvii. 68; (4) larynx, trachea, and lungs from a case of diphtheria, xvii. 72; (5) case of impacted gallstones in the common bile duct, xvii. 72; (6) tuberculosis of urethra, xviii. 111; (7) tubercular meningitis, xviii. 111; (8) cancrum oris, xviii. 111; (9) malignant pustule, xviii. 197; (10) sarcoma of cerebrum, xviii. 197; (11) testicle and epididymis, xviii. 197; (12) infarcts of kidney, xviii. 198; (13) tuberculous nodule in wall of heart, xviii. 198; (14) pulmonary tuberculosis in diabetes, xviii. 198; (15) a superficial ulcer, xviii. 198.

SHIELS, DR GEORGE FRANKLIN, *elected a member*, vi. 75.

SHIREFF, DR W. H., *elected a member*, ii. 74.

SILLAR, DR WILLIAM CAMERON, *elected a member*, xx. 2.

SIMMERS, DR WILLIAM, *elected a member*, xiii. 63.

SIMON, SIR JOHN, K.C.B., *elected an honorary member*, xv. 137.

SIMPSON, DR G. F. BARBOUR, *elected a member*, xx. 2.

SINCLAIR, DR A. J.

Exhibits Specimen—a rupture of the left ventricle, vii. 52.

SINCLAIR, DR ARTHUR H. H., *elected a member*, xx. 2.

SKIRVING, MR A. A. SCOT, C.M.G., *elected a member*, xvi. 77.

Exhibits Patients—(1) a case of ectopic perenial testicle, xvii. 141; (2) case of Charcot's disease, with double dislocation of hip, xviii. 132; (3) patient with complete necrosis of frontal bone, xviii. 132; (4) a man after operation for ruptured appendix, xix. 27; (5) a girl after subperiosteal resection of lower jaw, xix. 27. **Exhibits Specimens**—(1) extreme enlargement of ischial bursa with peculiar contents, xviii. 38; (2) rupture of kidney and liver, xviii. 39; (3) necrosis of frontal bone, xviii. 137; (4) tuberculosis of mamma, xviii. 137; (5) compound fracture of carpus, xviii. 137; (6) a necrosed lower jaw, xix. 32; (7) ruptured appendices, xix. 33; (8) brain showing track of Mauser bullet, xx. 151; (9) brain from a case simulating ruptured middle meningeal artery, xx. 152; (10) specimens illustrating bullet-impact, xx. 153; (11) stomach of a patient eight days after operation for perforated gastric ulcer, xx. 153; (12) large perineal tumour, xx. 153; (13) fragments of femur from the thigh of a Boer, xx. 153; (14) twisted thimble or sheath of Mauser bullet, xx. 153.

SLOAN, DR A. THOMSON, *elected a member*, iv. 70.

Original Communications—(1) the relation of goitre to menstruation and pregnancy, v. 154; (2) an extreme case of hystero-catalepsy, xi.

81 ; (3) on a self-inflicted bullet wound of the head, **xiii.** 45 ; (4) cardicentesis, with successful case, **xiv.** 24. **Exhibits Patients**—(1) two cases of empyema, **xi.** 70 ; (2) three patients after recovery from smallpox, **xiii.** 12 ; (3) a successful case of cardicentesis, **xiv.** 14. **Exhibits Specimen**—a new diabetic loaf, **v.** 68.

SMART, DR ANDREW
Original Communications—(1) a case of multiple neuritis, **vii.** 199 ; (2) on the treatment of anæmia and chlorosis by the chief iron preparations commonly in use, **xii.** 264. **Exhibits Patients**—(1) a woman trephined for basal hæmorrhage, **x.** 187 ; (2) case of critical alcoholic singultus, **x.** 211 ; (3) case of complete recovery from severe diabetes mellitus, **x.** 213 ; (4) case of hysterical paraplegia, **xii.** 264 and 293 ; (5) two cases of spastic disease, **xii.** 264 and 294 ; (6) patient who had been trephined for basal cerebral hæmorrhage, **xiii.** 157.

SMITH, DR JOHN
Original Communication—President's Valedictory Address, **ix.** 6.

SMITH, DR JOHN, Kirkcaldy, *elected a member*, **viii.** 61.

SMITH, DR J. CORMACK, *elected a member*, **xv.** 94.

SMITH, DR TOWERS-, *elected a member*, **xi.** 70.
Original Communication—the dietetic treatment of obesity, **xi.** 130.

SMITH, DR WILLIAM, *elected a member*, **x.** 1.

SMITH, DR W. RAMSAY, *elected a member*. **xii.** 18.
Original Communication—a case of acquired umbilical fæcal fistula, **xii.** 42. **Exhibits Specimen**—Lycoperdon giganteum, **xii.** 91.

SNELLEN, DR HERMANN, of Utrecht, *elected an honorary member*, **xix.** 152.

SPENCE, PROFESSOR JAMES, *minute regarding his decease*, **i.** 142.

STALKER, DR A. M., *elected a member*, **xii.** 169.

STEVENS, DR JOHN, *elected a member*, **xii.** 18.
Original Communication—on cold nitric acid test for albumen in the urine, **v.** 189.

STEWART, DR JAMES PURVES
Original Communication—pathological report on carcinoma of bones, **xv.** 255.

STEWART, DR JOHN STRUTHERS, *elected a member*, **iv.** 51.

STEWART, DR ROBERT, *elected a member*, **xii.** 19.

STEWART, PROFESSOR SIR THOMAS GRAINGER
Original Communications—(1) on a case of tapping the pericardium, and on tapping of the pleura in the treatment of cardiac disease, **iv.** 53 ; (2) valedictory address, **vii.** 2 ; (3) on the care of habitual drunkards, **viii.** 80. **Exhibits Patients**—(1) a man affected with deafness due to a lesion of the auditory centres, **iv.** 229 ; (2) a father and two sons suffering from paralysis, **iv.** 229 ; (3) a patient who had suffered from bronchiectasis, **vi.** 267 ; (4) case of myxœdema, **vii.** 49 ; (5) a female with remarkable nervous system, **vii.** 216 ; (6) a lad with acute bulbar symptoms, **vii.** 217 ; (7) case of gout with numerous tophaceous deposits

in the skin, **viii.** 22 ; (8) case of spasmodic paraplegia, **viii.** 189 ; (9) case of chorea major, **viii.** 190 ; (10) five cases of nervous disease, **ix.** 2 ; (11) case of paramyoclonus multiplex, **ix.** 73 ; (12) peculiar case of nervous disease, **xiii.** 2 ; (13) two cases illustrative of the use of erysipelas antitoxin, **xvi.** 53 ; (14) case of an undescribed form of skin disease, **xvi.** 54 ; (15) case of peculiar nervous affection, showing some analogy with Thomsen's disease, **xvii.** 175. **Exhibits Specimens**—(1) a specimen of sulphonal, **vii.** 220 ; (2) demonstrates the treatment of paralysis by suspension, **ix.** 3 ; (3) a syphilitic liver containing cicatrices and gummata, with waxy degeneration, **ix.** 83.

STEWART, DR WILLIAM, *elected a member*, **ix.** 13.

Original Communication — on epileptiform convulsions, **xvi.** 212. **Exhibits Patients** — (1) case of successful trephining for middle meningeal hæmorrhage, **xi.** 14 and 35 ; (2) case of division of ulnar nerve, **xi.** 93 ; (3) two patients who had been trephined, **xiii.** 126 ; (4) a case of compound subastragaloid dislocation of the foot, **xiii.** 63 ; (5) patient after drainage of dilated lateral ventricle, **xvi.** 207. **Exhibits Specimen**—a congenital malformation of the œsophagus, **xviii.** 112.

STILES, MR HAROLD J., *elected a member*, **viii.** 47.

Original Communications—(1) contributions to the surgical anatomy of the breast and axillary lymphatic glands, **xi.** 37 ; (2) tropical abscess of the liver treated by transthoracic hepatotomy, **xv.** 240 ; (3) drainage through the fourth ventricle in a case of acquired hydrocephalus, **xvii.** 73. **Exhibits Patients**—(1) a child with multiple and symmetrical lesions, **xv.** 55 ; (2) a child with arrest of development of both ears, **xv.** 54 ; (3) a child with well-marked cervical rib, **xv.** 54 ; (4) boy with paralysis and atrophy of right side of tongue, **xvi.** 64 ; (5) case after operation for extensive disease of the glands of the neck, **xvi.** 64 ; (6) case of distended gall-bladder, **xvi.** 63 ; (7) child with right-sided congenital inguinal hernia, **xvii.** 108 ; (8) child with double hydrocele, **xvii.** 108 ; (9) child with congenital dislocation of left hip, **xvii.** 108 ; (10) case of congenital dislocation of the hip, **xviii.** 33 ; (11) an infant with a large hydrencephalocele, **xviii.** 133 and 202 ; (12) a boy with extensive acute anterior polyomyelitis, **xviii.** 134 ; (13) a child with double coxa vara, **xviii.** 135 ; (14) case of tuberculous osteomyelitis of tibia, **xviii.** 204 ; (15) case of tuberculous disease of wrist, **xviii.** 205 ; (16) child after operation for severe deformity of foot, **xix.** 21 ; (17) case of ventral hernia, **xix.** 23 ; (18) infant after operation for acute intussusception, **xix.** 25 and 46 ; (19) boy after Mikulicz's operation for disease of the posterior tarsus, **xix.** 47 ; (20) a case of acute thyroid cachexia after excision of a suppurating goitre, **xix.** 48 ; (21) a patient after excision of a large lymphoma of the neck, **xix.** 49 ; (22) patient after avulsion of the entire scalp, **xix.** 50. **Exhibits Specimens** — (1) microscopic specimen from a case of malignant goitre, **xiv.** 17 ; (2) improved truss for infants, **xv.** 14 ; (3) an improved tonsilotome, **xv.** 60 ; (4) Beck's syringe for injecting Prof. Tavel's anti-diphtheric serum, and also the serum, **xv.** 120 ; (5) temporal bone and sequestrum from sphenoid, **xvi.** 76 ; (6) carcinoma of mamma and glands, **xvi.** 75 ; (7) the arm of a child in which the arteries were injected with mercury, **xvi.** 144 ; (8) skiagraphs of the same, **xvi.** 144 ; (9) the fractured femur, humerus, and clavicle of an infant, **xviii.** 38 ; (10) abdominal viscera, **xviii.** 135 ; (11) thoracic viscera, **xviii.** 136 ; (12) skiagram of tuberculous ankle, **xviii.** 205 ; (13) skiagram showing separation of lower epiphysis of humerus, **xviii.** 205 ; (14) skiagram showing fracture of femur, **xviii.** 206.

STIRLING, DR ROBERT, *elected a member*, **xi.** 14.

STIRLING, DR STEWART, *elected a member*, **x.** 106.
Exhibits Patients—(1) case of lichen, **xv.** 1 ; (2) case of lupus, **xv.** 2 ; (3) case of psoriasis, **xvi.** 196 ; (4) case of perforating ulcer of the foot, **xvi.** 132 ; (5) case of lupus vulgaris after nine months' treatment, **xvii.** 56.

STOCKMAN, PROFESSOR RALPH, *elected a member*, **x.** 74.
Exhibits Patient—case of facial paralysis, **xi.** 93.

STODDART-WALKER, DR A., *elected a member*, **xiv.** 14.

STRACHAN, DR JOHN
Original Communication—on the physiology of education, **ix.** 98.

STRUTHERS, PROFESSOR SIR JOHN, *elected a corresponding member*, **iii.** 141.
Original Communication—on separate acromion process, **xv.** Appendix 1. **Exhibits Specimens**—(1) specimen of rider's bone, **xi.** 70 ; (2) four specimens of foramen ovule of the heart, **xii.** 193 ; (3) specimens of appendix vermiformis, **xii.** 238.

STRUTHERS, DR JOHN, South Africa, *elected a member*, **xiv.** 154.

STURROCK, DR CHARLES A., *elected a member*, **xiii.** 63.

STURROCK, DR J. F., *elected a member*, **vi.** 191.

SYM, DR A. C., *elected a member*, **viii.** 61.
Exhibits Specimens—(1) a carcinomatous tumour of the bladder, **viii.** 35 ; (2) a brain with multiple hæmorrhages in the optic thalami, **ix.** 180 ; (3) a specimen from a case of Morbus Ludovici, **xix.** 53.

SYM, DR W. G., *elected a member*, **viii.** 120.
Original Communications—(1) case of hereditary amaurosis, **x.** 111 ; (2) on ophthalmia neonatorum, **xv.** 130 ; (3) a fragment of steel removed from the vitreous humour, **xvi.** 191. **Exhibits Specimen**—an eyeball affected with melanotic sarcoma, **xvi.** 179.

SYMINGTON, PROFESSOR JOHNSON
Original Communications—(1) the fold of the nates, **iii.** 49 ; (2) the external auditory meatus in the child, **iv.** 32 ; (3) on the position of the empty and distended bladder in the male child, **iv.** 98 ; (4) anatomical description of Dr Craig's case of cyclops malformation, **v.** 179 ; (5) notes on the position of the fluid in cases of pleuritic effusion, **v.** 61 ; (6) on certain physiological variations in the shape and position of the liver, **vii.** 53. **Exhibits Patient**—a young man with a cervical rib, **ii.** 26. **Exhibits Specimens**—(1) congenital absence of radius in fœtus, **ii.** 104 ; (2) a cervical rib, **ii.** 26 ; (3) prostate gland with large openings in the ducts, **ii.** 62 ; (4) a shoulder-joint with chronic rheumatic arthritis, resembling dislocation, **ii.** 104 ; (5) specimen of Colles' fracture, **ii.** 104 ; (6) a frozen section of prolapsus uteri, **iv.** 176 ; (7) specimen of acquired flat-foot, **iv.** 3 ; (8) disease of the vesiculæ seminales and testicles, **v.** 52 ; (9) specimens of genu-valgum and talipes equino varus, **v.** 178 ; (10) a horizontal section of the skull, **vii.** 75.

T

TAIT, PROFESSOR LAWSON
Original Communication—on abdominal section, **v.** 83. **Sends for Exhibition**—eight specimens illustrating "pyosalpinx," **iii.** 36.

TEACHER, DR C. C., *elected a member*, vi. 260.

TAYLOR, DR WILLIAM
Original Communications—(1) sequel to a case of ovariotomy, **ix.** 190; (2) restorative treatment of varicose veins, **x.** 133. **Exhibits Specimen**—a new instrument for the treatment of neuralgia, called the electro-thermogen, **xvii.** 141.

TEMPLEMAN, DR CHARLES
Original Communications—(1) two hundred and fifty-eight cases of suffocation of infants, **xi.** 210; (2) two rare cases of sudden death in medico-legal practice, **xii.** 20; (3) strangulation and hanging, **xii.** 240.

THIN, DR ROBERT, *elected a member*, **x.** 26.

THOM, DR ALEXANDER, *elected a member*, iii. 141.
Original Communications—(1) a case of left facial paralysis, with strabismus, **iv.** 152; (2) tracheotomy in children, **vii.** 235.

THOMPSON, DR JOHN ANDREW DOUGLAS, *elected a member*, **xx.** 130.

THOMSON, MR ALEXIS, *elected a member*, **vii.** 1.
Original Communications—(1) personal experiences in the treatment of enlarged prostate, **xvii.** 188; (2) stenosis of the small intestine after strangulated hernia, **xx.** 110. **Exhibits Patients**—(1) case of syringomyelia, **xii.** 238; (2) case of extra-peritoneal rupture of the bladder, **xii.** 264 and 292; (3) two patients after operation for middle meningeal hæmorrhage, **xiv.** 2; (4) two cases after operation for trigeminal neuralgia, **xv.** 56; (5) case after removal of part of fifth nerve for neuralgia, **xv.** 229; (6) case of plastic operation of the face, **xv.** 137; (7) case after operation for perforated gastric ulcer, **xv.** 138; (8) a case after excision of pylorus for cancer, **xv.** 227; (9) two cases of perforating ulcer of the foot, **xv.** 137; (10) case after operation for stricture of small intestine, **xvi.** 177; (11) case of lumbar hernia, **xvi.** 177; (12) case of inoperative melanotic sarcoma, **xvi.** 65; (13) infant with shortening of femur, **xvi.** 65; (14) case of compound depressed fracture of the skull with localised cortical symptoms, **xvii.** 176; (15) patient after removal of pyloric end of stomach, **xviii.** 1; (16) patient after enterectomy, **xx.** 149; (17) patient after complete extirpation of larynx, **xx.** 20; (18) patient after removal of middle two-thirds of tibia, **xx.** 47. **Exhibits Specimens**—(1) a stump showing bulbous enlargement of the nerves, **vi.** 78; (2) a conical stump with a similar condition of the nerves, **vi.** 78; (3) specimen of overgrowth of the skull following the distribution of the fifth nerve, **x.** 3; (4) a large fibroma of the dura mater, **x.** 75; (5) two cases of rupture of the gut from violence, **x.** 214; (6) case of intussusception high up in jejunum, **x.** 215; (7) specimen from a case of fatal perforative appendicitis, **xii.** 212; (8) hydatic cysts removed from the left lobe of the liver, **xvii.** 24; (9) a segment of small intestine, presenting a circular zone of necrosis, **xvii.** 25; (10) hydro-nephrotic kidney, **xvii.** 62; (11) oxalate of lime calculus removed from ureter, **xvii.** 62: (12) intestines from a case of intestinal obstruction in a newly-born infant, **xvii.** 109; (13) multiple cartilaginous loose bodies from the knee-joint, **xx.** 107; (14) a deformed shaft of tibia, **xx.** 56; (15) a glass-barrelled syringe, suitable for irrigating or aspirating, **xx.** 154.

THOMSON, DR H. TORRANCE, *elected a member*, **xx.** 2.

THOMSON, DR JOHN, *elected a member*, **vi.** 56.
Original Communications—(1) on infantile respiratory spasm (con-

genital laryngeal stridor), **xi.** 196 ; (2) a case of sporadic cretinism, **xiii.** 65 ; (3) on congenital spasm, **xvi.** 182 ; (4) on the diagnosis and prognosis of certain forms of imbecility in infancy, **xvii.** 81. **Exhibits Patients**—(1) case of myxœdema, **vii.** 49 ; (2) case of favus, **ix.** 13 ; (3) case of progressive idiopathic muscular atrophy, **ix.** 34 ; (4) two cases of habit spasm, **ix.** 143 ; (5) case of lesion in region of right crus cerebri, **ix.** 144 ; (6) case of spasmodic cretinism, **ix.** 145 ; (7) case of pediculosis of the eyelashes, **x.** 2 ; (8) case of Addison's keloid, **x.** 157 ; (9) two children with chronic cerebral lesions, **x.** 210 ; (10) child with marked pulsation in the episternal notch, **xi.** 93 ; (11) case of congenital laryngeal stridor, **xi.** 185 ; (12) girl with unequal development of the lower extremities, **xi.** 186 ; (13) two cases of sporadic cretinism, **xii.** 144 ; (14) case of myxœdema, **xii.** 151 ; (15) case of congenital defect of thorax, **xiv.** 39 ; (16) case of elephantiasis of the neck, etc., **xv.** 52 ; (17) case of deformity of hands and fingers, **xv.** 51 ; (18) case of sporadic cretinism, **xvi.** 56 ; (19) case of chronic enlargement of both parotids, **xvi.** 125 ; (20) patient with hemiatrophy of the tongue, **xviii.** 68. **Exhibits Specimens**—(1) a supernumerary costal cartilage, **ix.** 149 ; (2) cast and photograph of congenital absence of radius, **ix.** 5 ; (3) drawings and specimens of a frozen section of spinal column, **ix.** 197 ; (4) portion of small intestine, showing a Meckel's diverticulum, **x.** 215 ; (5) photographs of a case of cretinism under thyroid treatment, **xiii.** 65 ; (6) specimens of congenital hypertrophy of the pylorus and stomach wall, **xvi.** 179 ; (7) brain of a child with hemiparesis and tremour of left arm, **xvii.** 70 ; (8) a congenital malformation of œsophagus, **xviii.** 112.

THYNE, DR THOMAS JACKSON, *elected a member*, **xvii.** 101.

TOD, DR JOHN, *elected a member*, **xv.** 1.

TROUP, DR FRANCIS, *elected a member*, **iii.** 34.
Original Communication—the diagnosis of early phthisis by the microscope, **vii.** 206. **Exhibits Specimens**—(1) microphotographs of constituents of sputum in disease, **v.** 3 ; (2) two specimens of thoracic aneurism, **viii.** 48 ; (3) an intestinal concretion, **ix.** 14.

TURNBULL, DR FREDERICK JOHN, *elected a member*, **xvi.** 38.

TURNER, DR DAWSON
Original Communications—(1) on electro-diagnosis by means of the urine, **xi.** 252 ; (2) demonstration on the therapeutic methods employed in electricity, **xiii.** 62 ; (3) on the physics of aneurism, **xiii.** 267 ; (4) on the action of iodine, **xiii.** 201 ; (5) on electrical theory of the physiology of vision, **xiv.** 18 ; (6) localisation of foreign bodies by X-rays, **xvii.** 99. **Exhibits Specimens**—(1) rheostat, and a new form of galvanic cell, **xi.** 14 ; (2) a universal electric battery, **xi.** 103 ; (3) a bichromate of potash cell, **xii.** 20 ; (4) apparatus for static electricity, **xiii.** 62 ; (5) gives demonstration of Röntgen process of photography, **xv.** 95 ; (6) stereoscopic Röntgen photographs of injected blood-vessels, **xvii.** 183 ; (7) gives an experiment of Shelford Bedwell's on a subjective colour phenomenon, **xvii.** 183 ; (8) demonstrates an improved Röntgen apparatus, **xx.** 63 ; (9) Röntgen photograph of renal calculi, **xx.** 108.

TURNER, DR LOGAN
Original Communication—on the displacements of the semi-lunar cartilages of the knee-joint, **xiii.** 223. **Exhibits Patients**—(1) two patients exemplifying operation for displacement of the semi-lunar cartilage, **xiii.** 221 ; (2) case of laryngeal phthisis, **xv.** 107 ; a case of asthma associated with chronic suppuration in the left frontal and maxillary

sinuses, cured by a radical operation, **xix.** 192. **Exhibits Specimens**—(1) Kirstein's autoscope, **xv.** 179; (2) exhibits and demonstrates Simpson's method of exhibiting museum specimens, **xvi.** 138; (3) a skull showing an unusual arrangement of the frontal sinuses, **xviii.** 76; (4) a larynx from a case of primary laryngeal diphtheria, **xx.** 154; (5) two casts showing congenital malformation of the auricle, **xx.** 154.

TUKE, SIR JOHN BATTY

Original Communications—(1) Note on the anatomy of the pia mater, **i.** 118; (2) valedictory address, **xix.** 3.

TUKE, JR., DR JOHN BATTY, *elected a member*, **v.** 132.

U

UNDERHILL, DR T. EDGAR, *elected a member*, **iv.** 51.

URQUHART, DR ALEX. REID, *elected a member*, **xii.** 51.

Original Communication—two cases of Raynaud's disease, **xiv.** 40.

V

VATVE, DR GOPAL GOVIND, *elected a member*, **xiv.** 57.

W

WALKER, DR NORMAN

Original Communications—(1) what constitutes rodent ulcer, **xii.** 199; (2) the commoner varieties of lupus vulgaris, **xiii.** 180. **Exhibits Patients**—(1) a man with an elastic skin, **xi.** 37; (2) case of acquired syphilis in a child, **xii.** 1; (3) cases of rodent ulcer, **xiii.** 33 and 221; (4) case of lupus erythematosus, **xiv.** 212; (5) cases of lichen, **xiv.** 60 and 241; (6) case of Keratosis pilaris, **xiv.** 155; (7) case of peculiar linear eruption, **xiv.** 155; (8) case of eczema, **xiv.** 212; (9) four cases of lichen planus, **xv.** 56; (10) case of erythema, **xv.** 2; (11) case of leucoderma, **xv.** 56; (12) case of ulceration of the tongue, **xv.** 56; (13) case of facial warts, **xv.** 141; (14) case of lupus vulgaris, **xvi.** 60; (15) case of lupus erythematosus, **xvi.** 60; (16) case of alopecia, **xvi.** 59; (17) case of alopecia areata, **xvi.** 133; (18) case of ichthyosis, **xvi.** 59; (19) case of ringworm of scalp, **xvi.** 133; (20) tinea circinata, **xvi.** 134; (21) cases of scleroderma, **xvi.** 196 and 207; (22) case of vitiligo, **xvi.** 208; (23) case of lichen planus, **xvii.** 95; (24) an unusual tertiary syphilide, **xvii.** 95; (25) cases of lichen scrofulosorum, **xvii.** 101 and 185; (26) case of folliculitis decalvans, **xvii.** 185; (27) case of acne necrotica, **xix.** 45; (28) two cases of ichthyosis, **xix.** 45; (29) cases of favus and lupus treated by exposure to the X-rays, **xix.** 45; (30) case of acne varioliformis, **xix.** 55; (31) a patient with an ulcerated arm, **xix.** 73; (32) a case resembling lupus erythematosus, **xix.** 191; (33) a case of rupia, **xix.** 191; (34) a case of ringworm of the head, **xix.** 192; (35) case of morphœa, **xx.** 48; (36) case of favus, **xx.** 49; (37) case of Bazin's disease, **xx.** 130; (38) case of lupus being treated by X-rays, **xx.** 131; (39) case of rodent ulcer being treated by X-rays, **xx.** 131; (40) case of ringworm being

treated by X-rays, **xx.** 156; (41) four cases of alopecia areata, **xx.** 157. **Exhibits Specimens**—(1) demodix folliculorum *in situ*, **xiv.** 5; (2) ringworm of the scalp, **xv.** 141; (3) germs of eczema, **xv.** 141; (4) a handy method of using the flash-light in photography, **xv.** 152; (5) ringworm of beard, **xvi.** 74; (6) skin with ringworm, **xvi.** 74; (7) comedo showing the bacillus, **xvi.** 211; (8) specimen of rodent ulcer, **xvi.** 134; (9) sections from a case of lupus erythematosus, **xvii.** 186.

WALLACE, MR DAVID, C.M.G., *elected a member*, **vii.** 30.

Original Communications—(1) the electric cystoscope, **ix.** 35; (2) motor paralysis resulting from the hypodermic injection of ether, **ix.** 149; (3) cystoscopy, notes from an experience of upwards of fifty cases, **x.** 229; (4) on cervical ribs, with example in living subject, **xi.** 24; (5) on the subject of treatment of general paralysis of the insane, **xi.** 167; (6) cystoscopy in relation to tumours of the bladder, **xii.** 28; (7) notes on a peculiar case of stricture of the œsophagus, **xiv.** 20; (8) notes on the surgery of the bladder, **xiv.** 233; (9) on asepsis in genito-urinary surgery, **xvi.** 156; (10) on movable kidney, **xviii.** 122. **Exhibits Patients**—(1) patient with cervical rib, **xi.** 27; (2) a patient on whom had been performed the double operation of œsophagotomy and gastrotomy, **xiii.** 2; (3) case of removal of malignant goitre, **xiv.** 14; (4) a patient after gastrostomy, **xiv.** 14; (5) case after operation for cerebral abscess, **xv.** 52; (6) a patient after trephining, **xv.** 140; (7) case of tubercular disease of the tarsus, **xv.** 139; (8) patient after operation for bilocular hydrocele, **xvi.** 128; (9) patient after removal of a pyloric tumour, **xix.** 21. **Exhibits Specimens**—(1) vesical calculus with nucleus of paraffin, **xii.** 19; (2) a vermiform appendix, **xii.** 19; (3) a tubercular kidney, **xii.** 212; (4) epithelioma of larynx, **xv.** 58; (5) malignant double stricture of œsophagus, **xv.** 58; (6) specimen of rectal carcinoma, **xvi.** 138; (7) a uric acid calculus, **xvii.** 64; (8) a red rubber catheter 10 inches in length removed from the bladder, **xvii.** 64; (9) a renal calculus, **xviii.** 74; (10) two kidneys with calculi *in situ*, **xviii.** 74; (11) three tubercular kidneys, **xviii.** 74; (12) a kidney with malignant adenoma, **xviii.** 75; (13) hypertrophed prostate, **xviii.** 75; (14) a fibro-adenoma from prostate, **xviii.** 76; (15) dermoid cyst (Ranula), **xviii.** 76; (16) a large gallstone, **xviii.** 76; (17) tumour of pituitary body, **xix.** 28; (18) cerebellum with calcareous concretion, **xix.** 29; (19) skull, fracture of, **xix.** 29; (20) tumour of pyloric end of stomach, **xix.** 31; (21) impacted calculus in ureter, **xix.** 31; (22) a radius with old-standing fracture, **xix.** 74; (23) specimen of enlarged prostate, **xx.** 9.

WALLEY, PRINCIPAL THOMAS

Original Communication—animal tuberculosis in relation to consumption in man, **vii.** 110.

WATERSTON, DR DAVID, *elected a member*, **xx.** 2.

WATSON, DR DOUGLAS CHALMERS, *elected a member*, **xiii.** 230.

Original Communication—the etiology of gout, **xviii.** 148; exhibits a thermal cabinet, **xx.** 29; gives demonstrations on the comparative pathology of ataxia, **xx.** 62 and 108.

WATSON, DR P. HERON

Original Communication—valedictory address, **i.** 36. **Exhibits**—(1) an undeveloped and undescended testicle, with the sac, **i.** 84; (2) a bullet, with the portion of the alveolar ridge of the lower jaw, **i.** 143; (3) an epithelioma of the tongue and floor of the mouth, **i.** 143; (4) a portion of the lower jaw of a young woman, **i.** 143; (5) a hydrocele sac,

i. 144; (6) a specimen of fimbriated synovial membrane, i. 144; (7) sends for exhibition (*a*) multilocular ovarian cyst, ii. 62; (*b*) large piece of omentum, ii. 105; (8) a uric acid calculus, iii. 6; (9) an oxalate of lime calculus, iii. 6; (10) fourteen calculi from the bladder of a man, æt. 78, iii. 6; (11) right arm, scapula, and half of the clavicle, iii. 56; (12) a cystic tumour of the ramus of the jaw, iii. 56.

WATT, DR N. PARK, *elected a member*, xviii. 33.

WEBSTER, DR A. DOUGLAS, *elected a member*, iii. 34.
Exhibits—a hot-air spray for volatile medicaments, xix. 33.

WELSH, DR DAVID ARTHUR, *elected a member*, xx. 2.
Original Communication—on a case of multiple tumours of unusual type, xx. 18. **Exhibits**—(1) a series of lungs, illustrating the formation of cavities in pulmonary tuberculosis, xviii. 194; (2) a series of pathological specimens illustrating tuberculous lesions in different organs, xviii. 194.

WEST, DR CHARLES, *elected an honorary member*, iv. 103.

WHITTON, DR ALFRED BELL, *elected a member*, vi. 19.

WILSON, DR GEORGE R., *elected a member*, xii. 19.

WILSON, DR JAMES, *elected a member*, xx. 2.

WILSON, DR JAMES LOCKHART, *elected a member*, vii. 73.

WILSON, DR J. LYON, *elected a member*, iii. 1.

WILSON, DR WILLIAM, *elected a member*, iv. 38.

WOOD, DR A. F., *elected a member*, xv. 13.

WOOD, DR OSWALD, *elected a member*, v. 83.

WOOD, DR RUSSELL E., *elected a member*, iii. 34.

WOODHEAD, PROFESSOR G. SIMS, *elected a member*, iii. 34.
Original Communications—(1) note on Weigert's method of embedding and staining nerve centres, v. 118; (2) on the etiology of tumours, vii. 30; (3) two epidemics of sore-throat, and their relation to the milk supply, vii. 222; (4) notes on alcohol and its medical and scientific aspects, xx. 197 and 227. **Exhibits Specimens**—(1) gives a demonstration on the methods of cultivating micro-organisms, iii. 57; (2) kidneys of a young man, v. 120; (3) a cystic tumour of the kidney, v. 121; (4) the larnyx, pleura, and chest-wall, from a case of empyema, vi. 78; (5) specimens of tubercular pleurisy, vi. 78; (6) portions of diseased lung exhibiting tubercular invasion of the bronchi, vi. 196; (7) microscopic sections of the kidney, spleen, and liver, from a case of acute purpura hæmorrhagica, vi. 197.

WRIGHT, DR W. FRASER, *elected a member*, xiii. 220.

WYLIE, DR HAMILTON, *elected a member*, iii. 34.

WYLLIE, PROFESSOR JOHN
Exhibits Patient—case of temporo-sphenoidal abscess, xvi. 124.

Y

YOUNG, DR JAMES
Exhibit—specimens of ruptured heart, **ii.** 101.

YOUNG, DR J. Y. SIMPSON, *elected a member*, **xi.** 14.

YOUNG, DR P. A.
Exhibits—chart of abnormally low temperature, **iv.** 223.

YOUNG, DR R. J. ERSKINE, *elected a member*, **xii.** 19.

PART II

SUBJECTS

A

ABDOMINAL—Section, discussion on, **v.** 83; for relief of intussusception, **viii.** 74. **Surgery**, recent working by Sir J. Halliday Croom, **x.** 76; some mistakes in the technique of, by Dr J. Rutherford Morison, **xii.** 175. **Viscera**, relations of, in the infant, by Dr J. W. Ballantyne, **x.** 140; aneurism, two exhibited, **x.** 213.

ABSCESS—Cerebral, due to ear disease, diagnosis and treatment of, by Dr P. M'Bride and Mr A. G. Miller, **vi.** 114, 129; cases of, exhibited, **vi.** 225; **xii.** 195; patients exhibited after operation, **xv.** 52; **xvi.** 124; specimens exhibited, multiple, **xviii.** 77; in temporo-sphenoidal lobe, **xiv.** 244; secondary to an injury of the head, **xx.** 58; illustrating certain forms of aphasia, by Mr Alexander Miles and Dr T. Shennan, **xviii.** 97; cold, treatment of, by Mr F. M. Caird, **ix.** 198. **of Antrum**, case exhibited, **x.** 211. **of Liver**, specimens exhibited, **ix.** 83; **x.** 157; treated by trans-thoracic hepatotomy, by Dr Byrom Bramwell and Mr H. J. Stiles, **xv.** 240. **of Pancreas**, specimen exhibited, **xiv.** 155. **Psoas**, patient exhibited, **xx.** 48.

ACATHOMA, patient exhibited, **xv.** 226.

ACCUMULATORS, electric, exhibited, by Dr P. M'Bride, **iv.** 2.

ACHONDROPLASIA, specimen exhibited, **xvii.** 73; life-size cast of a man exhibited, **xvii.** 186.

ACID—Carbolic, poisoning by, **ii.** 75. **Chromic**, for warts of the genitals, **ii.** 72.

ACIDS AND ALKALIES, the action of, on the secretions of the body, by Dr A. Lockhart Gillespie, **xiii.** 234.

ACNE—Keloid, cases exhibited, **xi.** 144; **xx.** 2; bacillus of, exhibited, **xvi.** 211. **Necrotica**, case exhibited, **xix.** 45; varioliformis, case exhibited, **xix.** 55.

ACROMION PROCESS, separate, simulating fracture, by Professor Sir John Struthers, **xv.**, Appendix I., 1.

ACTINOMYCES FUNGUS, a microscopic demonstration of, **xx.** 158.

ACTINOMYCOSIS, case exhibited, **xv.** 50.

ADDISON'S DISEASE, case of, by Dr Church, **iii.** 84; case of, exhibited, **viii.** 146; water-colour drawing, from a case of, exhibited, **xvii.** 184;

microscopic and naked-eye specimens from a case of, exhibited, **xvii.** 184; case of, exhibited, **xviii.** 67; mother and family of four children suffering from, exhibited, **xviii.** 109.

ADDISON'S KELOID, case of, exhibited, **x.** 157.

ADENOID GROWTHS, specimens of, from the naso-pharynx, exhibited, **iv.** 224; **v.** 132; of male mamma, exhibited, **iv.** 226.

ANDENOMA, malignant, of scalp, photograph of, exhibited, **xiv.** 207; malignant, of kidney, exhibited, **xviii.** 75; of prostate, exhibited, **xviii.** 76.

ADIPOSIS DOLOROSA, patient exhibited, **xix.** 152.

AFRICA, SOUTH, experience with the medical department of the army, by Professor John Chiene, C.B., **xx.** 30; Edinburgh Hospital in, and its work, by Dr F. D. Boyd and Mr George L. Chiene, **xx.** 63.

AGRAPHIA, by Dr William Elder, **xvi.** 84.

AGROMEGALY, in a giantess, patient exhibited, **xiii.** 13.

ALBUMOSES, from urine, exhibited, **xv.** 112.

ALCOHOL, in its medical and surgical aspects, by Professor G. Sims Woodhead, **xx.** 197; by Professor Sir T. R. Fraser, **xx.** 210.

ALCOHOLIC Singultus, case of, exhibited, **x.** 211. **Paralysis**, case of, exhibited, **viii.** 2. **Patients**, statistics concerning, by Dr A. Lockhart Gillespie, **xiv.** 268.

ALIMENTATION, hypodermic, by Mr F. M. Caird, **xii.** 249.

ALKALIES AND ACIDS, the action of, on the secretions of the body, by Dr A. Lockhart Gillespie, **xiii.** 234.

ALOPECIA, cases exhibited, **xvi.** 59, 133; **xx.** 157; bacillus of, exhibited, **xvi.** 211.

AMAUROSIS, hereditary, case of, by Dr W. G. Sym, **x.** 111.

AMPUTATION, at shoulder-joint, **iii.** 55; of upper extremity and shoulder-girdle, patient exhibited, **xvi.** 62; at hip-joint, five cases of, by Dr Roderick Maclaren, **iii.** 116; case of, exhibited, **iii.** 141; of both legs above the knees, patient exhibited, **xvi.** 129; at the knee for malignant ulcer, patient exhibited, **xvi.** 61; of foot, partial, cases of, exhibited, **vii.** 2; should they be abandoned? **vii.** 15; Chopart's, case of, exhibited, **xi.** 126.

AMYLOID disease of spleen, unique specimen exhibited, **xvi.** 71.

ANÆMIA—Pernicious, case of, exhibited, **vii.** 74; transfusion of human blood in the treatment of, by Dr D. J. Brakenridge, **xi.** 217; the antiseptic treatment of, by Dr G. A. Gibson, **xi.** 258; iron in the treatment of, by Dr A. Smart, **xii.** 264.

ANÆSTHESIA, of upper extremity, case exhibited, **ix.** 3.

ANCHYLOSIS, of lower jaw, operation for, patient exhibited, **xiv.** 16; osseous, of elbow joint, specimen exhibited, **xvii.** 70.

ANCHYLOSTOMA duodenale, specimen exhibited, **xiii.** 15; **xvi.** 211.

ANEURISM, of ductus arteriosus, i. 68; of left common carotid, i. 34; of pulmonary artery, iii. 156; aortic, aorta and trachea from a case of rupture of, exhibited, iv. 2; of abdominal aorta, specimen exhibited, iv. 71; of thoracic aorta, specimen exhibited, iv. 227; cirsoid, patients exhibited, v. 66, 184; of large arteries of brain, exhibited, v. 118; of internal carotid, exhibited, v. 186; Charcot's miliary, exhibited, v. 186; popliteal, operative treatment of, by Professor Annandale, v. 34; of right posterior cerebral artery, exhibted, vi. 2; thoracic, cast of, exhibited, vii. 74; thoracic, specimens exhibited, viii. 48; of the aorta, specimens exhibited, viii. 226; of aorta, drawing of, exhibited, ix. 65; of heart, exhibited, x. 106; of abdomen, two exhibited, x. 213; of aorta, specimen exhibited, xiii. 221; physics of, notes on, by Dr Dawson Turner, xiii. 267; perforating superior vena cava, specimen exhibited, xiv. 40; case of, original communication by Dr A. Bruce, xiv. 60; of abdominal aorta, specimen exhibited, xiv. 155; opening into superior vena cava, photographs of, exhibited, xiv. 156; of aorta, specimen exhibited, xv. 62; cirsoid, patient exhibited, xv. 108; abdominal specimen exhibited, xv. 116; aortic, cases of, exhibited, xvi. 38, 68; dissecting, case exhibited, xvi. 38; of left ventricle of heart, specimen exhibited, xvii. 187; aortic, rupture of, three specimens exhibited, xvii. 26; specimen exhibited, xvii. 71; patient exhibited, xvii. 107; abdominal, specimen exhibited, xviii. 78; of one of the sinuses of Valsalva, specimen exhibited, xviii. 112; femoral, note on a case of ruptured, in which the common femoral artery was tied, by Mr F. M. Caird, xix. 75; of aorta, patient exhibited, xx. 43.

ANGIOMA, plexiform, patient exhibited, xv. 108; case of, exhibited, xvi. 55.

ANIMAL organism from the ear, exhibited, vi. 3.

ANKLE CLONUS, in relation to the height of the individual, by Dr Alex. James, ii. 63.

ANKLE-JOINT, disease of, i. 67; tuberculous, skiagram of, exhibited, xviii. 205.

ANKYLOSTOMA duodenale, specimens exhibited, xiii. 15; xvi. 211.

ANTHRAX, remedies used by Caffres to prevent blood-poisoning from, by Dr R. Peel Ritchie, vi. 218.

ANTIMONY, action of, in diseases of skin, by Dr Allan Jamieson and Dr A. Home Douglas, xi. 153.

ANTISEPTICS, an accidental experiment with, by Dr John Duncan, i. 80; treatment of pernicious anæmia, by Dr G. A. Gibson, xi. 258.

ANTITOXIN, for diphtheria, patient exhibited, xiv. 14; erysipelas, patients treated by, exhibited, xvi. 53.

ANTIVENIN, value of, by Professor Sir T. R. Fraser, xiv. 212.

ANTRUM, superior maxillary, empyema of, by Dr P. M'Bride, vii. 99; abscess of, case exhibited, x. 211.

ANUS, artificial, specimen exhibited, viii. 47.

AORTA, aneurism of, specimens exhibited, viii. 226; xiii. 221; xv. 62; drawing of, exhibited, ix. 65; abdominal, aneurism of, specimen exhibited, xiv. 155; tumour adhering to, exhibited, xix. 196.

AORTA AND TRACHEA, with rupture of aortic aneurism, exhibited, **iv.** 2.

AORTIC—Disease, specimens of, exhibited, **vi.** 77. **Regurgitation**, cardiograms and sphygmograms of, exhibited, **vi.** 271.

APHASIA, brain and heart from a case of, exhibited, **iii.** 208 ; a case of cerebral abscess illustrating certain forms of, by Mr A. Miles and Dr T. Shennan, **xviii.** 97 ; auditory, case exhibited, **xviii.** 205 ; brain from a case of, exhibited, **xix.** 193.

APOPLEXY, heart and brain from a case of, exhibited, **i.** 69 ; pulmonary, lungs and heart from a case of, exhibited, **iv.** 2 ; cerebral, boy exhibited after being trephined for, **xx.** 150.

APPENDICITIS, recovery after operation, patient exhibited, **xii.** 211 ; specimen from a case of perforative, exhibited, **xii.** 212 ; removal of appendix vermiform for, two cases exhibited, **xiii.** 231 ; specimen exhibited, **xiv.** 243 ; **xviii.** 193 ; recurring, patient exhibited, **xviii.** 64.

APPENDIX — Vermiform, perforated, specimens exhibited, **xii.** 212, 213 ; **xvi.** 136 ; disease of, and its results, by Dr J. O. Affleck, **xii.** 214 ; operation for inflammation of, by Dr John Duncan, **xii.** 227 ; specimen exhibited, **xii.** 19 ; removal of, for acute appendicitis, two cases exhibited, **xiii.** 231 ; successful removal of, patient exhibited, **xiv.** 57 ; lantern demonstration of the pathology of, by Mr F. M. Caird, **xv.** 141 ; specimens exhibited, **xvii.** 27, 63 and 108 ; **xix.** 33 ; ruptured, patients exhibited after operation for, **xviii.** 196 ; **xix.** 27.

ARSENICAL wall papers, exhibited, **vi.** 269.

ARTERIES, calcareous degeneration of, by Dr Byrom Bramwell, **xv.** 97 ; contraction of, cause of muscle atrophy in tubercular joint disease, by Mr A. G. Miller, **xv.** 231.

ARTERIOGRAPH, exhibited by Dr Milne Murray, **iv.** 228 ; tracings from carotid of a rabbit by means of, **iv.** 228.

ARTERIO-SCLEROSIS, by Dr William Russell, **xx.** 132.

ARTERY, innominate, compression of, by Professor Annandale, **v.** 69 ; femoral, specimen exhibited, **vi.** 264 ; regurgitation of pulmonary, by Dr F. D. Boyd, C.M.G., **xviii.** 41.

ARTHRECTOMY of the knee-joint, by Mr A. G. Miller, **xii.** 11.

ARTHRITIS, rheumatoid, patient exhibited, **xvii.** 178.

ARYTENO-EPIGLOTTIC FOLDS, way of raising, &c., by Dr James Foulis, **viii.** 124.

ASCITIC FLUID, specimen exhibited, **i.** 161.

ASEPSIS, in genito-urinary surgery, by Mr David Wallace, C.M.G., **xvi.** 156.

ASPIRATOR syringe, exhibited, **viii.** 22.

ASTHMA, influence of nitrites upon, **vi.** 144 ; associated with chronic suppuration in the frontal and maxillary sinuses, cured by a radical operation, **xix.** 192.

ASTRAGALUS, with perforating ulcer, specimen exhibited, **viii.** 24 ; fracture of, radiograph exhibited, **xx.** 57.

ATAXIA, Friedreich's, cases exhibited, **x.** 116; **xiii.** 2; **xviii.** 67; **xx.** 4; locomotor, specimens of the cord from a case of, exhibited, **xvii.** 60; patient with tabetic club-foot, exhibited, **xvii.** 105; locomtor, cases exhibited, **xx.** 19, 45; comparative pathology of, demonstration of, by Dr Chalmers Watson, **xx.** 62, 108.

ATHETOSIS, case of, exhibited, **vi.** 268; double, case exhibited, **xviii.** 65.

ATLO-AXOID articulation, disease of, specimen exhibited, **xv.** 57.

ATROPHY, patient suffering from, of left arm, exhibited, **v.** 173; photographs of, exhibited, **v.** 174; optic, case of, exhibited, **vii.** 74; muscular, in tubercular joint disease, by Mr A. G. Miller, **xv.** 231; idiopathic muscular, case exhibited, **xvi.** 132; of tongue, case exhibited, **xvi.** 64; myopathic muscular, demonstrated, **xvi.** 15; progressive muscular, sections from spinal cord, in a case of, exhibited, **xvi.** 70; **xviii.** 205; **xx.** 154; progressive muscular, patients exhibited, **xvii.** 104; **xix.** 44; **xx.** 146; acute yellow, liver, uterus, and stomach, from a case of, exhibited, **xix.** 194.

AURICLES, action of, in health and disease, by Dr G. A. Gibson, **i.** 86; congenital malformation of, case exhibited, **xviii.** 68; casts showing congenital malformation of, exhibited, **xx.** 154.

AUTOSCOPY, Kirkstein's method of, demonstrated by Dr Logan Turner, **xv.** 179.

AXILLA, melanotic sarcoma of, specimen exhibited, **xvi.** 39; carcinoma of, specimen exhibited, **xvi.** 75; fatty tumour of, removed from an infant, **xx.** 59.

AXILLARY lymphatic glands, contributions to the surgical anatomy of, by Mr H. J. Stiles, **xi.** 37.

B

BACILLI and cocci from sputum of pleuro-pneumonia, etc., exhibited, **iv.** 181; of tubercle, method for detecting, **v.** 186.

BACILLUS of tubercle, exhibited, **ii.** 37; of scarlatina, exhibited, **vi.** 265; of diptheria, exhibited, **xiv.** 15; of acne and alopecia areata, exhibited, **xvi.** 211; of bubonic plague, exhibited, **xvi.** 179.

BALDNESS, peculiar form of, case of, exhibited, **viii.** 191.

BASEDOW'S DISEASE, case exhibited, **xvii.** 23.

BATH cabinet, thermal, exhibited, **xx.** 29.

BATHS, thermal saline, physiology of the action of, original communication, by Dr Leith, **xv.** 67.

BATTERY, galvanic, new form of, exhibited by Dr Bruce, **iii.** 207; Schall's chloride of silver, exhibited, **ix.** 166; universal electric, exhibited, **xi.** 103.

BAZIN'S DISEASE, case of, exhibited, **xx.** 130.

BECK'S SYRINGE for injecting anti-diphtheritic serum, exhibited, **xv.** 120.

BELL'S PARALYSIS, patient exhibited, **iv.** 104.

BIER'S METHOD of amputation, cases exemplifying, exhibited, **xiii.** 2 ; of treating strumous diseases of the extremities by passive congestion, by Mr A. G. Miller, **xiii.** 19.

BILE—Duct, malignant disease of, specimen exhibited, **xv.** 59. **Salts**, an aid to their detection, by Dr Stevens, **v.** 189.

BILIARY CALCULI, specimens exhibited, **iv.** 106.

BISULPHIDE OF CARBON, poisoning by, **iii.** 145 ; poisoning by, case exhibited, **v.** 151.

BLADDER, position of the empty and distended, in the male child, by Dr Symington, **iv.** 98 ; tumour of, exhibited, **vi.** 264 ; the operative surgery of the male, by Professor Annandale, **vii.** 106 ; diphtheritic membrane of, exhibited, **vii.** 155 ; tumour of, exhibited, **viii.** 35 ; tubercular ulceration of, **viii.** 57 ; filled with a clot of blood, exhibited, **viii.** 123 ; tumour of, exhibited, **ix.** 165 ; from a case of hydronephrosis, exhibited, **x.** 74 ; calculus of, exhibited, **xii.** 19 ; cystoscopy in relation to tumours of the, by Mr David Wallace, C.M.G., **xii.** 28 ; extraperitoneal rupture of, case exhibited, **xii.** 264 and 292 ; surgery of, notes on, by Mr David Wallace, C.M.G., **xiv.** 233 ; Sprengel's pump for drainage of, exhibited, **xiv.** 60 ; hypertrophy of, specimen exhibited, **xv.** 62 ; rupture of, specimen exhibited, **xvi.** 83, 135 ; sarcomatous tumour of, exhibited, **xvi.** 139 ; papilloma of, specimen exhibited, **xvii.** 109 ; rupture of, patient exhibited after operation for, **xviii.** 184 , papilloma of, patient exhibited after operation for, **xviii.** 185 ; hat-pin removed from male bladder, exhibited, **xx.** 57.

BLINDNESS—Word, cases of, exhibited, **vi.** 226 ; brain from a case of, exhibited, **xviii.** 81.

BLOOD, reinfusion of, in primary operations, by Dr John Duncan, **v.** 42. **Destruction**, pathology of, within the liver, by Dr Wm. Hunter, **vi.** 194. **Clot**, uncontracted, exhibited, **vii.** 154 : transfusion of human, in the treatment of pernicious anæmia, **xi.** 217 ; in diabetes mellitus, original communication, by Dr James, **xv.** 123 ; importance of examining, in doubtful cases, original communication by Dr G. L. Gulland, **xix.** 10 ; pressure in sleeplessness and sleep, original communication by Dr Lewis C. Bruce, **xix.** 156.

BONE—Cutter, worked by screw, exhibited, **iii.** 116. **Drill**, exhibited, **viii.** 61.

BONE, mutton, coughed up, **iii.** 37 ; transplantation of, case of, exhibited, **viii.** 225 ; rider's, specimen exhibited, **xi.** 70 ; temporal, exhibited from a case of septic thrombosis, **xiii.** 18 ; temporal, exhibited, **xiv.** 175 ; frontal, patient exhibited with complete necrosis of, **xviii.** 132 ; necrosed bone, exhibited, **xviii.** 137.

BONES, nasal, new appliance for supporting, exhibited, **vii.** 51 ; parietal, congenital and symmetrical perforation of, patient exhibited, **xviii.** 83 ; metacarpal, congenital absence of, case exhibited, **xviii.** 131.

BORO-GLYCERIDE, **ii.** 5.

BOTTINI'S GALVANO-CAUTERY, exhibited and explained, **x.** 27.

BOUGIES, new, exhibited, **ii.** 38 ; nasal, exhibited, **iv.** 182.

BOWEL, portion of intussuscepted, exhibited, **i.** 161 ; constriction of, **vi.** 265 ; invaginated, portion exhibited, **viii.** 123 ; gangrenous in strangulated hernia, **ix.** 26 ; strangulation of, specimen exhibited, **xviii.** 206.

BOW'S LINIMENT, parts from a case of poisoning by, exhibited, **vi.** 78.

BOX—Splint, exhibited, **v.** 49; needle and suture, of metal, exhibited, **xviii.** 83.

BRACHIAL PLEXUS, paralysis of, case exhibited, **xx.** 146.

BRAIN, tracings of pulsations of, **i.** 86; of a case of acute hydrocephalus, **i.** 86; tumours of, **i.** 2; of a case of apoplexy, **i.** 69; tumour of, **ii.** 98, 101; exhibited from a case of aphasia, **iii.** 208; portion of, from a case of tubercular meningitis, exhibited, **iii.** 154; and cord, from a case of injury to the sacrum, exhibited, **iv.** 21; from a case of gangrenous abscess of, exhibited, **iv.** 39; sections and drawings of, from a case of ulcerative endocarditis, exhibited, **iv.** 227; photographs of microscopic sections of, exhibited, **iv.** 227; exhibiting gummatous softening, **v.** 152; from a case of meningitis, exhibited, **vi.** 56; **vi.** 113; photographs of, from a case of cancer of, exhibited, **vii.** 74; from a case of gunshot injury, exhibited, **vii.** 98; with abscess, exhibited, **viii.** 24; cortical lesions of, patient exhibited, **ix.** 1; perforating tumour of skull, exhibited, **ix.** 3; compression of, case exhibited, **ix.** 163; specimen of, with multiple hæmorrhages in the optic thalami, exhibited, **ix.** 180; tumour, two specimens exhibited, **x.** 116; with abscess in left lateral lobe, exhibited, **xi.** 250; tumour of, exhibited, **xiv.** 17; with right side diminutive, drawing of, exhibited, **xiv.** 200; with hæmorrhage into Broca's convolution, specimen exhibited, **xiv.** 210; from a case of chronic hydrocephalus, exhibited, **xiv.** 243; from a case of abscess in temporo-sphenoidal bone, exhibited, **xiv.** 244; from a case of aphasia, exhibited, **xv.** 61; action, dual, communication on, by Dr L. C. Bruce, **xvi.** 114; exhibited, showing subarachnoid hæmorrhage from burn, **xvi.** 65; from a case of chronic basal meningitis, exhibited, **xvi.** 198; with tumour in cerebellum, drawing of, exhibited, **xvi.** 76; from a case of hemiparesis, exhibited, **xvii.** 70; with hæmorrhage into the occipital lobe, specimen exhibited, **xviii.** 80; from a case of word-blindness, specimen exhibited, **xviii.** 81; gumma of, specimen exhibited, **xviii.** 161; sarcoma of, specimen exhibited, **xix.** 54; from cases of hemiplegia, exhibited, **xix.** 193; from a case of aphasia, exhibited, **xix.** 193; tumour of, exhibited, **xx.** 9; four brains showing different seats of cerebral hæmorrhage, exhibited, **xx.** 24; glioma of, exhibited, **xx.** 27; abscesses of, secondary to an injury of the head, specimen exhibited, **xx.** 58; showing cerebral hæmorrhage, exhibited, **xx.** 59; showing track of Mauser bullet, exhibited, **xx.** 151; from a case simulating ruptured middle meningeal artery, exhibited, **xx.** 152; specimens illustrating impact of, exhibited, **xx.** 153.

BREAST, contributions to the surgical anatomy of, by Mr Harold J. Stiles, **xi.** 37.

BREATH, fœtid, some local causes of, by Dr M'Bride, **iv.** 4.

BROCA'S CONVOLUTION, hæmorrhage into, specimen exhibited, **xiv.** 210.

BRONCHI, innervation of, by Dr J. Graham Brown, **iv.** 183; tubercular invasion of, **vi.** 196.

BRONCHIAL CATARRH of children, by Dr Carmichael, **v.** 193.

BRONCHIECTASIS, case of, exhibited, **vi.** 267.

BRONCHIECTATIC CAVITIES, by Dr James, **xi.** 94.

BRONCHITIS, influence of nitrites upon, by Sir T. R. Fraser, **vi.** 144.

BRONCHOCELE, case of traumatic, becoming malignant, exhibited, **x.** 2.

BRONCHUS, pin impacted in, exhibited, **vii.** 74.

BRUCE, KING ROBERT THE, cast of his skull exhibited, **xiii.** 232.

BUBONIC PLAGUE, bacillus of, exhibited, **xvi.** 179.

BULBAR PARALYSIS, two cases exhibited, **xviii.** 67.

BULLET, with portion of lower jaw, exhibited, **i.** 143; Crimean, removed and exhibited, **v.** 5.

BURN, plastic operation for contraction of the arm after, patient exhibited, **iii.** 1; extensive, producing subarachnoid hæmorrhage, specimen exhibited, **xvi.** 65.

BURNING, larynx, trachea, and small intestine, from a case of, **v.** 178; effects on the skin, specimen exhibited, **v.** 132.

BURNS, transplantation of skin from lower animals in treatment of, patients exhibited, **xiv.** 171, 172; treatment of, by picric acid, original communication on, by Mr A. Miles, **xvi.** 221; patients exhibited, **xvi.** 131.

BURSA—**Patellæ**, enlarged, exhibited, **iii.** 115; cast of, **iii.** 115. **Ischial**, extreme enlargement of, specimen exhibited, **xviii.** 38.

BUTTON, shoe, from nose, exhibited, **xv.** 58.

C

CACHEXIA, thyroid, after excision of a suppurating goitre, case exhibited, **xix.** 48.

CÆCUM, cancer of, specimen exhibited, **xv.** 58; and colon, removed for malignant disease, specimen exhibited, **xix.** 31; removed for tubercular disease, specimen exhibited, **xix.** 71.

CAFFRES, remedies used by, to prevent blood poisoning by anthrax, **vi.** 218.

CALCAREOUS body, a peculiar, exhibited, **iii.** 56; plates in fæces, **ix.** 13.

CALCULI, exhibited, **iii.** 5, 6, 142; from a male cadaver, exhibited, **v.** 185; urinary, specimens exhibited, **viii.** 23; urinary, exhibited, **ix.** 166; renal, specimens exhibited, **xvi.** 82, 136; vesical, specimens exhibited, **xx.** 154; renal, Röntgen photograph of, exhibited, **xx.** 108.

CALCULUS, urethral, **i.** 19; renal, **i.** 145; encysted, **i.** 162; vesical, exhibited, **ii.** 2; removed by nephro-lithotomy, exhibited, **iv.** 22; biliary, specimen exhibited, **iv.** 106; vesical, exhibited, **vi.** 2; renal, exhibited, **vi.** 242, 266; urethral, exhibited, **vii.** 219; urethral, exhibited, **x.** 76; vesical, specimen exhibited, **xii.** 19; oxalate of lime, from ureter, exhibited, **xv.** 57; of ureter, specimen exhibited, **xvii.** 62; from pelvis of kidney, specimen exhibited, **xvii.** 62; biliary, specimens exhibited, **xvii.** 62; urinary, specimens exhibited, **xvii.** 64, 69; renal, exhibited, **xvii.** 69; urinary, exhibited, **xvii.** 98; tonsillar, specimen exhibited, **xviii.** 3; renal, specimen exhibited, **xviii.** 74; gall, specimen exhibited, **xviii.** 76; of ureter, impacted, specimen exhibited, **xix.** 31; very large specimen exhibited, **xix.** 54.

CALVARIA, exhibited, **vi.** 266.

CALVARIUM, specimen exhibited, from a case of suicide by a hatchet, **xiii.** 69.

CANCER of brain, photographs of, **vii.** 74; characteristic organism of, by Dr Russell, **x.** 42; of the breasts, spleen, etc., communication on, by Dr Byrom Bramwell, **xiii.** 74; report on the microscopical conditions of the organs in Dr Bramwell's case, by Dr Leith, **xiii.** 84; paraffine, of hand, operation for, patient exhibited, **xiv.** 171; of cæcum, specimen exhibited, **xv.** 58; of bile duct, specimen exhibited, **xv.** 59; of liver, drawings exhibited, **xv.** 111; of pylorus, patient exhibited after operation, **xv.** 227; of the rectum removed by Kraske's method, specimen exhibited, **xvii.** 69; of tongue, patient exhibited after removal of, **xx.** 48.

CANCRUM ORIS, case of, by Dr R. A. Fleming, **xii.** 251; by Dr George Elder, **xii.** 259; organisms from a case of, exhibited, **xviii.** 111.

CANULA, aseptic, exhibited, **v.** 49.

CAPILLARY DRAINAGE, for removal of thin fluids, **vii.** 154.

CAPSULES, suprarenal, from a case of Addison's disease, exhibited, **iii.** 69.

CARBOHYDRATES in dietetics, original communication by Dr Aitchison Robertson, **xv.** 183.

CARBOLIC ACID, case of poisoning by, **ii.** 75; parts injured in a case of poisoning by, exhibited, **iii.** 155; poisoning, specimens exhibited, **xvii.** 60, 96; poisoning, the stomachs from two cases of, exhibited, **xix.** 194.

CARBON, bisulphide of, chronic poisoning by, by Dr Bruce, **iii.** 145.

CARCINOMA of mamma, specimen exhibited, **viii.** 22; of bladder, **viii.** 35; of liver, **viii.** 47; of stomach, specimens of, exhibited, **ix.** 65; of suprarenal capsules and lungs, notes of case of, by Dr James Ritchie and Dr Alex. Bruce, **ix.** 67; of the throat, parts removed from, exhibited, **xiii.** 17; of thyroid gland, removal of, patient exhibited, **xiv.** 14; of colon, specimen exhibited, **xiv.** 40; original communication on, by Dr James Ritchie, **xiv.** 50; of the bones, original communication by Dr James Ritchie and Dr J. Purves Stewart, **xv.** 253; of mamma, treatment of inoperable cases in, original communication by Dr G. T. Beatson, **xv.** 153; rectal, specimen exhibited, **xvi.** 138; of pylorus, patients exhibited after operation, **xvi.** 2; of the breast, specimens exhibited, **xvi.** 39, 75; of rectum, patient exhibited after operation, **xviii.** 64; of gut, specimen of, exhibited, **xviii.** 79; of pylorus, patients exhibited after operation for, **xviii.** 185; of breast, map of cicatrix of, exhibited, **xviii.** 194; of œsophagus, specimen exhibited, **xix.** 136; of skin, case exhibited, **xx.** 4; of tongue, patient exhibited after removal of, **xx.** 48; gastric, patients exhibited, **xx.** 148.

CARDIAC therapeutics, discussion on, by Sir T. R. Professor Fraser and others, **xiv.** 68.

CARDICENTESIS, successful case of, patient exhibited, **xiv.** 14; case of, original communication by Dr Sloan, **xiv.** 24.

CARDIO-PNEUMATIC movements, by Dr J. B. Haycraft and Dr R. Edie, **x.** 107.

CARPUS, compound fracture of, specimen exhibited, **xviii.** 137.

CARTILAGE, loose, of knee-joint, **i.** 1 ; semilunar, operation for displaced, by Professor Annandale, **iv.** 67 ; loose, from knee-joint, exhibited, **iv.** 163.

CARTILAGES, semilunar of the knee-joint, displacements of, communication by Dr Logan Turner, **xiii.** 223 ; two cases exemplifying operation for, exhibited, **xiii.** 221.

CARTRIDGES, two, removed from a boy's head, exhibited, **xiii.** 232.

CASE, clinical research, exhibited, **xviii.** 137 ; surgical operating, exhibited, **xix.** 155.

CAST, gelatine, of lupus, exhibited, **xv.** 62.

CASTS, material for making, described and exhibited by Mr Cathcart, **iv.** 273 ; of giant finger, exhibited, **iv.** 226.

CATALEPSY Hystero, extreme case of, **xi.** 81.

CATALOGUE of the Surgical Museum of the University, exhibited by Professor Chiene, C.B., **iv.** 271.

CATARACT, dark, specimen exhibited, **viii.** 178 ; Indian instruments for couching, exhibited, **xv.** 182.

CATARRH, bronchial, of children, by Dr Carmichael, **v.** 193.

CATGUT rolled in balls, exhibited, xvi. 177.

CATHETER—**Fever**, by Sir Andrew Clark and others, **iii.** 87 ; temperature and pulse chart in a case of, exhibited, **iv.** 71. **Exhibited** by Dr Foulis, **v.** 6, 34, 49, 133 ; adaptation to, exhibited, **vi.** 198. **Aseptic**, exhibited, **vi.** 242. **Grooved**, exhibited, **xv.** 111. **Removed** from bladder, exhibited, **xvii.** 64.

CAVITIES, osseous, suppurations in, original communication by Dr P. M'Bride, **xiv.** 156.

CELL, bichromate of potash, exhibited, **xii.** 20.

CEPHALIC MURMUR, patient with, exhibited, **iv.** 39.

CEREBELLAR TUMOUR considered with reference to its localisation, original communication by Dr Alex. Bruce and Mr J. M. Cotterill, **xviii.** 207.

CEREBELLUM, with multiple tubercular tumours, exhibited, **xiv.** 243 ; tumour in, drawing of, exhibited, **xvi.** 76 ; hæmorrhage into the middle lobe of, specimen exhibited, **xvii.** 59 ; with calcareous concretion, exhibited, **xix.** 29.

CEREBRAL, syphilis, **vi.** 271 ; tumour, case of, by Dr Leslie, **vi.** 23 ; case of, by Dr Bramwell, **vi.** 29 ; abscess, by Drs M'Bride and Miller, **vi.** 114 ; abscess, cases of, exhibited, **vi.** 225 ; injury from a fall, by Dr W. W. Ireland, **vii.** 179 ; lesions, chronic, two cases of, exhibited, **x.** 210 ; concussion, mechanism of, by Mr Alex. Miles, **xi.** 127 ; hæmorrhage, two cases, by Dr Francis D. Boyd, C.M.G., **xi.** 163 ; abscess, patient exhibited, **xv.** 52 ; cases, results of surgical measures in, original communication, by Dr G. A. Gibson, **xv.** 27.

CEREBRUM, sarcoma of, specimen exhibited, **xviii.** 197.

CERVICAL RIB, case of, exhibited, **ii.** 26; do., specimen of, exhibited, **ii.** 26; patient exhibited with, **xi.** 27; child exhibited with well-marked, **xv.** 54.

CHAIR, which belonged to John Hunter, photograph of, exhibited, **iii.** 144.

CHARCOT MARIE, specimens exhibited, **xvi.** 70.

CHARCOTS', **Miliary Aneurisms**, specimens exhibited, **v.** 186. **Disease** in both knees, case of, exhibited, **xiii.** 33. **Joint Affection**, scapulæ and humeri, from a case of, exhibited, **xvii.** 60; patient with tabetic club-foot, exhibited, **xvii.** 105. **Disease**, with double dislocation of hip, case exhibited, **xviii.** 132.

CHART, temperature, exhibited, **xvi.** 134.

CHEYNE-STOKES RESPIRATION, by Dr G. A. Gibson, **viii.** 193.

CHLOROFORM, the cessation of respiration under, by Dr Milne Murray, **iv.** 107.

CHLOROSIS, iron in the treatment of, by Dr A. Smart, **xii.** 264.

CHOLERA, practical results of the investigation of, by Dr W. Russell, **xii.** 1.

CHOLESTEATOMA, a, exhibited, **xiii.** 69.

CHONDROMA of femur, specimen exhibited, **xix.** 31.

CHOPARTS' AMPUTATION, case of, exhibited, **xi.** 126.

CHOREA, major, case of, exhibited, **viii.** 190; habit, cases exhibited, **ix.** 143; chronic progressive, case of, exhibited, **xviii.** 69.

CHOREIFORM MOVEMENTS, case exhibited, **xix.** 44.

CHOROID, tubercle of, specimen exhibited, **ii.** 37; section of, in amyloid degeneration, **iv.** 227.

CHOROIDITIS from a case of waxy disease, drawing of, exhibited, **xvii.** 109.

CHROMIC ACID for warts of genitals, by Dr F. Cadell, **ii.** 72.

CHYLODROSIS, photographs from a case of, exhibited, **xiv.** 5.

CIRCULATION, demonstration of, in the gills of a tadpole, **iii.** 145.

CIRCUMCISION, new method of dressing in, **vi.** 191.

CIRRHOSIS of liver, original communication by Dr Alex. James, **xvii.** 110; case of, exhibited, **xviii.** 191.

CLAMPS for enterectomy, exhibited, **iii.** 57.

CLAVICLE, sarcoma of, **vi.** 265.

CLAY PIPE, stem of, removed from orbit, **ix.** 176.

CLEFT PALATE, instruments for, exhibited, **vii.** 98.

CLONUS, ankle, by Dr A. James, **ii.** 63.

CLUB-FOOT, tabetic, patient exhibited, **xvii.** 105.

COCCI and bacilli from sputum of pleuro-pneumonia and fibroid phthisis, exhibited, **iv.** 181.

COLINTON Hospital for Infectious Diseases, by Mr R. Morham, **xvi.** 170.

COLLES' FRACTURE, specimens of, exhibited, **ii.** 104; case of, exhibited, **vii.** 153.

COLON, removal of 22 inches of transverse, **viii.** 25; annular stricture of, at the splenic flexure, specimen exhibited, **x.** 133; intussusception of, patient operated on, exhibited, **xiii.** 175; carcinoma of, specimen exhibited, **xiv.** 40; case of, original communication by Dr James Ritchie, **xiv.** 50; transverse, malignant tumour of, successful operation for, patient exhibited, **xvii.** 51; transverse, specimen exhibited, **xviii.** 114; and cæcum, removed for malignant disease, specimen exhibited, **xix.** 31.

COLOTOMY, iliac, patient exhibited, **xii.** 51.

COLUMNÆ CARNEÆ of the heart, rupture of, specimen exhibited by the President, **iv.** 3.

COMEDO, double, case of, exhibited, **vi.** 144; showing bacillus for acne, etc., exhibited, **xvi.** 211.

CONCRETION, intestinal, **ix.** 14.

CONCUSSION, cerebral, the mechanism of, by Mr Alexander Miles, **xi.** 127.

CONDYLOMA due to trichophyton, case exhibited, **xi.** 145.

CONGESTION, passive, strumous diseases of the extremities, treated by, by Mr A. G. Miller, **xiii.** 19; passive, for ununited fracture, original communication by Mr Caird, **xiv.** 11; patient exhibited, **xiv.** 5.

CONSUMPTION in man, its relation to animal tuberculosis, **vii.** 110.

CONVULSIONS, tetanoid, by Dr Ronaldson, **ix.** 184; epileptiform, treated by drainage of ventricle, original communication by Dr William Stewart, **xvi.** 212.

CORD—Spinal, section of, exhibited, **ii.** 59; section of, in compression myelitis, **iii.** 37; central canal obliterated, **iii.** 57; section of, in lumbar region, in tubercular meningitis, **iii.** 57; section of, in spinal meningeal hæmorrhage, **iii.** 57; portion of the brain from a case of, exhibited, **iii.** 154; lesion of, in cervical region, case of, exhibited, **vii.** 217; endogenous fibres in lumbo-sacral region, original communication by Dr Alexander Bruce, **xvi.** 198. **Hydrocele** of, specimen exhibited, **xvi.** 198; lumbar, irritation of, two cases exhibited, **xvii.** 53. **Umbilical**, origin and development of, original communication by Dr James Foulis, **xix.** 164.

CORROSIVE SUBLIMATE, case of poisoning by, by Dr Church, **vi.** 14.

COSTAL CARTILAGE, supernumerary, specimen exhibited, **ix.** 149.

COXA VARA, patients exhibited, **xviii.** 64, 135.

CRANIAL, injuries, by Professor John Chiene, C.B., **i.** 69; loss of memory from, by Mr Joseph Bell, **ii.** 26; bones removed after, **ii.** 94; cavity, physics of, original communication by Dr James, **xvi.** 146.

CRANIUM, topography of, **vi.** 271 ; anterior unilateral enlargement of the bones of, and of face, patient exhibited, **xiii.** 231.

CRETINISM, sporadic, case of, **ix.** 145 ; cases exhibited, **xii.** 144 ; clinical remarks on a case of sporadic, by Dr Byrom Bramwell, **xiii.** 34 ; notes on a case of, by Dr John Thomson, **xiii.** 65 ; case of, exhibited, **xvi.** 56 ; cases exhibited, **xix.** 1, 2.

CRIME, treatment of, original communication, by Dr A. James, **xvi.** 15.

CROUP, larynx and trachea from a case of, exhibited, **iv.** 2 ; diphtheritic, larynx and trachea from a case of, **viii.** 192.

CRUS CEREBRI, lesion in the region of, patient exhibited, **ix.** 144.

CUP, feeding, exhibited, **xiv.** 18.

CUT-THROAT, parts injured in a case of, exhibited, **iii.** 143, 187, 209 ; specimens from a case of, **vi.** 266.

CYCLOPS, fœtus exhibiting the malformation of, original communication by Dr W. Craig, **v.** 178 ; specimen exhibited, **v.** 6 ; photograph of another case, exhibited, **v.** 182.

CYLINDROMA of base of skull, specimen exhibited, **xvii.** 63.

CYST, of round ligament, **i.** 85 ; of lower jaw, **i.** 143 ; multilocular ovarian, exhibited, **ii.** 62 ; dermoid, contents of, exhibited, **iv.** 23 ; method of preparation of, for exhibition, **iv.** 139 ; of pancreas, case of, exhibited, **ix.** 73 ; of the posterior extremity of the inferior turbinated body, by Dr R. Horsley, **ix.** 43 ; pancreatic, removed from behind, case exhibited, **xv.** 48 ; blood, in sarcoma of liver, original communication, by Drs Bramwell and Leith, **xv.** 213 ; vulvar, specimen exhibited, **xvi.** 212 ; photograph of, exhibited, **xvi.** 212 ; dermoid of ovary, exhibited, **xvii.** 7 ; hydatid, exhibited, **xvii.** 7 ; hydatid of liver, exhibited, **xvii.** 24 ; ovarian, specimen exhibited, **xvii.** 68 ; dermoid, specimen exhibited, **xviii.** 76, 207 ; mesenteric, drawings and preparations of, exhibited, **xviii.** 194 ; dermoid, of ovary, exhibited, **xix.** 31.

CYSTOSCOPE—Electric, by Mr D. Wallace, C.M.G., **ix.** 35. **Catheter**, Schlagintweit's, exhibited, **xx.** 131.

CYSTOSCOPY : notes from an experience of upwards of fifty cases, by Mr D. Wallace. C.M.G., **x.** 229 ; in relation to tumours of the bladder, by Mr David Wallace, C.M.G., **xii.** 28.

CYSTOTOMY, suprapubic, as treatment of traumatic stricture, by Dr John Duncan, **iii.** 200.

CYSTS, osseous, case of, exhibited, **viii.** 2 ; of tonsils, nose, larynx, and ear, by Dr P. M'Bride, **xi.** 29 ; pancreatic, their relation to rupture of pancreas, by Dr R. F. C. Leith, **xiv.** 250 ; dentigerous, removed, patient exhibited, **xiv.** 15.

D

DEAF-MUTES with goitre, patients exhibited, **xiv.** 154 ; demonstration of lip-reading by, **xiv.** 154.

DEAFNESS due to lesion of auditory centres, patient suffering from, exhibited, **iv.** 229.

DEATH, sudden, rare cases of, in medico-legal practice, by Dr Templeman, **xii.** 20.

DEFORMITY, heredity of, cases exhibited, **xiii.** 33; of hands, patient exhibited, **xiv.** 154; of hands and fingers, case exhibited, **xv.** 51; osseous, two patients exhibited, **xviii.** 62.

DELTOID MUSCLE, seed-like bodies removed from bursa under, exhibited, **xvii.** 109.

DEMODIX FOLLICULORUM, *in situ*, exhibited, **xiv.** 5.

DEMONSTRATIONS of circulation in frog's foot by oxyhydrogen light, by Dr Foulis, **i.** 57, 184; lantern—(1) of the microscopic pathological changes found in the brain and its membranes in insanity, by the Pesident, **xiii.** 176; (2) from cases of syringomyelia, **xiii.** 223; (3) on displacements of the semilunar cartilages of the knee-joint, **xiii.** 223.

DENTAL PLATE, swallowed and passed *per rectum*, exhibited, **xi.** 126.

DENTITION, unusual, patient exhibited, **xi.** 125.

DERMATITIS, **herpetiformis**, by Dr Allan Jamieson, **x.** 13. **Papillaris capillitii**, case exhibited, **xi.** 144. **Exfoliative**, patient exhibited, **xiv.** 173. **Herpetiformis**, case exhibited, **xvii.** 6.

DERMOID, tumours, exhibited, **iii.** 36; cyst, contents of, exhibited, **iv.** 23; cyst, specimen exhibited, **xviii.** 76, 207.

DIABÈTE BRONZÉ, a series of sections made from the various organs in a case of, exhibited, **xvii.** 187.

DIABETES mellitus, case of recovery from, exhibited, **x.** 213; influence of diet and drugs in the elimination of sugar in, **x.** 228; the blood in, original communication by Dr James, **xv.** 123; two cases exhibited, **xviii.** 186. **Insipidus**, case exhibited, **xviii.** 186. **Mellitus**, pulmonary tuberculosis in, specimen exhibited, **xviii.** 198.

DIABETIC—Coma with lipæmia, by Professor Sir T. R. Fraser, **i.** 59. **Loaf**, exhibited, **v.** 68. **Neuritis**, original communication by Professor Sir T. R. Fraser and Dr Bruce, Appendix, **xv.** 53.

DIAPHRAGM, rupture of, exhibited, **iii.** 156, 209; rupture of, specimen exhibited by the President, **iv.** 3.

DIET and drugs in the elimination of sugar in diabetes mellitus, **x.** 228.

DIETETICS, the rôle of the carbohydrates in, original communication by Dr Aitchison Robertson, **xv.** 183.

DIPHTHERIA, trachea and larynx of patient who died from, **i.** 1; communication by Dr W. W. Campbell, **v.** 142; in children, **viii.** 36; tracheotomy for, cases exhibited, **xiii.** 180; specimens illustrating, exhibited, **xiii.** 180; treated by tracheotomy, patient exhibited, **xiv.** 14; treated by antitoxin, patient exhibited, **xiv.** 14; bacillus of, exhibited, **xiv.** 15; patient treated by antitoxin, exhibited, **xv.** 117; larynx, trachea and lungs, from a case of, exhibited, **xvii.** 72; larynx, from a case of, exhibited, **xx.** 154.

DIPHTHERITIC sore throat, treatment of, by Dr Allan Jamieson, **ii.** 2; membrane of bladder and urethra, exhibited, **vii.** 155; croup, larynx and trachea of, **viii.** 192.

DISCUSSION on the care of habitual drunkards, **viii.** 78 ; on the pathology and treatment of strumous glands, **viii.** 146 ; on intestinal obstruction, **viii.** 205 ; on intra-cranial surgery, **xiii.** 97 ; on massage, **xiii.** 202.

DISEASES, sequelæ of acute infectious, by Dr James Carmichael, **i.** 24 ; hereditary transmission of, by Dr George Leslie, **i.** 19 ; alternation, periodicity, and relapse in mental, Dr Clouston, **i.** 123 ; infectious, new hospital for, **xvi.** 170.

DISLOCATION of hip-joint into sciatic notch, case exhibited, **ix.** 163 ; of hip, case exhibited, **ix.** 164 ; spontaneous, specimen exhibited, **ix.** 166 ; compound subastragaloid, of foot, case exhibited, **xiii.** 63 ; of ulna and radius, plaster cast of, exhibited, **xv.** 110 ; of both hips, congenital, **xv.** 120 ; of hip, congenital case exhibited after reduction, **xviii.** 33 ; of the patella, original communication by Mr J. Shaw M'Laren, **xix.** 58.

DISTOMA SINENSE, specimen exhibited, **xvi.** 211.

DOG, skin of, for skin grafting, **ix.** 33.

DRAINAGE, capillary, for removal of thin fluids, **vii.** 154.

DRESSINGS, from the knee-joint, exhibited, **vii.** 98 ; gauze, a demonstration of the advantage of being rolled in balls, **xix.** 74.

DRILL, exhibited, **iii.** 115.

DROWNED, restoration of the apparently, by Dr William Alexander, **xi.** 183.

DRUGS, exhibition of a collection of new and rare, **iii.** 3 ; their interference with hepatic metabolism, original communication by Dr Noël Paton and Dr J. Eason, **xx.** 123.

DRUM, recording, exhibited by Dr Milne Murray, **iv.** 228.

DRUNKARDS, habitual, discussion on the care of, **viii.** 78.

DUCTUS ARTERIOSUS, patent, by Dr Foulis, **iii.** 156; patients exhibited, **xv.** 120.

DUODENAL, ulcer, specimens of, **vi.** 263 ; extravasations, **vi.** 264.

DUODENUM, rupture of, specimen exhibited, **xiv.** 242.

DURA MATER, tumour of, **ii.** 101 ; fibroma of, exhibited, **x.** 75 ; effusion of blood upon the surface of, specimen exhibited, **xviii.** 85.

DYSENTERY, intestine and heart from a case of, exhibited, **xviii.** 80.

DYSPNŒA of asthma and bronchitis, its causation, and the influence of nitrites upon it, by Professor Sir T. R. Fraser, **vi.** 144.

DYSTROPHY, muscular, case of, exhibited, **xviii.** 33.

E

EAR—Disease, two cases of, by Dr P. M'Bride, **ii.** 102. **Animal Organism** from, exhibited, **vi.** 3. **Disease**, **vi.** 114 ; the place of specialism in general practice, with reference to diseases of, **vii.** 76. **Cysts** of, **xi.** 29. **Middle, Disease**, patient exhibited, **xv.** 50 ; temporal bone and sequestrum of sphenoid in a case of, specimens exhibited, **xvi.** 76.

Specimens illustrating, exhibited, **xvi.** 197. **Tooth** removed from, **xvi.** 71. **Lens** of haddock's eye removed from, **xvi.** 71.

EARS, arrest of development of, case exhibited, **xv.** 54.

ECONOMY, surgical, in hospitals, by Dr A. Neve, **xiii.** 263.

ECTOPIC GESTATION, by Dr Albert E. Morison, **xi.** 14.

ECTROPION, new operation for, **iii.** 54; patients exhibited, showing good effects of the operation, **iii.** 54.

ECZEMA, paraffin, case of, exhibited, **iii.** 69; of palm, case of, exhibited, **vi.** 263; case of, exhibited, **xiv.** 212; germs of, exhibited, **xv.** 141; palmare and plantare, original communication by Dr Allan Jamieson, **xvii.** 39.

EDUCATION, discussion on the physiology of, by Dr John Strachan, **ix.** 98.

EDWARD VII., KING, address to **HIS MAJESTY**, by the **SOCIETY** **xx.** 106; reply to the **ADDRESS**, **xx.** 130.

EFFUSIONS, pleural fœtid, by Dr A. James, **x.** 158.

EGYPT, statistics of expedition to, in 1801, by Dr W. T. Black, **ii.** 11.

ELBOW—Joint, disease of, **ii.** 100; excision of, patient exhibited, **iv.** 38; injuries implicating, by Professor Annandale, **iv.** 42; excision of, patient exhibited, **xiv.** 59; amputation at, for cancer, patient exhibited, **xiv.** 171. **Plaster Cast** of dissection of, exhibited, **xv.** 110; unreduced dislocation of, operation for, **xvi.** 135; osseous anchylosis of, specimen exhibited, **xvii.** 70; affection in a hæmophilic patient, exhibited, **xx.** 151.

ELECTRIC accumulators, exhibited by Dr M'Bride, **iv.** 2; cystoscope, by Mr D. Wallace, C.M.G., **ix.** 35.

ELECTRICAL aid to hearing, exhibited, **xi.** 127; theory of the physiology of vision, original communication by Dr Dawson Turner, **xiv.** 18.

ELECTRICITY, treatment of fibroid tumour of uterus by, **vii.** 67; apparatus for static, exhibited, **xiii.** 62.

ELECTRO-DIAGNOSIS by means of the urine, by Dr Dawson Turner, **xi.** 252; thermogen, exhibited, **xvii.** 141.

ELECTROLYSIS, cupric, in the treatment of ozæna, original communication by Dr M'Bride, **xviii.** 114.

ELEPHANTIASIS Arabum, **viii.** 48; of head and neck, etc., case exhibited, **xv.** 52; of labium majus, specimen exhibited, **xv.** 110; case of, exhibited, **xviii.** 72.

EMPYEMA, good effects of drainage in, **iii.** 34; portion of ribs removed for contraction after, **iii.** 209; case of, with operation for closure of pleural cavity by removing portions of ribs, **iv.** 11; cases of, exhibited, after resection of ribs, **vi.** 75, 76; lung, pleura and chest wall from a case of, **vi.** 78; communication on, by Dr W. Russell, **vi.** 89; charts of cases of, exhibited, **vii.** 51; of the superior maxillary antrum, **vii.** 99; a method of applying syphon exhaustion to cases of, **vii.** 154; surgical treatment of, **viii.** 197; cases exhibited, **xi.** 70; basal lung

disease and bronchiectatic cavities, **xi.** 94 ; old, case exhibited, **xvi.** 133 ; case after operation for, and mastoid disease, exhibited, **xviii.** 110.

EMULSION of cod-liver oil and eucalyptus oil, **viii.** 48.

ENCHONDROMA, arm, scapula, and half of clavicle removed on account of, **iii.** 56 ; of lung, specimen exhibited, **ix.** 197.

ENDOCARDITIS, ulcerative, microscopic sections and drawings from a case of, exhibited, **iv.** 180 ; cardicentesis, etc., case of by Dr Sloan, **xiv.** 24 ; heart from a case of, exhibited, **xvii.** 97.

ENDOSCOPE, Leiters', exhibited, **vii.** 228.

ENTERECTOMY, clamps for, exhibited, **iii.** 57 ; patient exhibited after **xvi.** 209 ; specimen removed by, exhibited, **xvi.** 138.

EPIDIDYMIS and testicle, specimen exhibited, **xviii.** 197.

EPIGLOTTIS, way of raising, etc., **viii.** 124.

EPILEPSY, Jacksonian, of visual cortex, **vi.** 262 ; case of, from injury to the head, exhibited, **x.** 27 ; skull cap from a case of, exhibited, **xx.** 28.

EPILEPTIC STATES, relation of dual brain action to, original communication, by Dr L. C. Bruce, **xvi.** 114.

EPILEPTIFORM CONVULSIONS treated by drainage of ventricle original communication by Dr William Stewart, **xvi.** 212.

EPISTERNAL NOTCH, case of marked pulsation in, exhibited, **xi.** 93.

EPITHELIAL grafting after Thiersch's method, case exhibited, **x.** 213.

EPITHELIOMA, paraffin, of hand, **i.** 160 ; of glans penis and prepuce, **i.** 85 ; of tongue and floor of mouth, **i.** 143 ; of larynx, exhibited, **ii.** 62 ; of lower jaw, exhibited, **iv.** 163, 177 ; of hand, exhibited, **v.** 5 ; of sublingual glands, **vi.** 192 ; of tongue, **vi.** 265 ; of rectum, **vi.** 265 ; of penis, drawing of penis after operation, exhibited, **vii.** 229; of larynx, **viii.** 226 ; metacarpal of thumb removed for, case exhibited, **x.** 212 ; of larynx, specimen exhibited, **xv.** 95 ; of penis, case exhibited after operation, **xvi.** 125 ; squamous of larynx, patient exhibited after complete extirpation of larynx, **xx.** 20.

EPULIS, exhibited, **vi.** 242.

ERUPTION, peculiar linear, patient exhibited, **xiv.** 155 ; papulo-squamous, case of, exhibited, **xviii.** 70 ; skin, following vaccination, **xviii.** 131.

ERYSIPELAS, antitoxin, patients treated by, exhibited, **xvi.** 53.

ERYTHEMA Perstans, patient exhibited, **xiv.** 173 ; case exhibited, **xv.** 2.

ETIOLOGY OF TUMOURS, discussion on, **vii.** 30.

EUCALYPTUS OIL EMULSION, **viii.** 48.

EXALGIN, toxic effects of, by Dr A. Lockhart Gillespie, **xi.** 124.

EXOPHTHALMIC GOITRE, case of, exhibited, **vi.** 260.

EXOPHTHALMOS, case exhibited, **xvi.** 125.

EXOSTOSES, various, exhibited, **viii.** 23.

EXOSTOSIS, cancellated, specimen of, **vi.** 264 ; of femur, specimen exhibited, **xix.** 54.

EXTRA-UTERINE GESTATION, minute anatomy of placenta in, **viii.** 227.

EYE, exhibited by Dr Argyll Robertson, with melanotic sarcoma of the conjunctiva, **iv.** 3. **Diseases**, pathology of, specimens illustrating, exhibited, **xx.** 132.

EYEBALL, affected with melanotic sarcoma, exhibited, **xvi.** 179.

EYELASHES, pediculosis of, case of, exhibited, **x.** 2.

F

FACE and anterior cranium, unilateral enlargement of the bones of, **xiii.** 231 ; plastic operation on, patient exhibited, **xv.** 137.

FACIAL Paralysis, case of, exhibited, **ii.** 100. **Hemiatrophy**, photograph of case of, exhibited, **x.** 117.

FALLOPIAN TUBES, diseases of, **iii.** 36 ; diseased one exhibited, **iii.** 5.

FALSE TEETH, set of, extracted from the œsophagus, **ii.** 105.

FAT, demonstration of, by a series of microscopic preparations made by Cohn's method, **xix.** 33.

FATS, action of liver on, original communication by Dr Noël Paton, **xv.** 63.

FAVUS family of five, exhibited, **x.** 187.

FAVUS, case of, exhibited, **vii.** 218 ; case of, exhibited, **ix.** 13 ; case of, cured, exhibited, **xvii.** 93 ; case of, treated by exposure to X-rays, exhibited, **xix.** 45 ; case of, exhibited, **xx.** 49.

FEBRILE STATE, on the danger of neglecting and best means of controlling the, by Professor M'Call Anderson, **iv.** 187.

FELDBAUSCH'S nasal respirator, exhibited, **xiv.** 18.

FEMUR, head of, exhibited, **ii.** 74 ; head and neck of, exhibited, **iii.** 142 ; exostosis of, specimen exhibited, **iv.** 106 ; head of, removed for hip-joint disease, **iv.** 163 ; fracture of epiphysis of, **viii.** 34 ; united fracture of neck of, **viii.** 62 ; head of, exhibited, **ix.** 166 ; congenital shortening, case exhibited, **xvi.** 65 ; skiagram, showing fracture of, exhibited, **xviii.** 206 ; exostosis of, specimen exhibited, **xix.** 54 ; chondroma of, specimen exhibited, **xix.** 31 ; fragments of, from the thigh of a Boer, ex hibited, **xx.** 153.

FERGUSSON'S, DR A., mechanical tongue depressor, **i.** 69.

FEVER, catheter, by Sir Andrew Clark and others, **iii.** 87 ; **typhoid**, outbreak of, due to milk infection, by Dr Harvey Littlejohn, **x.** 88 ; **scarlet**, relapse or recrudescence in, by Dr G. P. Boddie, **x.** 189 ; **Indian enteric**, notes on, by Surgeon-Captain Bedford, **xi.** 270 ; **enteric**, serum diagnosis of, original communication by Dr C. B. Ker, **xvii.** 29 ; **typhus**, original communication by Dr Harvey Littlejohn and Dr Claud B. Ker, **xviii.** 162 ; **hospitals**, cross infection in, original communication by Dr Claud B. Ker, **xix.** 137.

FIBRINOUS RHINITIS, recurrent, notes on a case of, by Dr Burn-Murdoch, **xiii.** 268.

FIBROMA, exhibited, and the case described, **vi.** 4 ; of the dura mater, exhibited, **x.** 75.

FIBULA, fracture of, specimen exhibited, **xx.** 57.

FILARIA—Medinensis, embryo of, exhibited, **xiv.** 200. **Loa**, specimens exhibited, **xvii.** 7. **Nocturna**, in the mosquito, exhibited, **xix.** 193.

FINGER, giant, specimen exhibited, **iv.** 226 ; cast of, exhibited, **iv.** 226.

FINGERS, deformity of, case exhibited, **xv.** 51.

FIREARMS, wounds of face and head from, **vi.** 263.

FISTULA of Steno's duct, case of, exhibited, **iii.** 34 ; fæcal, case of, exhibited, **v.** 182 ; salivary, case of, exhibited, **vii.** 97 ; umbilical fæcal, case of acquired, by Dr Ramsay Smith, **xii.** 42.

FLAT-FOOT, specimen of acquired, exhibited by Dr Symington, **iv.** 3 ; pads for treatment of, exhibited, **iv.** 138.

FOLLICULITIS DECALVANS, case exhibited, **xvii.** 185.

FONTANELLE, patent anterior, patient exhibited, **xiv.** 154.

FOOD materials, poisonous products in, **vi.** 242, 254 ; regurgitation of, case exhibited, **xx.** 5.

FOOT, exhibited, **ii.** 74, 75 ; compound subastragaloid dislocation of, case exhibited, **xiii.** 63 ; injury to, patient exhibited, **xv.** 106 ; perforating ulcer of, two patients exhibited, **xv.** 137 ; perforating ulcer of, case exhibited, **xvi.** 132 ; deformity of, patient exhibited, **xix.** 21.

FOOT, FLAT, specimen of, exhibited, **iv.** 3 ; pads for treatment of, exhibited, **iv.** 138.

FORAMEN OVALE, four specimens of open, exhibited, **xii.** 193.

FORCEPS, phymosis, **vi.** 193 ; midwifery, **vi.** 242 ; laryngeal, new form of, exhibited, **xi.** 126 ; laryngeal, exhibited, **xx.** 158.

FOREARM, ulcer of, specimen exhibited, **xvi.** 139 ; recurrent fibroid tumours of, case exhibited, **xvii.** 2 ; tremor of, case exhibited, **xvii.** 53 ; ulcer of, patient exhibited, **xix.** 73.

FOREARMS, congenital deformity of, with inability to supinate, case exhibited, **xii.** 169.

FOREIGN BODIES exhibited—(1) bullet, with portion of lower jaw, **i.** 143 ; (2) whinstone from rectum, **i.** 58 ; (3) hay-seed from the ear, **i.** 106 ; (4) a piece of quill from the ear, **i.** 145 ; (5) button from the ear, **i.** 145 ; in pharynx, œsophagus, and air passages, preparations illustrative of, exhibited by Professor Chiene, C.B., **iv.** 270 ; localisation of, by means of X-rays, original communication by Dr Dawson Turner, **xvii.** 99.

FORMALIN, tumours hardened in, exhibited, **xvi.** 40.

FRACTURE, of radius, **vii.** 97 ; Colles', **vii.** 153 ; of olecranon, treated by being *wired*, case exhibited, **xi.** 167 ; ununited, treatment of, by passive congestion, patient exhibited, **xiv.** 5 ; treatment of, by passive congestion, original communication, by Mr Caird, **xiv.** 11 ; of fibula,

specimen exhibited, **xx.** 57 ; of humerus, radiograph exhibited, **xx.** 57 ; of astragalus, radiograph exhibited, **xx.** 57 ; of malleolus, specimen exhibited, **xx.** 57.

FRACTURES, near a joint, treatment of, by Mr A. G. Miller, **xiv.** 245 ; two specimens exhibited showing what Nature sometimes does in uniting, **xvii.** 70.

FRIEDREICH'S ATAXIA, cases of, exhibited, **x.** 116 ; **xiii.** 2 ; **xviii.** 67 ; **xx.** 4.

FRONTAL BONE, exhibited, for punctured fracture, **vi.** 197 ; tumour of, removed, **xiv.** 1.

FUNGUS, Actinomyces, microscopical demonstration of, **xx.** 158.

FURUNCULOSIS, pathology and treatment of, by Dr C. H. Bedford, **x.** 174.

G

GALL—Bladder removed from a case of cholecystotomy, exhibited, **xii.** 211. **Stones**, on the surgical treatment of, by Mr John Duncan, **xii.** 169. **Stone**, specimen exhibited undergoing disintegration, **xiii.** 17. **Stone**, impacted, specimen exhibited, **xiv.** 155. **Bladder**, distended, operation for, case exhibited, **xvi.** 63. **Stones**, notes on cases of, original communication by Dr J. Rutherford Morison, **xvi.** 119 ; operation for, case exhibited, **xvi.** 130. **Stone**, large, specimen exhibited, **xvii.** 184 ; impacted, specimen exhibited, **xvii.** 72. **Stone**, large specimen exhibited, **xviii.** 76.

GALVANIC battery, new form of, exhibited by Dr Bruce, **iii.** 207. **Cell**, new form of, exhibited, **xi.** 14.

GANGRENE, senile, rare form of, by Mr Joseph Bell, **i.** 183 : traumatic, of arm, **i.** 85 ; of left lung, **i.** 19 ; senile, leg from a case of, exhibited, **vi.** 22 ; white, foot from a case of, exhibited, **vi.** 113 ; symmetrical, of extremities, **viii.** 167 ; spreading, successful amputation for, **ix.** 196 ; of the lower extremity, amputation in cases of, by Mr F. M. Caird, **xii.** 196 ; spreading, double amputation above the knees for, case exhibited, **xvi.** 129 ; senile, a leg injected after operation for, exhibited, **xvii.** 66 ; legs from double amputation for, exhibited, **xvii.** 68 ; of bowel, specimen exhibited, **xix.** 154.

GASTRIC ULCER, perforating, **iii.** 77, 155 ; specimen exhibited, **ix.** 198 ; perforated, patient exhibited after successful operation for, **xv.** 138 ; perforated, successful operation for, case exhibited, **xvi.** 195 ; perforating, two cases exhibited after operation, **xviii.** 186 ; multiple, specimen exhibited, **xviii.** 195 ; perforating, patient exhibited after operation for, **xx.** 49.

GASTRITIS, phlegmonous, specimen exhibited, **xv.** 112.

GASTRO-ENTEROSTOMY, patient exhibited after operation, **xvi.** 208.

GASTRO-JEJUNOSTOMY, for carcinoma, case exhibited, **xvi.** 2 ; four cases treated by, for pyloric obstruction, exhibited, **xx.** 61.

GASTROSTOMY, for stricture of œsophagus, by Dr John Duncan, **x.** 118 ; notes on a case of, by Mr F. M. Caird, **xii.** 249 ; after method of

Witzel, patient exhibited, **xiii.** 13; original communication by Mr F. M. Caird, **xiii.** 26; patient exhibited, **xiv.** 14; for stricture of œsophagus, case exhibited, **xvi.** 125.

GASTROTOMY, case of, exhibited, **xiii.** 2.

GEHEIM-CAMERA, Stern's, exhibited, **vii.** 228.

GENITALS, warts of, treatment by chromic acid, by Dr F. Cadell, **ii.** 72.

GENITO-URINARY SURGERY, asepsis in, original communication by Mr D. Wallace, C.M.G., **xvi.** 156.

GENU-VALGUM, specimen exhibited, **v.** 178; patient operated on, exhibited, **xiii.** 1.

GERMS and the Spray, by Dr Duncan, **ii.** 49; by Professor Chiene, C.B., **iii.** 217.

GESTATION, ECTOPIC, by Dr Albert E. Morison, **xi.** 14.

GIANT finger, specimen and cast of, exhibited, **iv.** 226.

GIANTESS, acromegaly in a, patient exhibited, **xiii.** 13

GLAND—**Prostate**, exhibited, **ii.** 62. **Sublingual**, epithelioma of, **vi.** 192. **Lachrymal**, displacement of, **vi.** 224.

GLANDS—**Peyer's**, exhibited, **ii.** 11. **Strumous**, discussion on, **viii.** 146.

GLIOMA, exhibited, **v.** 118; large, of brain, exhibited, **xx.** 27; of pons varolii, exhibited, **xx.** 154.

GLIOMATOUS Tumour, drawings and photographs of, exhibited, **xv.** 112.

GLUTEUS MAXIMUS, patient exhibited with paralysis of, **xx.** 52.

GLYCERITES of various substances, exhibited, **ix.** 3.

GOITRE, its relation to menstruation and pregnancy, **v.** 154; exophthalmic, case of, exhibited, **vi.** 260; exophthalmic, excision of, case exhibited, **x.** 213; symptoms of, and myxœdema contrasted, by Dr Byrom Bramwell, **x.** 126; exophthalmic, case of thyroidectomy for, exhibited, **xi.** 146; malignant, removal of, patient exhibited, **xiv.** 14; microscopic specimen of, exhibited, **xiv.** 17; in deaf-mutes, cases exhibited, **xiv.** 154; case of, exhibited, **xviii.** 35.

GOUT, with tophaceous deposits, case of, exhibited, **viii.** 22; a fit of, original communication by Dr George W. Balfour, **xvii.** 163; the etiology of, original communication by Dr Chalmers Watson, **xviii.** 148.

GRAFTING, epithelial, after Thiersch's method, case exhibited, **x.** 213.

GRAY MATTER, congenital malformation of the, **iii.** 37.

GUMMA of brain, specimen exhibited, **xviii.** 161.

GUNSHOT Injury, brain and skull, from a case of, exhibited, **vii.** 98; remarkable recovery from a, **xii.** 190. **Wound** of arm, patient exhibited, **xv.** 151; photographs of, by Röntgen process, exhibited, **xv.** 151.

GUT, rupture of, from violence, two specimens exhibited, **x.** 214; resection of, cases of, exhibited, **xiv.** 58; original communication by F. M. Caird, **xiv.** 274.

H

HABIT CHOREA, cases exhibited, **ix.** 143.

HÆMATURIA, notes on, by Mr David Wallace, C.M.G., **xiv.** 233.

HÆMIC murmurs of debility in the pulmonary and tricuspid areas, by Dr W. Russell, **i.** 97; reply to, by Dr George W. Balfour, **i.** 175.

HÆMOPHILIA, case of, by Dr Bramwell, **v.** 164; case of, exhibited, **x.** 211.

HÆMORRHAGE, basal, case of, exhibited, after being trephined, **x.** 187; middle meningeal, successful case of trephining for, exhibited, **xi.** 14, 35; cerebral, two cases by Dr Francis D. Boyd, C.M.G., **xi.** 163; middle meningeal, successful operation for, patients exhibited, **xiv.** 2; into Broca's convolution, specimen exhibited, **xiv.** 210; cerebral, four brains showing different seats of, exhibited, **xx.** 24; brain exhibited showing, **xx.** 59; gastric, and its surgical treatment, original communication by Mr Mayo Robson, **xx.** 76.

HAIRS, nodose, **i.** 58; case of, exhibited, **vii.** 227.

HALFPENNY, ejected from stomach, **iii.** 6.

HALL FOR SOCIETY, discussion on, **xii.** 47.

HAMMER TOE, exhibited, **viii.** 24.

HAND, cast of deformed, **i.** 2.

HANDS, vasomotor disturbance of, case exhibited, **x.** 117; deformity of, patients exhibited, **xiv.** 154; **xv.** 51.

HANGING AND STRANGULATION, by Dr C. Templeman, **xii.** 240.

HAT-PIN, 3½ inches long, removed from male bladder, exhibited, **xx.** 57.

HEAD, bullet wound of, case of, by Dr A. T. Sloan, **xiii.** 45; photograph of a case of suicide by pistol-shot, **xiii.** 68; injuries, trade-like movements following, original communication by Mr Alex. Miles, **xvi.** 40.

HEARING, electrical aid to, exhibited, **xi.** 127.

HEART, misplacement of, on right side of body, **i.** 33; hæmic murmurs of, resulting from dilatation of, by Dr G. W. Balfour, **i.** 168, 175; by Dr Russell, **i.** 97; rupture of, specimen of, exhibited, **ii.** 101; specimen of, exhibited, from a case of mitral stenosis, **ii.** 61; rupture of, exhibited, **iii.** 187, 209; from a case of aphasia and left-sided hemiplegia, exhibited, **iii.** 208; from a case of endocarditis, exhibited, **iv.** 21; liver and kidney, from a fatal case of railway injury, exhibited, **iv.** 21; rupture of left ventricle of, exhibited, **vii.** 52; rupture of, specimen exhibited, **viii.** 226; aneurism of, exhibited, **x.** 106; displacement of due to lung disease, patient exhibited, **x.** 212; some deductions from a study of the development of, by Drs Gibson and Gillespie, **xi.** 266; malformations of—(1) on right side, case exhibited, **xii.** 237; (2) specimens of open foramen ovale, exhibited, **xii.** 193; ruptured, specimen exhibited, **xiii.** 16; fatty infiltration of, specimen exhibited, **xiii.** 17; disease, congenital, appearance of blood in, **xiv.** 17; disease, chronic, action of thermal saline baths on, original communication by Dr Leith, **xv.** 67; calcareous degeneration of, original communication by Dr Bramwell, **xv.** 97; reduplication of second sound in mitral stenosis, original communication by Dr F. D. Boyd, C.M.G., **xvi.** 46; from a

patient who had combined mitral and tricuspid obstruction, exhibited, **xvii.** 95; from a case of endocarditis, exhibited, **xvii.** 97; disease, double aortic, and double mitral, patient exhibited, **xvii.** 177; mitral and tricuspid obstruction, patient exhibited, **xvii.** 182; hypertrophy of, specimens exhibited, **xviii.** 84; rupture of left ventricle, specimen exhibited, **xviii.** 85; tuberculous nodule in wall of, specimen exhibited, **xviii.** 198; calcification of columnæ carneæ, specimen exhibited, **xix.** 32; showing a characteristic patch of myomalacia, specimen exhibited, **xix.** 54; traumatic rupture of, exhibited, **xix.** 194; two with patent foramen ovale, exhibited, **xix.** 195; fatty degeneration of, specimen exhibited, **xix.** 195; dilated, exhibited, **xx.** 106.

HEMIANOPSIA, original communication by Dr William Stewart, **xvi.** 212.

HEMIATROPHY, facial, photograph of, case of, exhibited, **x.** 117; of the tongue, case exhibited, **xviii.** 68; of the face, case exhibited, **xviii.** 68.

HEMICHOREA, case of, exhibited, **xviii.** 191.

HEMIPARESIS, case of, exhibited, **vi.** 261; and tremor of arm, brain from a case of, exhibited, **xvii.** 70.

HEMIPLEGIA, a patient exhibited, **v.** 183; case of, exhibited, **vi.** 1; cerebral, cases exhibited, **xvi.** 209; case exhibited, **xvii.** 58; basal ganglia and medulla, sections of, in two cases, exhibited, **xvii.** 186; brains, from cases of, exhibited, **xix.** 193.

HEPATOTOMY, transthoracic, for abscess of the liver, original communication by Dr Bramwell and Mr Stiles, **xv.** 240.

HEREDITARY AMAUROSIS, case of, by Dr W. G. Sym, **x.** 111.

HEREDITY of deformity, cases exhibited, **xiii.** 33; in disease, original communication by Professor D. J. Hamilton, **xix.** 94.

HERNIA, inguinal, note of a somewhat unusual and complicated case of, by Mr Joseph Bell, **ii.** 8; case of strangulated congenital, by Dr P. H. M'Laren, **ii.** 33; unusual case of strangulated congenital, by Mr A. G. Miller, **ii.** 68; umbilical, removal of large intestine for, **vii.** 219; effect of twisting the sac in the operation for the radical cure of, **vii.** 219; inguinal, **viii.** 24; strangulated, gangrenous bowl in, by Mr Caird, **ix.** 26; infantile, preparation and drawing from a case of, exhibited, **x.** 118; cerebri, patient exhibited, **xiv.** 241; lumbar, case of, exhibited, **xvi.** 177; inguinal, congenital, patient exhibited, **xvii.** 108; sac containing Meckel's diverticulum, exhibited, **xvii.** 108; strangulated, specimen exhibited, **xviii.** 40; ventral, patient exhibited, **xix.** 23; radical cure of, with statistics of seven years' experience in the Royal Infirmary, original communication by Dr C. W. MacGillivray, **xix.** 35; strangulated femoral, **xix.** 154; strangulated, stenosis of small intestine after, original communication by Mr Alexis Thomson, **xx.** 110.

HERNIÆ, fat, in the inguinal region, by Dr K. M. Douglas, **ix.** 83.

HERPES ZOSTER, instance of hereditary, by Dr G. A. Gibson, **iv.** 182.

HIP-JOINT, disease of, **i.** 85; five cases of amputation at, by Dr R. M'Laren, **iii.** 116; case of amputation at, exhibited, **iii.** 141; parts from amputation of, **v.** 50; disease, lameness after, by Professor Chiene, C.B., **ix.** 166; dislocation of, into sciatic notch, case exhibited, **ix.** 163; double dislocation of, skeleton of, exhibited, **xiv.** 208; disease, patient exhibited, **xv.** 109; congenital dislocation of, patient exhibited, **xvii.** 108; con-

genital dislocation of, case exhibited after reduction, **xviii.** 33 ; double dislocation of, in Charcot's disease, case exhibited, **xviii.** 132 ; amputation through, patient exhibited, **xx.** 22.

HIPS, congenital dislocation of both, patient exhibited, **xv.** 120.

HOSPITAL—Experiences, by Professor Chiene, C.B., **viii.** 179. **Colinton**, for infectious diseases, by Mr R. Morham, **xvi.** 170. **Edinburgh, in South Africa, and its work**, original communication by Dr F. D. Boyd, C.M.G., and Dr G. L. Chiene, **xx.** 63.

HOSPITALS, notes on surgical economy in, by Dr A. Neve, **xiii.** 263 ; fever, cross-infection in, original communication by Dr Claude B. Ker, **xix.** 137.

HUMERUS, condyles of, exhibited, **iv.** 162 ; fracture of, **vi.** 77 ; condyles of, excision of, case exhibited, **xv.** 48 ; injury to, case exhibited, **xv.** 51 ; condyles of, exhibited, **xv.** 57 ; sub-coracoid dislocation of, original communication by Prof. Sir John Struthers, appendix, **xv.** 1 ; condyles of, excised, patient exhibited, **xvi.** 127 ; condyles exhibited, **xvi.** 135 ; operation for dislocation *backwards*, patient exhibited, **xvii.** 103 ; skiagram showing separation of lower epiphysis of, exhibited, **xviii.** 205 ; fracture of, radiograph exhibited, **xx.** 57.

HUTCHINSON'S summer eruption, case of, exhibited, **xiv.** 239.

HYDATIDS, specimen of, exhibited, **xviii.** 77.

HYDRENCEPHALOCELE, patient exhibited before operation, **xviii.** 133 ; after operation, **xviii.** 202.

HYDROA VACCINFORME, case of, exhibited, **xiv.** 239.

HYDROCELE sac, exhibited, **i.** 144 ; case of, exhibited, **vii.** 97 ; bilocular, patient exhibited after operation for, **xvi.** 128 ; of cord, specimen exhibited, **xvi.** 198 ; double, in young child, patient exhibited, **xvii.** 108.

HYDROCEPHALUS, acute, brain from a case of, **i.** 86 ; congenital, combined with spina bifida, exhibited, **xvi.** 70 ; unilateral, original communication by Dr William Stewart, **xvi.** 212 ; acquired, drainage through the fourth ventricle in a case of, original communication by Dr A. Bruce and Mr H. J. Stiles, **xvii.** 73.

HYDROCHLORIC ACID poisoning, stomach, etc., in a case of, exhibited, **xviii.** 206.

HYDRONEPHROSIS, kidneys, ureter, and bladder from a case of, exhibited, **x.** 74 ; three specimens of, exhibited, **xiv.** 208 ; patient exhibited, **xv.** 107 ; specimen exhibited, **xv.** 111.

HYPERKERATOSIS of papillæ of tongue, specimen exhibited, **xiii.** 221.

HYPERTONUS, arterial, original communication by Dr William Russell, **xx.** 132.

HYSTERO-CATALEPSY, extreme case of, by Dr A. T. Sloan, **xi.** 81.

I

ICE, amputation of the thigh under, case exhibited, **xi.** 144.

ICHTHYOSIS, palmaris and plantaris, drawing of, exhibited, **iv.** 163 ; case of, exhibited, **v.** 183 ; cases of, exhibited, **xiii.** 63, 175 ; case of, exhibited,

xiv. 240 ; of tongue, patient exhibited, **xv.** 95 ; case exhibited, **xvi.** 59 ; two cases, exhibited, **xix.** 45.

ILEO-CÆCAL region, five specimens of preparations from, exhibited, **xvi.** 74.

ILEUM, portion of, from typhoid patient, exhibited, **iv.** 41.

IMBECILITY in infancy, diagnosis and prognosis of certain forms of, original communication by Dr John Thomson, **xvii.** 81.

IMPETIGO VARIOLIFORMIS, patient exhibited, **xiv.** 172.

INDIAN ENTERIC FEVER, by Surgeon-Captain Bedford, **xi.** 270.

INFANT, relations of abdominal viscera in, by Dr J. W. Ballantyne, **x.** 140 ; spinal column in the, by Dr J. W. Ballantyne, **xi.** 71.

INFANTS, suffocation of, 258 cases of, by Dr C. Templeman, **xi.** 210.

INFARCTS of kidney, specimen exhibited, **xviii.** 198.

INFLUENZA, discussion on, by Dr Brackenridge, **ix.** 117 ; influence of weather on, original communication by Dr Lockhart Gillespie, **xv.** 102 ; causing acute ascending paralysis, original communication by Dr Alexander James, **xix.** 201 ; post-mortem examination of same, by Dr R. A. Fleming, **xix.** 204.

INFLUENZAL pneumonia, lungs from cases of, exhibited, **xiv.** 155.

INJURIES, multiple, case of, exhibited, **iv.** 104.

INSANE, surgical treatment of general paralysis in the, by Dr John Macpherson, and Mr David Wallace, C.M.G., **xi.** 167 ; general paralysis of, three cases exhibited, **xiii.** 12 ; general paralysis of, case exhibited, **xvi.** 2.

INSANITY, prolonged, treated successfully by thyroid extract, **xiv.** 199 ; diseases of, increase of, original communication by Dr W. W. Ireland, **xix.** 77.

INSUFFLATION, intestinal, gasogene apparatus for, exhibited, **xii.** 169.

INSUFFLATOR, nasal, exhibited, **v.** 188.

INTEGUMENT, hypertrophic condition of, patient exhibited, **xx.** 147.

INTESTINAL, obstruction, laparatomy for, by Professor Chiene, C.B., **iv.** 269 ; obstruction, discussion on, **viii.** 205 ; obstruction, treated by laparatomy, by Mr A. G. Miller, **ix.** 89 ; surgery, drawings and specimens illustrating, exhibited, **xii.** 214 ; obstruction, in a new born child, intestines exhibited, **xvii.** 109 ; obstruction, laparotomy for, patient exhibited after operation, **xix.** 153.

INTESTINE, strangulation of, **vi.** 266 ; stenosis of, specimen exhibited, **ix.** 196 ; resection and suture of, by Mr F. M. Caird, **xiv.** 274 ; intussusception of, specimen exhibited, **xv.** 2 ; obstruction of, specimen exhibited, **xv.** 56 ; small, patient after operation for stricture of, exhibited, **xvi.** 177 ; large, fibrous stricture of, specimen exhibited, **xvii.** 27 ; small, laparatomy for stricture of, successful, patient exhibited, **xvii.** 56 ; obstruction due to adhesions of, specimen exhibited, **xvii.** 63 ; typhoid ulceration of, specimen exhibited, **xviii.** 161 ; intussusception of, specimen exhibited, **xviii.** 206 ; strangulation of, specimen exhibited, **xviii.** 206 ; large, operative interference in cases of stricture of, original communication by Mr F. M. Caird, **xx.** 158.

INTESTINES, case of obstruction of, by Mr Joseph Bell, **i.** 145 ; intussusception of, **i.** 161 ; from a case of obstruction in a new born infant, exhibited, **xvii.** 109 ; transverse rupture of, specimen exhibited, **xx.** 60 ; stenosis of, after strangulated hernia, original communication by Mr Alexis Thomson, **xx.** 110 ; from a case of idiopathic distension of the colon, exhibited, **xx.** 154.

INTUBATION, of air passages, instruments exhibited, **viii.** 61 ; **xv.** 230.

INTUSSUSCEPTION, ileo-cæcal, exhibited, **v.** 67 ; case of, exhibited, **vi.** 2 ; parts from, case of, exhibited, **vi.** 2 ; successfully relieved by abdominal section, by Professor Annandale, **viii.** 74 ; portion of bowel from cases of, exhibited, **x.** 7, 215 ; of colon, patient exhibited who had been operated on, **xiii.** 175 ; double, of intestine, specimen exhibited, **xv.** 2 ; two cases of, exhibited, **xvi.** 137 ; patient after operation, exhibited, **xvii.** 180 ; patients exhibited after operation for, **xix.** 25, 46 ; an infant exhibited after operation for, **xx.** 51.

IODINE, note on the actions of, by Dr Dawson Turner, **xiii.** 201.

IRON, in the treatment of anæmia and chlorosis, by Dr A Smart, **xii.** 264.

ISCHIAL bursa, extreme enlargement of, specimen exhibited, **xviii.** 38.

J

JACKSONIAN EPILEPSY, of the visual cortex, case of, exhibited, **vi.** 262 ; skull cap from a case of, exhibited, **xx.** 28.

JAUNDICE, treatment of, from malignant obstruction, original communication by Dr William Russell, **xiv.** 175.

JAW, lower, cystic tumour of the ramus of, exhibited, **iii.** 56 ; malignant tumour of, exhibited, **iii.** 142-154 ; lower, epithelioma, specimen exhibited, **iv.** 163, 177 ; myeloid sarcoma of, specimen exhibited, **iv.** 226 ; lower, exhibited, **v.** 5 ; tumours of, **vi.** 265 ; lower, anchylosis of, patient exhibited, **xiv.** 16 ; lower, subperiosteal resection of, patient exhibited, **xix.** 27 ; specimen of, exhibited, **xix.** 32 ; upper, sequestra from, exhibited, **xix.** 73.

JAWS, fracture of, case exhibited, **vi.** 77.

JOINT, **Knee-**, syphilitic, exhibited, **vii.** 75 ; excised, exhibited, **xiii.** 180.

K

KELOID, **Addison's**. case of, exhibited, **x.** 157. **Acne**, case exhibited, **xi.** 144.

KERATIN, as a coating for pills, **vi.** 22.

KERATOSIS obturans, exhibited, **iii.** 37 ; **pilaris**, case of, exhibited, **xiv.** 155.

KIDNEY, with caseous masses, exhibited, **v.** 120 ; cystic tumour of, exhibited, **v.** 121 ; sarcoma of, **v.** 184 ; cancer of, **v.** 184 ; a hydronephrosis of, **v.** 185 ; scirrhus of, **vi.** 268 : cystic, exhibited, **viii.** 35 ; hydronephrotic, specimen exhibited, **ix.** 179, with a large sarcomatous

growth in it, exhibited, **x.** 214 ; tubercular, specimen exhibited, **xii.** 212 ; ruptured, recovery from, patient exhibited, **xii.** 237 ; notes of a case of, by Dr W. A. Finlay, **xii.** 289 ; polycystic, specimen exhibited, **xiii.** 15 ; with malignant disease, exhibited, **xiv.** 207 ; cystic, specimen exhibited, **xiv.** 210 ; rupture of, specimen exhibited, **xiv.** 243 ; floating, case exhibited, **xvi.** 131 ; distinguished from distended gall-bladder, **xvi.** 63 ; displaced, case exhibited, **xvi.** 131 ; removal of calculus from, patient exhibited, **xvi.** 80 ; removal of, specimen exhibited, **xvi.** 82 ; hydronephrotic, case exhibited, **xvi.** 131 ; hydronephrotic, specimen exhibited, **xvii.** 62 ; calculus from pelvis of, specimen exhibited, **xvii.** 62 ; with renal calculus in position, exhibited. **xvii.** 69 ; rupture of, specimen exhibited, **xviii.** 39, with calculi *in situ*, specimens exhibited, **xviii.** 74 ; three tubercular, exhibited, **xviii.** 74 ; with malignant adenoma, specimen exhibited, **xviii.** 75 ; movable, original communication on, by Mr D. Wallace, C.M.G , **xviii.** 122 ; waxy degeneration of, specimens exhibited, **xviii.** 161 ; infarcts of, specimens exhibited, **xviii.** 198.

KIDNEYS from rheumatic patient, exhibited, **ix.** 179 ; from a case of hydronephrosis, exhibited, **x.** 74 ; and bladder from a case of pyonephrosis, exhibited, **xii.** 212.

KING EDWARD VII., ADDRESS to **HIS MAJESTY** by the **SOCIETY**, **xx.** 106 ; reply to the **ADDRESS**, **xx.** 130.

KIRSTEIN'S method of autopsy explained and demonstrated by Dr Logan Turner, **xv.** 179.

KNEE-joints, excision of both, **i.** 143 ; fimbriated synovial membrane of, **i.** 144 ; loose cartilage of, **i.** 1 ; **-joint**, gelatinous degeneration of, **ii.** 23 ; cast of, with enlarged bursa patellæ, **iii.** 115 ; **-joint**, exhibited, **iii.** 35 ; in section, exhibited, **iii.** 187 ; enlarged bursa patellæ of, **iii.** 115 ; **-joint**, anchylosed, specimen exhibited, **iv.** 20 ; loose cartilage from, exhibited, **iv.** 163 ; **-joint**, white swelling of, **v.** 132 ; cystic tumour of, **v.** 122 ; **-joint**, internal derangements of, and their treatment, by Professor Annandale, **vi.** 78 ; fimbriated condition of synovial membrane of, **vi.** 264 ; sarcoma of synovial membrane of, **vi.** 265 ; parts from excision of, **vi.** 192 ; **-joint**, syphilitic, exhibited, **vii.** 75 ; dressing from, exhibited, **vii.** 98 ; **-joint**, case of dislocated, exhibited, **viii.** 122 ; excision of, case exhibited, **viii.** 178 ; suggestions for improving the operation of, by Mr A. G. Miller, **viii.** 187 ; **-joint**, excision of, case exhibited, **xii.** 1 ; arthrectomy of, by Mr A. G. Miller, **xii.** 11 ; double amputation above, for spreading gangrene, patient exhibited, **xvi.** 129 ; amputation at, for malignant ulcer, patient exhibited, **xvi.** 61 ; **-joint**, cartilaginous loose bodies from, exhibited, **xx.** 107.

KOCH'S microscopic lamp, exhibited, **ix.** 82 ; treatment, by Dr Philip, **x.** 31 ; tuberculin, lupus treated by, cases exhibited, **xvii.** 4.

L

LABIUM MAJUS, elephantiasis of, specimen exhibited, **xv.** 110.

LABOUR, case of difficult, etc., by Dr Leith Napier, **ii.** 75.

LACHRYMAL GLAND, displacement of, case of, exhibited, **vi.** 224.

LAMENESS after hip-joint disease, by Prof. Chiene, C.B., **ix.** 166.

LAMINECTOMY, patient exhibited after, for paralysis, **xix.** 136 ; **xx.** 53.

LAMP, Koch's microscopic, exhibited, **ix.** 82.

LAPAROTOMY for intestinal obstruction, patient exhibited by Professor Chiene, C.B., **iv.** 269; some points in the technique of, by Sir John Halliday Croom, **ix.** 52; for traumatic cyst of pancreas, case of, exhibited, **ix.** 73; for intestinal obstruction, by Mr A. G. Miller, **ix.** 89; case of, exhibited, **ix.** 176; photograph of a child exhibited on whom the operation had been performed, **x.** 211; two patients exhibited, **xii.** 90; for intestinal obstruction, patient exhibited after operation, **xix.** 153.

LARYNGEAL neurosis, rare form of, by Dr M'Bride, **iii.** 59; paralysis, a contribution to the study of, by Dr M'Bride, **iv.** 164; stenosis, patients exhibited, **iv.** 174; neurosis, case of, exhibited, **viii.** 1; stridor, congenital, patient exhibited, **xi.** 185; original communication on, by Dr John Thomson, **xi.** 196; phthisis, patient exhibited, **xv.** 107.

LARYNX, epithelioma of, **ii.** 62; from a case of diphtheria, exhibited, **iii.** 155; and trachea exhibited from a case of croup, **iv.** 2; papilloma of, exhibited, **v.** 67; containing foreign body, **vi.** 265; fatty tumours of, by Dr P. M'Bride, **viii.** 43: from a case of diphtheritic croup, **viii.** 192; epithelioma of, **viii.** 226; cysts of, **xi.** 29; pachydermia of, by Dr P. M'Bride, **xii.** 108; excision of, patient exhibited, **xiii.** 175; successful removal of, patient exhibited, **xiv.** 5; papillomata of, removed by thyrotomy, case exhibited, **xv.** 48; autoscopy of, by Kirstein's method, demonstrated by Dr Logan Turner, **xv.** 179; warts from, exhibited, **xv.** 57; epithelioma of, specimen exhibited, **xv.** 58, 95; choking from impaction of mutton in, specimen exhibited, **xvi.** 39; entire removal of, patient exhibited, **xvii.** 1; extirpation of, for epithelioma, patient exhibited after operation, **xx.** 20; from a case of diphtheria, exhibited, **xx.** 154.

LEAD poisoning, case of, exhibited, **vii.** 1.

LEGS, artificial, by Mr Cathcart, **vii.** 15; **viii.** 63.

LEITER'S endoscope, exhibited, **vii.** 228.

LEPROSY, anæsthetic, drawings and photographs of, exhibited, **xv.** 111; tropho-neurotic, case of, exhibited, **xviii.** 192; a case of, exhibited, **xix.** 45.

LEUCOCYTHÆMIA, lesion in nervous centres in case of, exhibited, **v.** 118.

LEUCODERMA, case of, exhibited, **xv.** 56.

LEUCOPLAKIA, patient exhibited, **xv.** 95.

LEYDEN'S œsophageal retention tubes, exhibited, **ix.** 82.

LICHEN, circumscriptus, **i.** 105; drawings of, **i.** 106: ruber, case of, exhibited, **ii.** 94; marginatus, case of, exhibited, **iii.** 69; marginatus, drawings of, exhibited, **iv.** 52; planus, two patients suffering from, exhibited, **iv.** 204; pilaris, *var.* spinulosus, case of, exhibited, **xiii.** 230; of forearm, patient exhibited, **xiv.** 60; spinulosus, case of, exhibited, **xiv.** 155; of the back, case of, exhibited, **xiv.** 241; ruber planus erythematosus, case exhibited, **xv.** 1; planus, cases exhibited, **xv.** 56; planus, patient exhibited, **xvii.** 95; scrofulosorum, patient exhibited, **xvii.** 101, 185.

LIGHTNING, photograph of print of, **iii.** 6: effects of, **iii.** 7.

LIPOMATA, multiple, case exhibited, **xvii.** 57.

LIP—Reading by deaf-mutes, demonstrations given, **xiv.** 154. **Tumour** of, case exhibited, **xv.** 13.

LIVER, rupture of, exhibited, **iii.** 187 ; sarcoma of, specimen exhibited, **iv.** 39; physiological variations in the shape and position of, by Dr Symington, **vii.** 53 ; sarcoma of, **viii.** 47 ; carcinoma of, **viii.** 47 ; abscess of, specimen exhibited, **x.** 157 ; casts illustrating diseases of, exhibited, **x.** 213 ; rupture of, specimen exhibited, **xiv.** 242 ; action of, on fats, original communication, by Dr Noël Paton, **xv.** 63 ; cancer of, drawings exhibited, **xv.** 111 ; sarcoma of, original communication by Drs Bramwell and Leith, **xv.** 213 ; tropical abscess of, treated by transthoracic hepatotomy, original communication by Dr Bramwell and Mr Stiles, **xv.** 240 ; waxy disease of, specimen exhibited, **xvii.** 61 ; cirrhosis of, original communication by Dr Alex. James, **xvii.** 110 ; acute yellow atrophy of, original communication by Dr Dobie, **xviii.** 20 ; rupture of, specimen exhibited, **xviii.** 39 ; cirrhosis of, case exhibited, **xviii.** 191 ; from a case of acute yellow atrophy, exhibited, **xix.** 194.

LOCOMOTOR ATAXIA, case of, exhibited. **vii.** 74 ; specimens of the cord from a case of, exhibited, **xvii.** 60 ; patient exhibited with tabetic club-foot, **xvii.** 105.

LORETA'S operation for stricture of pylorus, patient exhibited after operation, **xvii.** 54.

LOWER EXTREMITIES, girl with unequal development of, exhibited, **xi.** 186.

LUNG,, from a case of tuberculosis, exhibited, **iii.** 153 ; with multiple sarcomatous tumours, exhibited, **x.** 117 ; disease, causing displacement of the heart, case exhibited, **x.** 212 ; disease, basal, by Dr James, **xi.** 94 ; specimen exhibited, **xii.** 19 ; sarcoma of, specimens exhibited, **xv.** 110, 111.

LUNGS and other organs, case of tuberculosis of, exhibited, **ii.** 60 ; sarcoma of, specimen exhibited, **iv.** 39 ; and heart from a case of pulmonary apoplexy, exhibited, **iv.** 2 ; carcinoma of, case of, by Dr James Ritchie and Dr A. Bruce, **ix.** 67 ; casts illustrating diseases of, exhibited, **x.** 213 ; from influenzal pneumonia, exhibited, **xiv.** 155.

LUPUS, exfoliativus, case of, exhibited, **vi.** 21 ; erythematosus, case of, exhibited, **viii.** 2 ; of the tongue, case exhibited, **viii.** 192 ; primary, of palate and nostrils, case exhibited, **xii.** 193 ; treated by thyroid, cases exhibited, **xiii.** 31, 33, 63, 175, 230, 232 ; treated with tuberculin, photographs of, cases exhibited, **xiii.** 34 ; vulgaris, commoner varieties of, and their treatment, by Dr Norman Walker, **xiii.** 180 ; vulgaris, erythematoides, case exhibited, **xiii.** 230 ; erythematosus, case of, exhibited, **xiii.** 64 ; case of, cured, exhibited, **xiv.** 17 ; erythematosus, case of, exhibited, **xiv.** 212 ; of the scalp, case exhibited, **xv.** 2 ; verrucosus, gelatine cast of, exhibited, **xv.** 62 ; cases of, exhibited, **xvi.** 57, 60, 208: erythematosus, cases exhibited, **xvii.** 6, 186 ; vulgaris, cases exhibited, **xvii.** 4, 56 : vulgaris, case of, exhibited, **xviii.** 193 ; cases of, treated by exposure to X-rays, exhibited, **xix.** 45 ; treated by X-rays, patient exhibited, **xx.** 131.

LYCOPERDON giganteum, as hæmostatic agent, specimen exhibited, **xii.** 91.

LYMPHANGIOMA circumscriptum, case of, exhibited, **ix.** 146.

LYMPHOMA, of the neck, patient exhibited after excision of, **xix.** 49 ; patient exhibited after removal of, **xx.** 21.

LYMPHO-SARCOMA, of tonsil, patient exhibited, **xx.** 42.

M

MALARIA, tropical, and its sequelæ, by Dr G. Dods, **vii.** 186.

MALFORMATION, of rectum and genitals, exhibited, **iii.** 5 ; case of, in a male child, in which rectum ended in urethra, by Dr Craig, **iii.** 69 ; of the gray matter, **iii.** 37 ; of heart, boy with heart on right side, exhibited, **xii.** 237 ; specimens of open foramen ovale, exhibited, **xii.** 193 ; congenital deformity of forearms, case exhibited, **xii.** 169.

MAMMA, tumours of, **vi.** 265 ; carcinoma of, **viii.** 22 ; contributions to the surgical anatomy of, by Mr Harold J. Stiles, **xi.** 37 ; carcinoma of, on the treatment of inoperable cases in, original communication by Dr G. T. Beatson, **xv.** 153 ; scirrhus of, specimen exhibited, **xvi.** 39 ; carcinoma of, specimen exhibited, **xvi.** 75 ; tuberculosis of, specimen exhibited, **xviii.** 137 ; map of cicatrix of carcinoma of, **xviii.** 194.

MARTIN'S screwfastener, **vi.** 193.

MASSAGE as an adjunct to medical, surgical and gynæcological practice, by Sir J. Halliday Croom, **xiii.** 202 ; discussion on, **xiii.** 209 ; in the treatment of fractures near a joint, by Mr A. G. Miller, **xiv.** 245.

MASTOID disease, case after operation for, exhibited, **xviii.** 110.

MAUSER-BULLET, brain showing track of, exhibited, **xx.** 151 ; impact of, specimens exhibited, **xx.** 153.

MAXILLA, superior, fracture of, case exhibited, **xiii.** 180.

MEATUS, external auditory, in the child, by Dr Symington, **iv.** 32.

MECKEL'S diverticulum on small intestine, specimen exhibited, **x.** 215 ; cast of an unobliterated, exhibited, **xvi.** 81 ; specimens exhibited, **xvii.** 98, 108.

MEDICAL PRACTICE, points of importance in, by His Excellency Dr Gunning, **iii.** 176.

MEDICO-CHIRURGICAL SOCIETY OF EDINBURGH, early publications of, by Dr W. Craig, **iii.** 38.

MEDULLA OBLONGATA, photographs of microscopic sections of, exhibited, **iv.** 227.

MELANOTIC SARCOMA, of conjunctiva, **iv.** 3 ; of lymphatic glands, **iv.** 52 ; **vi.** 198 ; spread of, by the lymphatics, specimen exhibited, **vii.** 218.

MEMORY, loss of, occasionally following cranial injuries, by Mr Joseph Bell, **ii.** 26.

MENINGEAL hæmorrhage, successful case of trephining for, exhibited, **xi.** 14, 35 ; successful operation for, patients exhibited, **xiv.** 2.

MENINGITIS, tubercular, section of cord in lumbar region in a case of, **iii.** 57 ; portion of the brain from a case of, exhibited, **iii.** 154 ; brain from a case of, exhibited, **vi.** 56, 113 ; chronic basal, original communication by Dr James Carmichael, **xvi.** 232 ; specimen exhibited, **xvi.** 198 ; tubercular, specimen of the smaller vessels from a case of, exhibited, **xviii.** 111.

MENINGOCELE, patient exhibited with large, **xx.** 51.

MENTAL UNSOUNDNESS, the position of the medical profession in regard to certificates of, by Dr Clouston, **iv.** 72.

MERCURY, arm of child injected with, exhibited, **xvi.** 144.

MESENTERIC GLANDS from a case of tabes mesenterica, exhibited, **v.** 3; cysts, drawings and preparations of, exhibited, **xviii.** 194.

MESENTERY, transverse rupture of, specimen exhibited, **xx.** 60.

METACARPAL BONE, congenital absence of, case exhibited, **xviii.** 131.

METHÆMOGLOBINURIA, case of paroxysmal, by Dr A. Lockhart Gillespie, **xi.** 146.

METRO-PERITONITIS, case of, **ii.** 75.

MICKULICZ'S OPERATION, case of, **viii.** 120.

MICRO-ORGANISMS, demonstration of some of the methods of cultivating, **iii.** 57.

MICROSCOPIC sections of tissue passed per rectum, exhibited, **xii.** 91.

MICROTOME, exhibited, by Dr A. Bruce, **iv.** 227; radial, exhibited, **vi.** 114; a new sliding, exhibited, **xiv.** 5; specimen exhibited, **xviii.** 82.

MILK, typhoid fever resulting from infection of, **x.** 88; sterilizer, exhibited, **xiv.** 40.

MITRAL STENOSIS, reduplication of second sound in, original communication by Dr F. D. Boyd, **xvi.** 46.

MOLE, hairy, case of, exhibited, **ii.** 25.

MOLLUSCOUS tumour, exhibited, **iii.** 37.

MOLLUSCUM CONTAGIOSUM, patient exhibited, **xiv.** 39.

MORBUS LUDOVICI, specimen from a case of, exhibited, **xix.** 53.

MORPHOEA, patients suffering from, exhibited, **iv.** 231; **v.** 183; **xv.** 13; **xx.** 48.

MURDER AND SUICIDE, a case of, original communication by Dr Harvey Littlejohn, **xix.** 64.

MUSCLES, ocular, paralysis of, photographs from a case of, exhibited, **xv.** 123.

MUSCULAR atrophy, progressive idiopathic, case of, exhibited, **ix.** 34; weakness and ligamentous laxity, case exhibited, **xv.** 138.

MUSEUM SPECIMENS, Simpson's method of illustrating, exhibited, **xvi.** 138.

MYASTHENIA GRAVIS, original communication by Dr Edwin Bramwell, **xx.** 116.

MYCOSIS FUNGOIDES, observations on a case of, by Dr Allan Jamieson, **xii.** 93.

MYELITIS, compression, **iii.** 37; sections of the spinal cord in, **iii.** 38; a case of, exhibited, **v.** 174.

MYELOID SARCOMA of lower jaw, specimen exhibited, **iv.** 226.

MYOCLONUS MULTIPLEX, case exhibited, **xix.** 44.

MYOPIA, high degree of, case exhibited, **xvi.** 55.

MYOSCLEROSIS, progressive diffuse, case of, exhibited, **ix.** 196.

MYOSITIS, rheumatic, original communication by Mr. A. G. Miller, **xvii.** 198.

MYXŒDEMA, cases of, exhibited, **vii.** 49 ; photographs of a case of, exhibited, **vii.** 50 ; symptoms of, and exophthalmic goitre contrasted, by Dr Byrom Bramwell, **x.** 126 ; patient exhibited, showing result of treatment, **xi.** 99 ; treatment of, subcutaneous injection of sheep's thyroid, **xi.** 103 ; the clinical features of, by Dr Byrom Bramwell, **xii.** 121 ; the pathology and morbid anatomy of, by Professor Greenfield, **xii.** 132 ; the treatment of, by Dr Lundie, **xii.** 133 ; cases of, exhibited, **xii.** 149, 151 ; in the male, patient exhibited, **xix.** 193.

N

NAEVOID tumour of arm and shoulder, patient exhibited, **iv.** 173.

NÆVUS punctiformis, case of, exhibited, **ix.** 147. **Neuroticus**, patient exhibited, **xviii.** 2

NAILS, congenital malformation of, case exhibited, **xii.** 191.

NASAL bougies, exhibited, **iv.** 182 ; polypi, snare for removing, **iv.** 182 ; bones, new appliance for supporting, exhibited, **vii.** 51 ; polypi, treatment of, **vii.** 229 ; saws, two reversible, exhibited, **vii.** 52 ; respirator, Feldbausch's, exhibited, **xiv.** 18.

NASO-PHARYNGEAL tumour, exhibited, **vi.** 266 ; pharynx, the place of specialism in general practice with reference to diseases of, **vii.** 88 ; pharyngeal tumours, **viii.** 55.

NATES, the fold of the, by Dr Symington, **iii.** 49.

NAUHEIM AND SCHOTT'S system of baths, **xv.** 67.

NECK, parts from a case of suicidal wound of, exhibited by the President, **iv.** 106 ; excision of glands of, case exhibited, **xvi.** 64 ; remarkable suicidal wounds of, **xvi.** 68, 134 ; glandular enlargements of, original communication by Mr A. G. Miller, **xvii.** 17.

NECROSIS, syphilitic, of frontal and parietal bones, specimen exhibited **xix.** 73.

NECROTIC pneumonia, specimen exhibited, **ix.** 65.

NEEDLE, with lens, for removal of hairs, exhibited, **iv.** 72.

NEPHRECTOMY, parts removed from a case of, **iii.** 35.

NEPHROTOMY, three cases of, by Mr A. G. Miller, **vii.** 170.

NERVE, ulnar, division of, case exhibited, **xi.** 93 ; removal of second division of fifth, patient exhibited, **xv.** 229.

NERVE-CELL, multipolar, **iii.** 37 ; vacuolated, **iii.** 37.

NERVES, bulbous enlargement of, **vi.** 78.

NERVOUS symptoms, peculiar case of, exhibited, **vii.** 216 ; disease, treatment of, by suspension, five cases exhibited, **ix.** 2 ; disease, a peculiar case of, exhibited, by Sir Thomas Granger Stewart, **xiii.** 2 ; diseases, increase of, original communication by Dr W. W. Ireland, **xix.** 77.

NEURALGIA, facial, on the cure of, by Dr Leslie, **ix.** 14 ; facial, patient exhibited, **xiv.** 58 ; trigemnial, operation for, patients exhibited, **xv.** 56, 229.

NEURITIS, multiple, by Dr A. Smart, **vii.** 199 ; diabetic, original communication by Professor Sir T. R. Fraser and Dr Bruce, Appendix, **xv.** 53 ; tubercular, original communication by Dr James, **xviii.** 8 ; peripheral, case of recovery from, exhibited, **xix.** 53.

NEUROMATA, specimens of, **vi.** 264 ; plexiform and multiple, case of, exhibited, **xviii.** 73, 77.

NEUROSES, respiratory, **vii.** 176 ; on the cure of, by Dr Leslie, **ix.** 14.

NEUROSIS, laryngeal, a rare form of, by Dr M'Bride, **iii.** 59 ; laryngeal, patient exhibited, **viii.** 1.

NITRITES, their influence on asthma and bronchitis, by Sir T. R. Fraser, **vi.** 144.

NODOSE hairs, case of, exhibited, **vii.** 227.

NOMA, case of, exhibited, **v.** 2 ; maxillary bones from a case of, exhibited, **v.** 3.

NOSE, cysts of, **xi.** 29 ; ivory shirt stud removed from, **xvi.** 71.

NUTRITION, and reproduction, by Dr A. James, **ii.** 106. **And growth** in connection with pulmonary phthisis, communication by Dr James, **iv.** 250.

O

OBESITY, dietetic treatment of, by Dr Towers-Smith, **xi.** 130.

OBITUARY NOTICES—Sir Robert Christison, **i.** 57 ; Professor Spence, **i.** 142.

OBSTRUCTION, intestinal, treated by laparotomy, by Mr A. G. Miller, **ix.** 89.

ODONTALGIA, on the cure of, by Dr Leslie, **ix.** 14.

O'DWYER'S AND COLIN'S intubation instruments, exhibited, **xv.** 230.

ŒDEMA, acute circumscribed cutaneous, by Dr Allan Jamieson, **ii.** 86.

ŒSOPHAGOSTOMY, patient exhibited on whom this operation had been performed by Professor Chiene, C.B., **iv.** 20 ; case of, exhibited, **xvi.** 62.

ŒSOPHAGOTOMY, case of, exhibited, **xiii.** 2.

ŒSOPHAGUS, malignant stricture of, **i.** 19 ; fish-bone removed from, **viii.** 63 ; cicatrical stricture of, case exhibited, **ix.** 82 ; stricture of, gastrostomy, by Dr John Duncan, **x.** 118 ; specimen exhibited, **xii.** 19 ; stricture of, notes on, original communication by Mr David Wallace, C.M.G., **xiv.** 20 ; stricture of, specimen exhibited, **xv.** 58 ; stricture of,

gastrostomy for, case exhibited, **xvi.** 125; choking from impaction of mutton in, specimen exhibited, **xvi.** 39; and stomach, from a case of carbolic acid poisoning, exhibited, **xvii.** 96; congenital malformation of, specimen exhibited, **xviii.** 112; carcinoma of, specimen exhibited, **xix.** 136.

OINTMENT, exhibited, **vi.** 266.

OLECRANON, fracture of, treated by being *wired*, case exhibited, **xi.** 167.

OLEUM DEELINÆ, **iv.** 232.

OMENTUM in connexion with hernia, **ii.** 37, 105.

OPHTHALMIA NEONATORUM, original communication by Dr Sym, **xv.** 130.

OPHTHALMOPLEGIA, externa acuta, photographs of, exhibited, **vi.** 2.

OPIUM poisoning, two cases of, original communication by Dr James Ritchie, **xv.** 223.

OPTIC ATROPHY, case of, exhibited, **vii.** 74.

ORBIT, stem of clay pipe removed from, **ix.** 176.

ORCHECTOMY, double, for enlarged prostate, patient exhibited, **xvi.** 61.

OS CALCIS, disease of, **i.** 85; from acute necrosis, exhibited, **xiv.** 17.

OSSEOUS deformity, two patients exhibited, **xviii.** 62.

OSTE-ECTOMY, performed, **v.** 2.

OSTEITIS, case of hereditary syphilitic, original communication by Dr James, **xviii.** 198.

OSTEOMALACIA carcinomatosa, original communication by Drs James Ritchie and James P. Stewart, **xv.** 253.

OSTEOMYELITIS of tibia, tuberculous patient exhibited after operation for, **xviii.** 204.

OTO-MYCOSIS, specimens exhibited, **iv.** 41.

OVARIAN tumour, exhibited, **vi.** 21; **xiv.** 155.

OVARIES, diseases of, **iii.** 36; exhibited, **iii.** 5, 143; and tubes, diseased, exhibited, **vi.** 56.

OVARIOTOMY, in a county hospital, by Dr R. Maclaren, **iv.** 139; case of, by Dr Skene Keith, **v.** 53; sequel to a case of, by Dr William Taylor, **ix.** 190.

OVARY, dermoid cyst of, exhibited, **xix.** 31.

OXALURIA and excretion of oxalic acid, original communication by Dr J. C. Dunlop, **xv.** 15.

OXY-HYDROGEN, microscopic lantern demonstration of circulation in web of frog's foot by means of, by Dr Foulis, **iv.** 162.

OZÆNA, treatment of, by cupric electrolysis, original communication by Dr M'Bride, **xviii.** 114.

P

PACHYDERMIA of the larynx, by Dr P. M'Bride, **xii.** 108.

PACHYMENINGITIS HÆMORRHAGICA, unilateral, specimen exhibited, **xvi.** 212.

PADS, indiarubber, for flat foot, exhibited, **iv.** 138.

PAGET'S DISEASE of the nipple, **viii.** 22.

PALATE and other parts destroyed by syphilis, patient exhibited after operation, **xviii.** 84; hard, sequestra from, exhibited, **xix.** 73.

PANCREAS, traumatic cyst of, case of, exhibited, **ix.** 73; abscesses in, specimen exhibited, **xiv.** 155; rupture of, specimen exhibited, **xiv.** 242; rupture of, communication by Dr R. F. C. Leith, **xiv.** 250.

PANCREATIC cysts, their relation to rupture of pancreas, by Dr R. F. C. Leith, **xiv.** 250; cyst, exhibited, **xv.** 48.

PANCREATITIS, hæmorrhagic, specimens exhibited, **xv.** 114, 117.

PAPILLOMA, neuroticum, case of, exhibited, **ii.** 74; of larynx, exhibited, **v.** 67; of the bladder, specimen exhibited, **xvii.** 109; of bladder, patient exhibited after operation for, **xviii.** 185; of larynx, patient exhibited after removal of, **xx.** 156; of bladder, specimens exhibited, **xx.** 154.

PAPILLOMATA of the larynx removed by thyrotomy, case exhibited, **xv.** 48.

PARACENTESIS, instrument for, **vi**, 193.

PARAFFIN, eczema, case of, exhibited, **iii.** 69; cancer, operation for, patient exhibited, **xiv.** 171.

PARALYSIS, facial, case of, exhibited, **ii.** 100; Bell's, patient exhibited, **iv.** 104; facial, patient exhibited, **iv.** 137; case of left facial, with strabismus, etc., by Dr Thom, **iv.** 152; laryngeal, by Dr M'Bride, **iv.** 164; pseudo-hypertrophic, father and sons suffering from, exhibited, **iv.** 229; spastic, boy suffering from, exhibited, **iv.** 229; alcoholic, case of, exhibited, **viii.** 2; of right serratus magnus, case of, exhibited, **viii.** 178; of upper extremity, **ix.** 3; pseudo-hypertrophic, **ix.** 33; facial, and other nerve cases, exhibited, **x.** 211; facial, case of, exhibited, **xi.** 93; general, of the insane, surgical treatment of, by Dr John Macpherson and Mr David Wallace, C.M.G., **xi.** 167; general, of the insane, three cases exhibited, **xiii.** 12; pseudo-hypertrophic, three cases exhibited, **xiii.** 232; pseudo-hypertrophic, cases of, exhibited, **xiv.** 58; facio-scapulo-humeral, case of, exhibited, **xiv.** 58; double facial, photographs of, exhibited, **xiv.** 201; alternate, photograph of, exhibited, **xiv.** 201; pseudo-hypertrophic, patient exhibited, **xv.** 107; of ocular muscles, photographs from a case of, exhibited, **xv.** 123; agitans, patient exhibited, **xv.** 229; general, of insane, case exhibited, **xvi.** 2; of tongue, case exhibited, **xvi.** 64; pseudo-hypertrophic, lantern demonstration of, **xvi.** 15; cases exhibited, **xvii.** 57, 58; pseudo-hypertrophic, sections of the spinal cord and muscles from a case of, exhibited, **xvii.** 61; pseudo-hypertrophic, case exhibited, **xviii.** 65; bulbar, two cases exhibited, **xviii.** 67; infantile, cases exhibited, **xix.** 44; pseudo-bulbar, case exhibited, **xix.** 46; double facial, case exhibited, **xix.** 52; laminectomy for, **xix.** 136; acute ascending due to influenza, original communication by Dr Alex. James and Dr R. A. Fleming, **xix.** 201; of the vertical movements of the eye-

balls with conservation of the lateral movements, original communication by Dr A. Bruce, **xix.** 206; of brachial flexus, case exhibited, **xx.** 146; musculo-spiral, after operation, patient exhibited, **xx.** 155; of gluteus maximus, patient exhibited, **xx.** 52; laminectomy for, patient exhibited, **xx.** 53; general, clinical and experimental observations upon, original communication by Dr Lewis C. Bruce, **xx.** 171; observations on the pathogenesis of, original communication by Dr W. Ford Robertson, **xx.** 180.

PARAMYOCLONUS MULTIPLEX, case of, exhibited, **ix.** 73.

PARAPLEGIA, spasmodic, case of, exhibited, **viii.** 189; hysterical, case exhibited, **xii.** 264 and 293.

PARASITES, of ringworm, exhibited, **xv.** 57; rare intestinal, specimens exhibited, **xvi.** 211.

PARIETAL bones, congenital and symmetrical, perforation of, patient exhibited, **xviii.** 83.

PARKER'S tracheotomy tube, exhibited, **vii.** 228.

PAROTID tumours, hardened in formalin, specimens exhibited, **xvi.** 40.

PAROTIDS, chronic enlargement of, case exhibited, **xvi.** 125.

PATELLA, dislocation of, original communication by Mr J. Shaw M'Laren, **xix.** 58.

PEA coughed up from bronchus, **viii.** 24.

PEDICULOSIS of eyelashes, case of, exhibited, **x.** 2.

PENIS, glans and prepuce of, epitheliomatous, **i.** 85; drawing of, after amputation, **vii.** 229; cervix of, constricted by a long hair, **ix.** 14; removal of, for epithelioma, case exhibited, **xvi.** 125.

PERIARTERITIS, syphilitic nodose, by Dr A. Bruce, **xiii.** 190.

PERICARDITIS, cardicentesis in a case of, original communication by Dr Sloan, **xiv.** 24; tubercular, specimen exhibited, **xix.** 195.

PERICARDIUM, tapping of, by Professor Sir T. Grainger Stewart, **iv.** 53.

PERIGRAPH, original communication on, by Dr Graham Brown, **xvi.** 109; exhibited, **xvi.** 109.

PERISTALSIS, peritonitis as a cause of increased, original communication by Mr C. W. Cathcart, **xviii.** 138.

PERITONITIS, chronic, patient exhibited, **xv.** 118; tubercular, two patients exhibited after operation for, **xvii.** 179; as a cause of increased peristalsis, original communication by Mr C. W. Cathcart, **xviii.** 138.

PERITYPHLITIS, specimens from two cases of, exhibited, **xviii.** 194.

PEYER'S GLANDS, exhibited, **ii.** 11.

PHARYNGEAL POLYPI, treatment of, by Dr P. M'Bride, **vii.** 229.

PHARYNX, gullet, and air passages, from a case of poisoning by carbolic acid, exhibited, **iii.** 155.

PHLEBITIS of the lateral sinus, patient exhibited, **xiii.** 230.

PHONENDOSCOPE, exhibited, and its use demonstrated, **xvii.** 28.

PHOTOGRAPH of a lightning print on a boy's arm, exhibited, **iii.** 6; of Hunter's chair, exhibited, **iii.** 144.

PHOTOGRAPHS of hand from injury to ulnar nerve, **i.** 34.

PHOTOGRAPHY, flash-light in, demonstrated, **xv.** 152; cheap and simple flash-light apparatus, exhibited, **xv.** 152.

PHTHISIS, diagnosis of early, by the microscope, by Dr Francis Troup, **vii.** 206; three cases cured, exhibited, **xi.** 144; incipient caseating, patient exhibited, **xiv.** 171; case of, with no physical signs, original communication by Dr Leith, **xiv.** 181; laryngeal, patient exhibited, **xv.** 107.

PHYMOSIS forceps, **vi.** 193.

PHYSICS of, an aneurism, notes on, by Dr Dawson Turner, **xiii.** 267; of cranial cavity, original communication on, by Dr James, **xvi.** 146.

PIA MATER, note on anatomy of, by Sir John Batty Tuke, **i.** 118.

PICRIC ACID, in the treatment of burns, original communication by Mr Alex. Miles, **xvi.** 221; patients exhibited treated by, **xvi.** 131.

PIGMENTATION, black, after pediculosis, drawing exhibited, **iv.** 53; case of, due to scabies, exhibited, **xii.** 190.

PILLS coated with Keratin, exhibited, **vi.** 22.

PIN, impacted in bronchus, exhibited, **vii.** 74; household, swallowed and passed per rectum, exhibited, **xi.** 126; safety, exhibited, **xv.** 14.

PITUITARY BODY, photographs of tumours of, exhibited, **vi.** 2; tumour of, exhibited, **xix.** 28

PLACENTA, minute anatomy of, in extra-uterine gestation, by Dr Berry Hart, **viii.** 227.

PLEURA, cartilaginous, exhibited, **ii.** 104; tapping of, by Professor Sir T. Grainger Stewart, **iv.** 53.

PLEURAL effusion, fœtid, by Dr A. James, **x.** 158.

PLEURITIC effusion, position of fluid in case of, by Dr Symington, **v.** 61; cases of, exhibited, **viii.** 121; from the anatomico-physiological standpoint, by Dr A. James, **viii.** 167.

PLEURISY, tubercular, specimens of, exhibited, **vi.** 78; and pleuritic effusion, **viii.** 167; tubercular, original communication by Dr A. James, **xiv.** 215.

PLEURITIS, with purulent effusion, treated by aspiration, case exhibited, **xiii.** 220.

PLEURO-PNEUMONIA and tuberculosis, by Dr Peel Ritchie, **viii.** 3.

PNEUMONIA, necrotic, specimen of, exhibited, **ix.** 65; croupous in children, by Dr John Playfair, **ix.** 202; influenzal, lungs from, exhibited, **xiv.** 155; of childhood, acute, original communication by Dr James Carmichael, **xvii.** 148.

PNEUMO-THORAX and pneumo-pericardium, case of spontaneous, by Dr R. A. Lundie, **x.** 200.

PODAGRAE, PAROXYSMUS, original communication by Dr George W. Balfour, **xvii.** 163.

POISONING by bisulphide of carbon, by Dr A. Bruce, **iii.** 145 ; by carbolic acid, **iii.** 155 ; by nitrate of potash, case of, by the President, **iv.** 23 ; by corrosive sublimate, **vi.** 14 ; by Bow's liniment, **vi.** 78 ; by food stuffs, by Dr Philip, **vi.** 242; by Dr Hare, **vi.** 254 ; lead, **vii.** 1 ; by opium, two cases of, original communication by Dr James Ritchie, **xv.** 223 ; sulphonal, original communication by Dr Gulland, **xviii.** 49 ; hydrochloric acid, stomach exhibited, **xviii.** 206 ; chloride of zinc, stomach exhibited, **xviii.** 206.

POISONOUS, fluid containing corrosive sublimate, exhibited, **vi.** 3 ; products in food stuffs, **vi.** 242, 254.

POLYOMYELITIS, extensive acute anterior, case of, exhibited, **xviii.** 134.

POLYPI, nasal, snare for removing, exhibited by Dr M'Bride, **iv.** 182 ; nasal and pharyngeal, methods of treating, by Dr M'Bride, **vii.** 229.

POLYPOID growths, exhibited, **iii.** 37.

POLYPUS of rectum, **i.** 85.

POTASH, nitrate of, case of poisoning by, etc., by Sir Henry D. Littlejohn, **iv.** 23.

POTT'S FRACTURE, case exhibited, **xviii.** 185.

PREGNANCY, tubal, patient exhibited after operation for, **xvii.** 181 ; rupture of, specimens exhibited, **xvii.** 25-108 ; extra-uterine, specimen exhibited, **xvii.** 188.

PROSTATE GLAND, exhibited, **ii.** 62 ; scirrhus, specimen exhibited, **iv.** 176 ; middle lobe, successfully removed and exhibited, **ix.** 166 ; enlarged, treatment of, by Bottini's method, **x.** 27 ; enlarged, treatment of, by Mr David Wallace, C.M.G., **xiv.** 233 ; enlarged, double orchectomy, for, patient exhibited, **xvi.** 61 ; enlarged, treatment of, original communication by Mr Alexis Thomson, **xvii.** 188 ; hypertrophy of, specimen exhibited, **xviii.** 75 ; fibro-adenoma of, specimen exhibited, **xviii.** 76 ; enlarged, residual urine in cases of, original communication by Mr A. G Miller, **xix.** 197 : enlarged, specimen exhibited, **xx.** 9.

PSEUDO-HYPERTROPHIC PARLYSIS, **i.** 84.

PSORIASIS, **palmaris**, **i.** 58 ; treated by thyroid, cases exhibited, **xiii.** 31, 63 ; case of, exhibited, **xiv.** 211 ; case exhibited, **xvi.** 196.

PSOROSPERMOSIS FOLLICULARIS VEGETANS, case of, exhibited, **xviii.** 71.

PULMONARY—Artery, aneurism of, **iii.** 156. **Phthisis**, nutrition and growth in connexion with, by Dr James, **iv.** 250. **Tuberculosis** in diabetes, specimen exhibited, **xviii.** 198.

PULSE, venous, the significance of, by Dr James Mackenzie, **xiii.** 69.

PUNJAB, toxicology in the, original communication by Surg.-Captain Bedford, **xvi.** 24.

PURPURA HÆMORRHAGICA, section of kidney, spleen, and liver in a case of, **vi.** 197.

PUSTULE, malignant, specimens exhibited, **xvii.** 64 ; **xviii.** 197.

PYLORIC — **Stenosis**, patient exhibited after operation for, **xv.** 50. **Tumour**, patient exhibited after removal of, **xix.** 21; specimen exhibited, **xix.** 31. **Obstruction**, four cases of, treated by gastro-jejunostomy, exhibited, **xx.** 61.

PYLORUS—**Cancer** of, patient exhibited after operation, **xv.** 227. **Congenital hypertrophy** and **stenosis** of, by Dr John Thomson, **xvi.** 182. **Stenosis** of, **xvi.** 182; specimens of, exhibited, **xvi.** 179. **Excision** of, case exhibited, **xvi.** 2. **Stricture** of, Loreta's operation for, successfully performed, case exhibited, **xvii.** 54. **Carcinoma** of, patients exhibited, **xviii.** 185.

PYOSALPINX, specimens of, exhibited, **iii.** 36.

Q

QUEEN VICTORIA, reference to her death by the President, **xx.** 75.

R

RABBIT, immunized against cobra poison, exhibited, **xiv.** 212; illustrative of the value of antivenin, exhibited, **xiv.** 212.

RADIAL microtome, exhibited, **vi.** 114.

RADIUS, absence of, **ii.** 104; position of hand in fracture of lower end, drawing exhibited, **iv.** 105; double fracture of, case of, exhibited, **vii.** 97; congenital absence of, cast exhibited, **ix.** 5; and thumb, congenital absence of, patient exhibited, **xvii.** 178; with old standing fracture, exhibited, **xix.** 74.

RANULA, specimen exhibited, **xviii.** 76.

RAYNAUD'S DISEASE, case of, original communication by Dr A. R. Urquhart, **xiv.** 40; case exhibited, **xvi.** 59.

RAYS, X-, localisation of foreign bodies by means of, original communication by Dr Dawson Turner, **xvii.** 99.

RECTUM, epithelioma of, exhibited, **v.** 133; **vi.** 265; colotomy for malignant disease of, patient exhibited, **xii.** 51; cancer of, removed by Kraske's method, **xvii.** 69; carcinoma of, patient exhibited after operation, **xviii.** 64.

REGURGITATION of the pulmonary artery, original communication by Dr Boyd, C.M.G., **xviii.** 41.

RENAL—**Calculus**, exhibited, **vi.** 242, 266. **Tumour**, original communication on, by Mr F. M. Caird, **xvi.** 180.

REPRODUCTION and nutrition, by Dr A. James, **ii.** 106.

RESEARCH case, clinical, exhibited, **xviii.** 137.

RESPIRATION, Cheyne-Stokes, by Dr G. A. Gibson, **viii.** 193.

RESPIRATOR, nasal, Feldbausch's, exhibited, **xiv.** 18.

RESPIRATORY neuroses, **vii.** 176; spasm, infantile, by Dr John Thomson, **xi.** 196.

RHEOSTAT, exhibited, **xi.** 14.

RHEUMATIC—Arthritis, **ii.** 104. **Myositis**, original communication by Mr A. G. Miller, **xvii.** 198.

RHINITIS, recurrent fibrinous, notes on a case of, by Dr Burn-Murdoch, **xiii.** 268.

RIB, cervical, patient with, exhibited, **ii.** 26; specimen of, exhibited, **ii.** 26; cervical, patient exhibited, **xv.** 54.

RIBS, portion of, removed for empyema, **iv.** 11; sarcoma of, **iv.** 39; resection of, in empyema, **v.** 185; cervical, with example in living subject, by Mr David Wallace, C.M.G., **xi.** 24.

RICKETS, the etiology of, by Dr Macdonald Brown, **iv.** 205; pseudo-hypertrophic paralysis in, **ix.** 33; case of, exhibited, **xvi.** 1; fracture of femur, humerus, and clavicle of an infant, specimen exhibited, **xviii.** 38.

RICKETY pseudo-paralysis, case exhibited, **xvii.** 57.

RIDER'S bone, specimen of, exhibited, **xi.** 70.

RINGWORM, parasites of, exhibited, **xv.** 57; specimen of skin exhibited, **xv.** 141; case exhibited, **xvi.** 133; specimen of, exhibited, **xvi.** 74; skin with, exhibited, **xvi.** 74; treated by X-rays, patient exhibited, **xx.** 156.

RODENT ULCER, what constitutes, by Dr Norman Walker, **xii.** 199; cases exhibited, **xiii.** 33, 221.

RÖNTGEN process, demonstration of, by Dr Dawson Turner, **xv.** 95; photographs by, exhibited, **xv.** 95, 151; rays, stereoscopic photographs of injected blood-vessels, **xvii.** 183; apparatus, improved, demonstrated, **xx.** 63.

S

SAFETY-PIN, exhibited, **xv.** 14.

SALIVA, the activity of, in diseased conditions, original communication by Dr Aitchison Robertson, **xix.** 141.

SALIVARY fistula, case of, exhibited, **vii.** 97.

SALOL, in the treatment of small-pox, original communication by Dr Charles Begg, **xix.** 56.

SALVE muslin, Dr Unna's, **i.** 19.

SARCOMA, round-celled, of undescended testicle, **i.** 144; melanotic, of conjunctiva, **iv.** 3; of ribs, liver and lungs, specimen exhibited, **iv.** 39; of hard palate, specimen exhibited, **iv.** 41; melanotic, in the lymphatic glands, specimen exhibited, **iv.** 52; of arm, scapula, and clavicle, specimen exhibited, **iv.** 175; various tumours of, exhibited, **iv.** 178; myeloid, of lower jaw, exhibited, **iv.** 226; melanotic, of skin, brain, etc., by Drs Jamieson and Bramwell, **vi.** 198; of neck, **vi.** 262; of clavicle, **vi.** 265; of synovial membrane of knee-joint, **vi.** 265: melanotic, spread of, by the lymphatics, specimen of, exhibited, **vii.** 218; of liver, **viii.** 47; melanotic of sole, case exhibited, **xii.** 192; of skull, specimen of, exhibited, **xiv.** 245; of lung, specimens exhibited, **xv.** 110, 111; of liver, specimen drawings of, exhibited, **xv.** 111; of liver, original communica-

tion by Drs Bramwell and Leith, **xv.** 213; melanotic, of groin and pelvis, case exhibited, **xvi.** 65; of eyeball, specimen exhibited, **xvi.** 179; of axilla, recurrent, specimen exhibited, **xvi.** 39; tumour, exhibited, **xvi.** 139; amputation of upper extremity for, **xvi.** 62; of thigh, specimen exhibited in Jores' fluid, **xvii.** 68; of brain, specimen exhibited, **xix.** 54; of testicle from an infant, exhibited, **xx.** 155.

SARCOMATOUS tumours of lung, exhibited, **x.** 117.

SAW, ordinary joiner's, used for suicidal cut-throat, **iii.** 209; Wyeth's, exhibited by Mr Miller, **iv.** 2.

SAWS, reversible nasal, exhibited, **vii.** 52.

SCABIES, producing pigmentation simulating Addison's disease, case exhibited, **xii.** 190.

CALP, malignant adenoma of, photograph of, exhibited, **xiv.** 207; evulsion of the entire, patient exhibited after, **xix.** 50; complete evulsion of, case exhibited, **xx.** 50.

SCAPULA, tumour of, patient and tumour exhibited, **xi.** 186.

SCARLATINA, bacillus, exhibited, **vi.** 265; committee of investigation appointed, **vi.** 266; reports of, **vi.** 280, 303.

SCARLET FEVER, relapse or recrudescence in, by Dr G. P. Boddie, **x.** 189.

SCHALL'S chloride of silver battery, exhibited, **ix.** 166.

SCHLAGINTWEIT'S catheter, cystoscope, exhibited, **xx.** 131.

SCIRRHUS, of prostate, specimen exhibited, **iv.** 176; of kidney, **vi.** 268; of male breast, specimen exhibited, **vii.** 220; of the breast, specimen exhibited, **xvi.** 39.

SCLERODERMA, case exhibited, **xvi.** 196, 207.

SCLEROSIS, amyotrophic lateral, sections from the cord in a case of, exhibited, **xvi.** 10; progressive muscular, patient exhibited, **xvii.** 182; disseminated, a case of, exhibited, **xix.** 71; of the cerebro-spinal type, case exhibited, **xx.** 146; amyotrophic lateral, specimens illustrating, exhibited, **xx.** 154.

SCORBUTUS, case of, exhibited, **xiv.** 174.

SEMILUNAR cartilage, operation for displaced, by Professor Annandale, **iv.** 67.

SENSORY power, loss of, in lower limbs, **ii.** 24.

SERRATUS MAGNUS, paralysis of, **viii.** 178.

SERUM, anti-diphtheritic. exhibited, **xv.** 120; diagnosis of typhoid fever, demonstrated, **xvi.** 71.

SHOULDER-JOINT, disease of, **ii.** 104; in relation to dislocations and fractures, by Mr F. M. Caird, **vi.** 6.

SIGMOID FLEXURE, exhibited, **viii.** 62.

SIMPSON'S method of exhibiting museum specimens, demonstrated, **xvi.** 138.

SINGULTUS, alcoholic, case of, exhibited, **x.** 211.

SINUS, frontal, trephining, case of, exhibited, **ix.** 81.

SINUSES, frontal and maxillary, suppuration in, associated with asthma, **xix.** 192.

SKELETON of vertebral column, pelvis and legs, with ligaments from a case of double dislocation of the hip, exhibited, **xiv.** 208.

SKIAGRAPHS of arm of child in which the arteries were injected with mercury, exhibited, **xvi.** 144.

SKIN—Grafting, cases of, exhibited, **viii.** 167; **ix.** 33. **Elastic**, case exhibited, **xi.** 37. **Diseases** of, antimony in, **xi.** 153. **Grafting** from the lower animals, notes on, original communication by Mr A. Miles, **xiv.** 201; cases of, exhibited, **xiv.** 171, 172. **Transplantation** of, from lower animals, patients exhibited, **xiv.** 171, 172. **Disease**, an undescribed form, patient exhibited, **xvi.** 54. **Carcinoma** of, case exhibited, **xx.** 4. **Grafting**, patient exhibited, showing result of, **xx.** 50.

SKULL, horizontal section of, exhibited, **vii.** 75; from a case of gunshot injury, exhibited, **vii.** 98; fracture of the base of, case exhibited, **viii.** 120; perforating tumour of, **ix.** 3; overgrowth of, following course of fifth nerve, exhibited, **x.** 3; cast of King Robert the Bruce's, exhibited, **xiii.** 232; from a case of congenital syphilis, exhibited, **xiv.** 60; sarcoma of, specimen exhibited, **xiv.** 245; depressed fracture of, specimen exhibited, **xv.** 110; brain exhibited, **xv.** 110; pistol-wound of, specimen exhibited, **xvi.** 134; cylindroma of base of, specimen exhibited, **xvii.** 63; compound depressed fracture of, patient exhibited, **xvii.** 176; with unusual arrangement of frontal sinuses, exhibited, **xviii.** 76; fracture of, specimen exhibited, **xix.** 29; injuries to, a series of specimens, exhibited, **xix.** 31; patient exhibited who had suffered from a rare form of fracture of, **xix.** 55; cap, from a case of Jacksonian epilepsy, exhibited, **xx.** 28.

SMALL INTESTINE, showing a Meckels' diverticulum, exhibited, **x.** 215; stenosis of, after strangulated hernia, original communication by Mr Alexis Thomson, **xx.** 110; enterectomy for stricture of, patient exhibited, **xx.** 149.

SMALLPOX, three cases of recovery from, exhibited, **xiii.** 12; salol in the treatment of, original communication by Dr Charles Begg, **xix.** 56.

SNARE for removing nasal polypi, exhibited by Dr M'Bride, **iv.** 182.

SOAP of resorcin and salicylic acid, specimen exhibited, **xiii.** 223.

SOAPS, medicinal, exhibited, **iv.** 273; specimens of, exhibited, **xi.** 186.

SOLE, melanotic sarcoma of, case exhibited, **xii.** 192.

SORE, primary syphilitic, on upper eyelid, case of, exhibited, **vii.** 215; throat, and its relation to milk supply, by Mr J. M. Cotterill, **vii.** 220.

SPASM, infantile respiratory, by Dr John Thomson, **xi.** 196; congenital, original communication by Dr John Thomson, **xvi.** 182.

SPASMODIC paraplegia, case of, exhibited, **viii.** 189.

SPASTIC disease, two cases exhibited, **xii.** 264, 294.

SPECIALISM in general practice, with reference to diseases of the eye, ear, and throat, by Dr George Hunter, **iv.** 232; **vii.** 76.

SPECULUM, nasal, new form of, exhibited, **xii.** 92.

SPERMATIC CORD, torsion of, specimen exhibited, **xix.** 195.

SPHYGMOMETER, exhibited, **xi.** 251.

SPINA BIFIDA, lateral, patient exhibited, **xv.** 49; combined with congenital hydrocephalus, exhibited, **xvi.** 70; occulta, case exhibited, **xvi.** 124.

SPINAL—Cord, sections of, exhibited, **ii.** 59; lesion of, in cervical region, case of, exhibited, **vii.** 217. **Column**, frozen sections of, specimens exhibited, **ix.** 197. **Column** in the infant, by Dr J. W. Ballantyne, **xi.** 71. **Cord**, lantern demonstration of a descending tract in the posterior columns, **xvi.** 10.

SPINE, lateral curvature of, by Dr Scott Lang, **ix.** 65.

SPLASHING sound produced synchronously with cardiac action, communication by Dr William Russell, **iv.** 245.

SPLEEN, rachitic, exhibited, **v.** 133; amyloid disease of, unique specimen exhibited, **xvi.** 71.

SPLINT, modification of Thomas's, exhibited, **ix.** 183.

SPOON, Volkmann's, exhibited, **x.** 2.

SPRAY, and germs, Mr John Duncan on, **ii.** 49. **Producer**, exhibited, **ii.** 38; wound treatment without the, by Mr John Duncan, **iii.** 123. **Germs and the**, by Professor Chiene, C.B., **iii.** 217.

SPRENGEL PUMP, for drainage of bladder, exhibited, **xiv.** 60.

SPUTUM, micro-photographs of constituents of, exhibited, **v.** 3.

STAPHI'S OPERATION, case exhibited, **xiii.** 125.

STATISTICS concerning alcoholic patients, original communication by Dr A. Lockhart Gillespie, **xiv.** 268.

STEINER'S vermin-killer, analysis of, **v.** 123.

STENO'S DUCT, case of fistula of, exhibited, **iii.** 34.

STENOSIS, laryngeal, patients exhibited, **iv.** 174; of intestine, specimen exhibited, **ix.** 196; pyloric, patient exhibited after operation for, **xv.** 50; of small intestine after stragulated hernia, original communication by Mr Alexis Thomson, **xx.** 110; pulmonary, patient exhibited, **xx.** 150.

STERALIZER for instruments, exhibited, **xv.** 60.

STERILIZING of steel instruments, apparatus for, exhibited and explained, by Mr C. W. Cathcart, **ix.** 180.

STERNO-MASTOID, tumour of, **ii.** 37, and **v.** 33.

STERN'S Geheim-camera, exhibited, **vii.** 228.

STOMACH, ulceration of, rupture, and peritonitis, exhibited, **iii.** 155; case of perforating ulcer of, **iii.** 77; with perforating ulcers, exhibited by the President, **iv.** 41; gunshot wound of, **v.** 153; hour-glass contraction of, exhibited, **vi.** 192; some practical results from the chemical examination of the contents of the healthy, by Dr Lockhart Gillespie, **xii.** 54; dilatation of, patient exhibited after operation for, **xv.** 50; ulcer of, specimen

exhibited, **xv.** 58; perforation of, specimen exhibited, **xv.** 121; after operation for gastric ulcer, exhibited, **xvii.** 97; cancer of, **xviii.** 1; mammillated, two specimens exhibited, **xviii.** 111; exhibited in hydrochloric acid poisoning, **xviii.** 206; exhibited in chloride of zinc poisoning, **xviii.** 206; tumour of pyloric end of, exhibited, **xix.** 31; from two cases of carbolic acid poisoning, exhibited, **xix.** 194; from a case of acute yellow atrophy, exhibited, **xix.** 194; showing acute gastritis, exhibited, **xx.** 60; eight days after operation for ruptured gastric ulcer, exhibited, **xx.** 153.

STRABISMUS, double convergent, patient exhibited, **iv.** 137; case of, with left facial paralysis, by Dr Thom, **iv.** 152.

STRANGULATION and hanging, by Dr C. Templeman, **xii.** 240.

STRICTURE, traumatic, its treatment by supra-pubic cystotomy, by Mr John Duncan, **iii.** 200; of œsophagus, case of, exhibited, **ix.** 82; of œsophagus, notes on, original communication by Mr David Wallace, C.M.G., **xiv.** 20; of urethra, resilient, original communication by Dr C. W. MacGillivray, **xvi.** 226.

STRICTURES of the urethra, on a new instrument for the treatment of, by Mr A. G. Miller, **xii.** 286.

STRIDOR, congenital laryngeal, patient exhibited, **xi.** 185; original communication on, by Dr John Thomson, **xi.** 196.

STROPHANTHUS, original communication by Dr George W. Balfour, **xv.** 141.

STRUMOUS disease of knee-joint, **viii.** 187; glands, discussion on, **viii.** 146.

STRYCHNIA, case of poisoning by, by Dr Allan Gray, **v.** 123.

STUD, which had been swallowed, exhibited, **iii.** 145.

STUMP, healed by first intention, case exhibited, **x.** 133.

STUMPS, bulbous enlargement of nerves in, **vi.** 78.

SUBLINGUAL GLAND, epithelioma of, **vi.** 192.

SUFFOCATION of infants, 258 cases of, by Dr C. Templeman, **xi.** 210.

SUICIDAL cases, specimens of, exhibited, **xvi.** 68, 134; cut-throat, specimens exhibited, **xvii.** 96, 187, 188.

SUICIDE AND MURDER, a case of, original communication by Dr Harvey Littlejohn, **xix.** 64.

SULPHONAL, specimen exhibited, **vii.** 220; poisoning, original communication by Dr Gulland, **xviii.** 49.

SUPPURATION in osseous cavities, original communication by Dr P. M'Bride, **xiv.** 156.

SUPRA-RENAL CAPSULES, exhibited, **iii.** 69; carcinoma of, notes of case of, by Dr James Ritchie and Dr A. Bruce, **ix.** 67.

SURGERY, abdominal, recent work in, by Sir J. Halliday Croom, **x.** 76; cranial, cases of, by Dr W. Johnston, **xiii.** 170; patients exhibited, illustrative of, **xiii.** 125, 126, 127, 157; intra-cranial, discussion on, by Professor Annandale and others, **xiii.** 97.

SUSPENSION TREATMENT for nervous cases, **ix.** 2.

SYNOVIAL MEMBRANE, fimbriated, **i.** 144; of knee-joint, **vi.** 264; sarcoma of, **vi.** 265.

SYPHILIS, the treatment of, by Dr Francis Cadell, **i.** 9; congenital, case of, exhibited, **ii.** 24; cerebral, **vi.** 271; acquired, case of, in a child, exhibited, **xii.** 1; secondary, ulcerative form of, patients exhibited, **xiv.** 39; congenital, patient exhibited, **xiv.** 60; water-colour drawings of, exhibited, **xiv.** 60; tertiary, patient exhibited, **xv.** 179; tertiary, cases exhibited, **xvi.** 77, 126; photographs of, exhibited, **xvi.** 81; cases of, exhibited, **xvii.** 94, 95; cases of, exhibited, **xviii.** 70, 84, 132, 193, 197.

SYPHILITIC sore, primary, on upper eyelid, case of, exhibited, **vii.** 215; nodose periarteritis, by Dr A. Bruce, **xiii.** 190; diseases of nervous system, patient exhibited, **xvii.** 182; necrosis of frontal and parietal bones, specimen exhibited, **xix.** 73.

SYPHON exhaustion in cases of empyema, **vii.** 154.

SYRINGE, aspirator, **vi.** 22, 242; aspirator, exhibited, **viii.** 22; Beck's, for injecting anti-diphtheritic serum, exhibited, **xv.** 120; a glass-barrelled, exhibited, **xx.** 154.

SYRINGOMYELIA, demonstrations from cases of, **xiii.** 223; sections from cases of, exhibited, **xvi.** 71; microscopic section of the medulla oblongata from a case of, exhibited, **xvii.** 60; case of, exhibited, **xix.** 51; case of, exhibited, **xx.** 147.

SYSTEMATIC LECTURES in the teaching of medicine and surgery, by Mr C. W. Cathcart, **ix.** 91.

T

TABES, case of, exhibited, **xx.** 6.

TADPOLE, demonstration of the circulation in the gills of, **iii.** 145.

TÆNIA SAGINATA, tri-radiate, specimen exhibited, **xvii.** 67.

TALIPES EQUINO-VARUS, cases of, exhibited, **iv.** 70; **v.** 2; specimen exhibited, **v.** 178; case of, exhibited, **vii.** 51; patient after operation, exhibited, **xvi.** 79; casts and photographs of, exhibited, **xvi.** 81.

TARSUS, resection of, **ii.** 100; tubercular disease of, patient exhibited, **xv.** 139; disease of, patient exhibited after Mikulicz's operation for, **xix.** 47.

TAVEL'S, PROF., anti-diphtheritic serum, exhibited, **xv.** 120.

TEACHING, systematic, of medicine and surgery, by Mr C. W. Cathcart, **ix.** 91.

TEETH, set of false, extracted from œsophagus, **ii.** 105; false, plate with, removed by a double operation of œsophagotomy and gastrotomy, **xiii.** 2; false, œsophagostomy for removal of, case exhibited, **xvi.** 62.

TEMPERATURE, chart of abnormally low, exhibited, **iv.** 223; charts of two stricture cases, exhibited, **iv.** 226; observations, clinical value of by Dr Affleck, **vii.** 155.

TEMPORAL BONE, from a case of abscess in brain, exhibited, **xiv.** 175.

TEMPORO-SPHENOIDAL, BRAIN, abscess in, specimen exhibited, **xiv.** 244.

TESTES, tubercular, exhibited, **viii.** 24.

TESTICLE, round-celled sarcoma of, **i.** 144; undeveloped and undescended, with sac of, **i.** 84; on a tumour of, communication by Mr Caird, **iv.** 275; diseases of, specimens exhibited, **iv.** 51; sections of, exhibited, **iv.** 275; ectopic perineal, patient exhibited, **xvii.** 141; on the development of, original communication by Dr James Foulis. **xviii.** 217; cystic tumour of, specimen exhibited, **xviii.** 195; and epididymis, specimen exhibited, **xviii.** 197; undescended, **xix.** 195; misplaced and undescended, original communication by Professor Annandale, **xx.** 11; sarcoma of, in an infant, specimen exhibited, **xx.** 155.

TESTICLES, diseased, exhibited, **v.** 52, 152.

TETANOID CONVULSIONS, by Dr Ronaldson, **ix.** 184.

TETANUS, microscopic section of nerve from a case of, exhibited, **iv.** 226; traumatic, case of, exhibited, **vi.** 2.

TETANY case of, exhibited, **x.** 131.

THERAPEUTICS, cardiac, discussion on, by Professor Sir T. R. Fraser and others, **xiv.** 68.

THIERSCH'S method of epithelial grafting, case exhibited, **x.** 213.

THIGH, amputation of, under ice, case exhibited, **xi.** 144.

THIRST, quenching of, after abdominal operations, by Mr C. W. Cathcart, **xii.** 262.

THOMSEN'S DISEASE, case of, exhibited, **ix.** 196; disease, patient exhibited, with some analogy to, **xvii.** 175.

THORACIC ANEURISM, cast of, exhibited, **vii.** 74.

THORAX, congenital defect of, patient exhibited, **xiv.** 39; instrument for delineating the shape of, exhibited, **xvi.** 109.

THROAT, the place of specialism in general practice with reference to diseases of, **vii.** 84; sore, and its relation to milk supply, **vii.** 220; carcinoma of, parts removed from, exhibited, **xiii.** 17; cut, specimen exhibited, **xx.** 59.

THROMBOSIS, of the cerebral sinuses, drawings from a case of, exhibited, **xiv.** 201.

THUMB, metacarpal of, removed for epithelioma, case exhibited, **x.** 212; amputated, exhibited, **xiii.** 15.

THYROID treatment in psoriasis, cases exhibited, **xiii.** 31, 63; in lupus, cases exhibited, **xiii.** 31, 33, 63, 175, 230, 232; in cretinism, **xiii.** 65; in ichthyosis, case exhibited, **xiii.** 176; extract in the treatment of prolonged insanity, patient exhibited, **xiv.** 199; cachexia, after excision of a suppurating goitre, patient exhibited, **xix.** 48.

THYROIDECTOMY, two cases of, in women, exhibited, **xi.** 146.

THYROIDITIS, case of, exhibited, **x.** 1.

THYROIDS, sheeps', specimens exhibited, **xii.** 151.

TIBIA, congenital absence of, specimen exhibited, **ix.** 4 ; removal of middle two-thirds of, patient exhibited, **xx.** 47 ; a deformed, exhibited, **xx.** 56.

TINEA CIRCINATA, case exhibited, **xvi.** 134.

TINNITUS AURIUM, the causes of, by Dr P. M'Bride, **i.** 106 ; objective, patieut with, exhibited, **iv.** 39.

TOE, stiff great, condition of, **vi.** 277.

TONGUE - depressor, Fergusson's, **i.** 69 ; half, removed for cancerous disease, exhibited, **iii.** 154 ; and air-passages from a case of suffocation during a fire, exhibited by the President, **iv.** 106 ; half of, removed for papillomatous tumour, exhibited, **iv.** 225 ; tubercular ulcer of, **v.** 185 ; adenoid tissue at base of, a factor for throat symptoms, **vi.** 271 ; epithelioma of, **vi.** 265 ; way of raising the, etc., **viii.** 124 ; lupus of, **viii.** 192 ; excision of, patient exhibited, **xiii.** 175 ; hyperkeratosis of, specimen exhibited, **xiii.** 221 ; ulceration of, case exhibited, **xv.** 56 ; ichthyosis of, case exhibited, **xv.** 95 ; paralysis and atrophy of, case exhibited, **xvi.** 64 ; excision of, case exhibited, **xvi.** 78 ; and glands from a case of malignant disease, exhibited, **xvi.** 81 ; removal of, patient exhibited, **xvii.** 56 ; angioneurotic œdema of, case exhibited, **xviii.** 66 ; hemiatrophy of, case exhibited, **xviii.** 68 ; cancer of, patient exhibited after removal of tongue, **xx.** 48.

TONSIL, tumour of, patient exhibited, **xx.** 42.

TONSILLAR, disease in children, by Dr James Carmichael, **iii.** 188 ; calculus, exhibited, **xviii.** 3.

TONSILOTOME (Mathieus), exhibited, **xv.** 60.

TONSILS, function of, by Dr G. L. Gulland, **x.** 215 ; cysts of, by Dr P. M'Bride, **xi.** 29.

TORTICOLLIS, congenital, patient exhibited after operation, **xviii.** 184.

TOXICOLOGY, in the Punjab, original communication by Surgeon-Captain Bedford, **xvi.** 24.

TRACHEA from a case of diphtheritic croup, **viii.** 192 ; autoscopy of, by Kirstein's method, demonstrated, by Dr Logan Turner, **xv.** 179.

TRACHEOTOMY, sequelae of, by Dr J. Maxwell Ross, **ii.** 38 ; preliminary, as an aid to certain operations, by Professor Annandale, **vi.** 71 ; in children, by Dr Thom, **vii.** 235 ; for diphtheria, two patients exhibited, **xiii.** 180 ; specimens illustrating, exhibited, **xiii.** 180 ; for diphtheria, patient exhibited, **xiv.** 14 ; wound, cicatrix of, specimen exhibited, **xvii.** 188.

TRADE-LIKE MOVEMENTS following head injuries, original communication by Mr Alexander Miles, **xvi.** 40.

TRANCES, extreme cases of, **xi.** 81.

TRANSPLANTATION of bone, case of, exhibited, **viii.** 225.

TRANSPOSITION of thoracic and abdominal viscera, case of, exhibited, **vii.** 177.

TRAUMATIC STRICTURE, its treatment by supra-pubic cystotomy, by Mr John Duncan, **iii.** 200.

TREMORS, muscular, cases exhibited, **xvi.** 56.

TREPHINE, a new form of, exhibited, **xix.** 74.

TREPHINED over number one area of Ferrier, patient exhibited by Professor Chiene, C B., **iv.** 270 ; patient, exhibited after operation, **vii.** 110.

TREPHINING of frontal sinus, case of, exhibited, **ix.** 81 ; note on a method of, original communication by Mr J. M. Cotterill, **xiv.** 5 ; patient after, exhibited, **xv.** 140.

TRICHOCEPHALUS DISPAR, specimen exhibited, **xvi.** 211.

TRICHOPHYTON invading the hair, exhibited, **xvi.** 210.

TRIGEMINAL neuralgia, operation for, patients exhibited, **xv.** 56, 229.

TROPICAL malaria and its sequelae, by Dr G. Dods, **vii.** 186.

TRUSS for infants, exhibited, **xv.** 14.

TUBAL PREGNANCY, rupture of, specimens exhibited, **xvii.** 25, 108.

TUBERCLE, bacillus of, exhibited, **ii.** 37 ; of choroid, exhibited, **ii.** 37 ; bacilli of, easy method for detecting, described, **v.** 186.

TUBERCULAR, pleurisy, **vi.** 78 ; invasion of bronchi, **vi.** 196 ; testes, exhibited, **viii.** 24 ; ulceration of bladder, by Dr Philip, **viii.** 57 ; pleurisy, original communication by Dr A. James, **xiv.** 215 ; tumours of the cerebellum, exhibited, **xiv.** 243 ; lesions, multiple and symmetrical, patient exhibited, **xv.** 55 ; lesions, in different organs, specimens exhibited, **xviii.** 194.

TUBERCULIN in treatment of lupus, **xiii.** 34 ; Koch's, lupus treated by, cases exhibited, **xvii.** 4.

TUBERCULOSIS, **ii.** 60 ; lung from a case of, exhibited, **iii.** 153 ; on the early stages of, by Dr Gibson, **iii.** 210 ; animal, in relation to consumption in man, **vii.** 110 ; and pleuro-pneumonia, **viii.** 3 ; pulmonary, a thousand cases of, by Dr Philip, **xi.** 104 ; of the upper air passages, by Dr P. M'Bride, **xi.** 187.

TUBERCULOUS disease of wrist, patient exhibited, **xx.** 48.

TUMOUR of sterno-mastoid, **ii.** 37 ; larynx, **ii.** 62 ; brain, **ii.** 94 and 101 ; fatty and fibro-cellular, exhibited, **iv.** 22 : sarcomatous of ribs, exhibited, **iv.** 39 ; œsophageal, exhibited, **iv.** 40 ; recurrent, exhibited, **iv.** 52 ; fatty and fibro-cellular, patient exhibited after operation, **iv.** 103 ; thoracic, specimen exhibited, **iv.** 137 ; nævoid, of arm and shoulder, patient exhibited, **iv.** 173 ; sarcomatous, various, exhibited, **iv.** 178 ; adenoid, various, from naso-pharynx, exhibited, **iv.** 224 ; papillomatous of tongue, specimen exhibited, **iv.** 225 ; adenoid of male mamma, specimen exhibited, **iv.** 226 ; of sterno-mastoid, exhibited, **v.** 33 ; fibro-cystic, of uterus, exhibited, **v.** 33 ; cystic, of kidney, exhibited, **v.** 121 ; of knee, exhibited, **v.** 122 ; intratracheal, case of, **v.** 134 ; a uterine fibroid, exhibited, **v.** 185 ; sarcoma of kidney, exhibited, **v.** 184 ; of pituitary body, **vi.** 2 ; ovarian, exhibited, **vi.** 21 ; cerebral, **vi.** 23 ; cutaneous, **vi.** 77 ; fibroid, **vi.** 193 ; of neck, **vi.** 262 ; of bladder, **vi.** 264 ; of jaw, **vi.** 265 ; of mamma, **vi.** 265 ; naso-pharyngeal, **vi.** 266 ; perforating, of skull, exhibited, **ix.** 3 ; of anterior wall of bladder, exhibited, **ix.** 165 ; of the scapula, patient exhibited after removed of the tumour, **xi.** 186 ; tumour of, exhibited, **xi.** 186 ; of anterior vocal cord, exhibited, **xi.** 186 ; of frontal bone, removed, **xiv.** 1 ; of brain, specimen exhibited, **xiv.** 17 ; ovarian, exhibited, **xiv.** 155 ; of upper lip, case exhibited, **xv.** 13 ; gliomatous, drawings and photographs of, exhibited,

xv. 112 ; renal, original communication by Mr F. M. Caird, xvi. 180 ; intracranial, case exhibited, xvi. 60 ; ovarian, exhibited, xvi. 68 ; in cerebellum, drawing of, exhibited, xvi. 76 ; parotid, specimens exhibited, xvi. 40 ; sarcomatous, exhibited, xvi. 139 ; a gliosarcoma, specimen exhibited, xviii. 37 ; three sarcomatous, exhibited, xviii. 38 ; cystic, of testicle, specimen exhibited, xviii. 195 : cerebellar considered with reference to its localisation, original communication by Dr Alexander Bruce and Mr J. M. Cotterill, xviii. 207 ; pyloric, patient exhibited after operation, xix. 21 ; specimen exhibited, xix. 31 ; of pituitary body, specimen exhibited, xix. 28 : intra-muscular fatty, specimen exhibited, xix. 54 ; adherent to abdominal aorta, exhibited. xix. 196 ; of brain, exhibited, xx. 9 ; lymphoma of neck, patient exhibited after removal of, xx. 21 ; of dorsal vertebrae, exhibited, xx. 27 : of tonsil, patient exhibited, xx. 42 ; cervical, microscopic specimens of, exhibited, xx. 56 ; fatty, from axilla of an infant, exhibited, xx. 59 ; large perineal, exhibited, xx. 153.

TUMOURS of the brain, exhibited by Dr Carmichael, i. 2 ; dermoid, exhibited, iii. 36 ; case of multiple congenital, of arms and legs, exhibited, iii 2 ; molluscous, iii. 37 ; malignant of lower jaw, exhibited, iii. 142, 154 ; etiology of, vii. 30 ; fibroid of uterus, treatment of, by electricity, vii. 67 ; various, exhibited, viii. 23 ; carcinomatous of the bladder, viii. 35 ; fatty of the larynx, viii. 43 ; naso-pharyngeal, viii. 55 ; brain, two specimens, exhibited, x. 116 ; sarcomatous, of lung, exhibited, x. 117 ; of the bladder, cystoscopy in relation to, by Mr David Wallace, C.M.G., xii. 28 ; tubercular, of cerebellum, exhibited, xiv. 243 ; of the bladder, treatment of, by Mr David Wallace, C.M.G , xiv. 233 ; ovarian, exhibited xiv. 155 ; recurrent fibroid, case exhibited, xvii. 2 ; uterine, fibroid, exhibited, xvii. 7 ; cystic of left ovary, exhibited, xvii. 7 ; malignant of transverse colon, patient exhibited after operation, xvii. 51 ; epithelial, specimen exhibited, xvii. 64 ; multiple of unusual type, original communication by Mr J. M. Cotterill and Dr D. A. Welsh, xx. 18.

TURBINATED BODY, cyst of the inferior, by Dr R. Horsley, ix. 43.

TYLOSIS, patients exhibited, xviii. 2, 72, ; palmæ et plantæ, case exhibited, xx. 3.

TYPHOID—Fever, outbreak of, due to milk infection, by Dr Harvey Littlejohn, x. 88. **Fever,** serum-diagnosis of, demonstrated, xvi. 71. **Vaccine,** specimens exhibited, xvi. 140. **Ulceration** of intestine, specimen exhibited, xviii. 161.

TYPHUS FEVER, original communication by Dr Harvey Littlejohn and Dr Claude B. Ker, xviii. 162.

U

ULCER, gastric, case of perforating, by Dr Affleck, iii. 77 ; case of, exhibited, iii. 155 ; duodenal, specimens of, vi. 263 : of foot, vi. 266 ; gastric, specimen exhibited, ix. 198 ; rodent, what constitutes, by Dr Norman Walker, xii. 199 : rodent, cases exhibited, xiii. 33 ; cases exhibited after operation, xiii. 221 ; gastric, perforating, successful operation for, patient exhibited, xiv. 57 ; of stomach, specimen exhibited, xv. 58 ; perforating of foot, two patients exhibited, xv. 137 ; per orated gastric, patient exhibited after successful operation for, xv. 138 ; gas-

tric, perforated, case exhibited after operation for, **xvi.** 195 ; perforating of the foot, case exhibited, **xvi.** 132 ; malignant, amputation at the knee for, **xvi.** 61 ; duodenal, specimen exhibited, **xvi.** 178 ; rodent of groin, patient exhibited, **xvi.** 128 ; rodent, specimen exhibited, **xvi.** 134 ; of forearm, specimen exhibited, **xvi.** 139 ; gastric, stomach exhibited after operation, **xvii.** 97 ; rupture of, patient exhibited after operation, **xvii.** 101 ; gastric, specimen of multiple, exhibited, **xvii.** 183 ; perforating gastric, two cases exhibited after operation, **xviii.** 186 ; multiple gastric, specimen exhibted, **xviii.** 195 ; a superficial, from a case of pulmonary tuberculosis, specimen exhibited, **xviii.** 198 ; of forearm, patient exhibited, **xix.** 73 ; gastric, perforating, patient exhibited after operation for, **xx.** 49 ; stomach exhibited eight days after operation for, **xx.** 153 ; rodent, treated by X-rays, patients exhibited, **xx.** 131, 151.

ULNA, the lateral movement of, in pronation and supination, takes place at the shoulder-joint, by Mr C. W. Cathcart, **iv.** 219.

ULNAR, nerve, division of, case exhibited, **xi.** 93 ; epiphysis, tubercular disease of, boy exhibited after operation, **xix.** 192.

UMBILICAL CORD, origin and development of, original communication by Dr James Foulis, **xix.** 164.

UNNAS', DR, salve muslin, **i.** 19 ; Dr (Hamburg), method of treating skin diseases demonstrated, **v.** 174.

UPPER EXTREMITY, paralysis and anæsthesia of, case exhibited, **ix.** 3.

URETER, calculus from, exhibited, **xv.** 57 ; valvular condition of, from hydronephrosis, specimen exhibited, **xv.** 111 ; dilatation of, specimen exhibited, **xv.** 62 ; calculus of, specimen exhibited, **xvii.** 62 ; impacted calculus of, exhibited, **xix.** 31 ; large calculus of, exhibited, **xix.** 54.

URETHRA, note on rupture of, by Mr Joseph Bell, **i.** 3 ; calculus of, **i.** 19 ; cases of stricture of, by Dr F. Cadell, **i.** 162 ; on a new instrument for the treatment of difficult strictures of, by Mr A. G. Miller, **xii.** 286 ; injury to, patient exhibited, **xv.** 60 ; stricture of, specimen exhibited, **xv.** 62 ; resilient stricture of, original communication by Dr C. W. MacGillivray, **xvi.** 226 ; tuberculosis of, specimen exhibited, **xviii.** 111.

URETHRAL calculi, exhibited, **vii.** 219 ; **x.** 76.

URINE, albumen in, detection for, **v.** 189 ; milk-like, exhibited, **vii.** 229 ; electro-diagnosis by means of, **xi.** 252 ; instrument for registering viscosity of, exhibited, **xvi.** 212 ; residual, in cases of enlarged prostate, original communication by Mr A. G. Miller, **xix.** 197.

URTICARIA, case of, exhibited, **v.** 49 ; pigmentosa, case of, exhibited, **xviii.** 69.

UTERINE, appendages, removal of, for disease, with twenty-three cases by Dr Skene Keith, **vi.** 57 ; fibroid, malignant degeneration of, specimen exhibited, **xviii.** 195.

UTERUS, carcinomatous, exhibition of, **i.** 35 ; double, specimen exhibited by Professor Sir H. D. Littlejohn, **iv.** 21 ; prolapsus of, a frozen section exhibited by Dr Symington, **iv.** 176 ; fibro-cystic tumour of, **v.** 33 ; fibroid of, **v.** 34 ; fibroid tumours of, treated by electricity, by Dr Skene Keith, **vii.** 67, and appendages removed for large fibroid myomata, exhibited, **xvii.** 183 ; fibroid of, exhibited, **xvii.** 7 ; from a case of acute yellow atrophy, exhibited, **xix.** 194 ; double, specimen exhibited, **xx.** 60.

V

VACCINATION, skin eruption for seventeen years following, patient exhibited, **xviii.** 131.

VACCINE, typhoid, specimens exhibited, **xvi.** 140.

VALSALVA, sinuses of, aneurism of, specimen exhibited, **xviii.** 112.

VARICELLA GANGRAENOSA, case of, exhibited, **vi.** 19.

VARICOSE VEINS, subcutaneous ligature of, patient exhibited by Dr Duncan, **iv.** 38 ; operation for, **viii.** 192.

VASO-MOTOR disturbance of hands, case exhibited, **x.** 117.

VEINS, varicose, subcutaneous ligature of, patient exhibited, **iv.** 38 ; **vi.** 264 ; operation for, **viii.** 192 ; restorative treatment of, by Dr W. Taylor, **x.** 133.

VENA CAVA, superior, aneurism perforating, specimen exhibited, **xiv.** 40 ; case of, original communication by Dr A. Bruce, **xiv.** 60 ; photographs of, exhibited, **xiv.** 156.

VENEREAL WARTS, patients exhibited, **xiv.** 200 ; casts of, exhibited, **xiv.** 60.

VENESECTION as a remedy, by Dr Shand, **x.** 62.

VENTRICLE, left, rupture of, exhibited, **vii.** 52 ; tapping of right, recovery after, original communication by Dr A. T. Sloan, **xiv.** 24 ; dilated lateral, treated by drainage, original communication by Dr William Stewart, **xvi.** 212 ; lateral, drainage of, case of, exhibited, **xvi.** 207.

VENTRICLES, drawings of brain and medulla from a case of hæmorrhage into, exhibited, **xvii.** 109.

VERMIFORM APPENDIX, perforated, **viii.** 25.

VERTEBRAE, cervical, fracture of, exhibited, **iii.** 55 ; cervical dislocation between third and fourth, specimen exhibited, **xvii.** 96 ; from a case of suicidal cut-throat, specimen exhibited, **xvii.** 96 ; dorsal, with tumour, exhibited, **xx.** 27.
